

DS-10 Dryside Cleaner 7kg 61029

- Dryside cleaner
- Cleans the combustion surfaces of copper cascade boilers
- After use, neutralise the system water before disposal to foul drain using Fernox System Neutraliser
- Available in 7 kg bottles
- 0

This proven dryside cleaner is for use with cascade boilers with copper heat exchangers, to help restore and optimise system efficiency.

Application

For each 10 litres of solution required first dissolve 1 kg of DS-10 in a small quantity of warm water then add to the remaining water. This should provide a solution of sufficient strength to clean adequately a lightly contaminated heat exchanger in a few minutes. For cases where severe contamination of combustion surfaces has occurred, several units are to be cleaned, or where a reduction in the cleaning time is required, the strength of the solution may be increased to 20% w/v (i.e. 2 kg of powder per 10 litres of water). Neutralise prior to disposal using Fernox System Neutraliser added at a rate of 5 L System Neutraliser to every 7 kg of DS-10 used. Note: Fernox DS-10 must not be used with boilers employing aluminium heat exchangers. Refer to manufacturer's service literature for detailed instructions. Fernox DS-10 must not be mixed with products containing nitrite or with bleaching products.

Package, Handling & Safety

Fernox DS-10 is supplied in 7 kg containers.

Flammable gas (Hydrogen) may be liberated in use: Do not smoke and remove all possible sources of ignition. Contact with metals, in particular zinc, aluminium, magnesium and steel will liberate this gas.

Specification

Colour: White
Odour: None
Form: Powder

pH: 1-2 (10% w/w solution)
SG: N/A

Single Item

Height mm 350
Width mm 180
Depth mm 110
Weight kg 7.100
Barcode EAN 5014551610293

Outer Carton

Outer Height mm 360
Outer Width mm 270
Outer Depth mm 205
Outer Weight kg 7.000
Transit Type BLOCK
OCU Barcode 5014551610293
