THERMOCOUPLES

Continuous Operation

Resideo Q340A and Q390A thermocouples are the perfect choice for easy installation and reliable performance. Built for long service life, Resideo thermocouples are available in a variety of lead lengths to help you meet the needs of any situation. Plus, they feature a push-in clip, split nut and adapter assembly for easy pilot burner installation.

Q340A And Q390A Thermocouples

Easy installation is just the beginning. Resideo thermocouples help you spend more time working productively and less time handling callbacks, because they're built to work, day in and day out.

APPLICATION AND INSTALLATION FRIENDLY

The Q340A and Q390A thermocouples generate a thermoelectric current that senses a pilot flame on gas-fired heating systems. For easy pilot burner installation, the Q340A and Q390A come with a push-in clip, split nut and an adapter assembly. Each also comes with a male nut connector for Pilotstat® safety control power units and are available in a variety of lead lengths.

TWO GREAT CHOICES

The Q340A is a premium thermocouple with the long life and durability that your customers demand. Built with a maximum amount of copel, the Q340A will provide long-lasting service that reduces callbacks and keeps your customers happy.

For situations where a utility grade thermocouple is the best solution, the Q390A is the right choice. It's an ideal thermocouple for yearly service contract applications and budget-conscious customers.

Resideo Reliability

When the name on the thermocouple is Resideo, you know it's a dependable product. Resideo products have a long history of quality and long-term performance that makes a positive impact on your bottom line. You'll know you have the right product to install, that you can install it quickly and that its reliable performance will reduce callbacks. That's dependability. That's Resideo.
