

TRITON®

TRITON® HEAVY DUTY 80 & 100-GALLON MODELS

THE ORIGINAL GAME CHANGER

Triton Heavy Duty is the original game changer for large enterprises with high hot water demands and high efficiency requirements. Guided by plumbers and perfected by Rheem Engineers, Triton is designed for durability, universal retrofit, faster service, and simplified maintenance for commercial applications.

With built-in smart monitoring technology, LeakGuard™ all-inclusive leak detection and prevention system and a patented, porcelain coated ASME steel heat exchanger, Triton gives business owners peace of mind and keeps businesses up and running.

THE TRITON ADVANTAGE

- Eliminate the Emergency
- Easy Retrofit
- Built to Last

This product meets a stringent set of our internally defined sustainability standards.
