Prestige[®] Comfort System

Maximize Your Energy Savings With Time-Of-Use Programming

Managing your daily energy costs has never been easier

Each day, more and more utility companies are deploying Time-of-Use pricing schedules where homeowners are charged more for energy used during high-demand times of the day and/or year.

For example, homeowners in Arizona may be charged up to four times the regular utility rate during high-peak pricing* and others in Toronto may be charged up to 43% more during peak hours. ** Of course, pricing and timing varies depending on the electricity demands of the utility in that area.

For homeowners with utility services that incorporate Time-of-Use pricing, it can be a challenge to manage the different price schedules while also maintaining a comfortable living environment.

Yet with heating and cooling representing more than 50% of the total energy consumption (and utility costs) for most homes — proper management of Time-of-Use pricing represents a significant opportunity for savings.

The savings

Pays for itself

Thanks to Honeywell Home Prestige® comfort systems, homeowners now have the flexibility to set their normal temperature programming schedule (Wake-Leave-Return-Sleep) as well as a separate Time-of-Use program to automatically adjust their home's temperature when prices are at their highest.

Homeowners who use a programmable thermostat alone can save up to 33% on energy costs.*** By incorporating an additional Time-of-Use program schedule, those savings can be even more substantial. And with Prestige's high-definition color display and interview-based programming process, maximized energy savings have never been more attractive.

*** If used as directed. Numbers based on average annual utility costs of \$1500 with 50% going to heating and cooling costs and 33% savings if used as directed.

The easiest to use thermostat ever

Now with Added "Time-Of-Use" Energy Savings

Homeowners have rated the Honeywell Home Prestige® easier to use than other thermostats. The high-definition display makes it easy to see, and the simple touchscreen technology and interview-based programming make using it a snap.

And now, with its new built-in Time-of-Use feature, the Prestige can automatically adjust temperature settings based on your utility schedule to help you get the most energy savings.

The simplicity

Practically Programs Itself

Use the Time-of-Use pricing schedule provided by your utility to create a utility schedule on Prestige by answering a few simple questions such as “Which temperatures would you like to adjust based on your Utility Schedule?” and “What is the maximum or minimum temperature you want during a high-peak pricing period?”

Set the peak pricing temperatures.

Select which seasons have a utility schedule.

Review peak pricing schedule.

The schedule

Kicks in During Peak Periods

With Time-of-Use, you'll have your regular comfort schedule and, when needed, a Time-of-Use schedule that will kick in to save you money during peak periods. A sample schedule might look like this:

It all adds up to an energy-saving schedule based on your lifestyle needs and comfort preferences, backed up by a Time-of-Use schedule that reduces your energy consumption during peak utility rates. You simply can't find a better blend of comfort and energy savings.

Prestige® Thermostat

Portable Comfort Control

Wireless OutdoorSensor

Prestige® comfort systems

Time-of-Use Pricing is only the Beginning

High-Definition, Full Color Display* — Visual clarity of the display is 3 times better than typical thermostats

Graphics — A graphical user interface to display information in a way that's easy to understand

Simple Touchscreen Technology — No hidden doors or complex buttons

User Friendly — Consumers rated it easier to use than other thermostats

Tri-Lingual — Adjust settings to display in English, Spanish or French

Temperature Control on Demand — Sense and make adjustments using the Prestige Comfort System from anywhere in your home

Integrated Indoor Air Quality Control — Controls the TrueDry™ Dehumidifier, Resideo's Balanced Ventilation System and either the TrueSTEAM™ or TrueEase™ Humidifier all with one control

Outdoor Information — Displays outdoor temperature and humidity right on the thermostat home screen

* Available in HD - High Definition (color) or SD - Standard Definition (black/white)
