

COMMERCIAL

TANKLESS SOLUTIONS

HOT WATER THAT CAN KEEP UP WITH BUSINESS

Rheem® Commercial Tankless Water Heaters are designed to deliver continuous, dependable hot water, save money and space, and keep business up and running workday after workday. With manifold capabilities in available models that make it easy to connect up to 20 units, no matter the scope or redundancy needs of your customer's business, Rheem Commercial Tankless Water Heaters keep the hot water flowing.

WHY RHEEM COMMERCIAL TANKLESS?

Delivering Energy Savings, Flexibility & Support

Introducing a dedicated water heating solution for businesses with all the Rheem® tankless advantages, plus:

- Thermal efficiency of up to 96%
- 11,000–199,900 BTU per unit
- Built-in maximum temperature setting of 185°F
- Common venting options for indoor natural gas models
- Manifold control models for expanding up to 3,998,000 BTU/h systems (20 units linked)
- Service valves included
- Options for factory tested, pre-plumbed systems

SIMPLER
INSTALLS,

SERVICE

CONSIDER A TANKLESS SYSTEM

Application Need	Application Example
For continuous usage	24-hour fitness club showers
Moderate flow rates with extended periods of use	A parts spray washer on a manufacturing line
High water usage, moderate flow-rate equipment	Bathtubs, three-compartment sinks, pre-scrappers
A set of fixtures	A kitchen with multiple sink stations used one at a time
A rarely used fixture or on its own line	A safety shower, a mop sink in its own building, single private showers
Outdoor installation preferred / required	Installing on a hotel roof

RHEEM EXCLUSIVE ADVANTAGES

Manifold Control Ready

Models with manifold control easily connect up to 20 units in a daisy-chain configuration with no additional accessories needed.

Built-In Condensate Neutralizer

The acidic byproduct of combustion can corrode and damage pipes, but the built-in condensate neutralizer raises the pH of this condensate so it can be safely discharged into the drain.

Tankless Support

Count on Rheem for dedicated, personalized service and system solutions. Our sales and service teams are true partners committed to providing concierge-level service for all commercial applications.

PPs Venting

Rheem polypropylene stabilized venting options from Centrotherm are the only venting materials in the industry with UL-1738 and ULC-S636 certifications for flue temperatures of up to 230°F.

Rheem® Commercial Series

High Efficiency Tankless Gas Water Heating Solutions

MAXIMIZES WATER AND ENERGY SAVINGS AND KEEPS INSTALL COSTS TO A MINIMUM

Lower Installation Costs

Allows for inline or back-to-back common venting (Natural Gas Models Only) of up to ten units and room air intake configurations.

Reduced Downtime

Having multiple units working together creates redundancy, so if one tankless water heater goes down, your customer's business stays up and running.

Thermal Efficiency	Up to 96%
Venting Type	Vents with Schedule 40 PVC or PPs
Unit Dimensions	27-1/2" H x 18-1/2" W x 9-3/4" D
Unit Weight	82 lbs.
Warranty	Heat Exchanger: 5 Years
	Parts: 5 Years
	Labor: 1 Year
Ultra Low NOx	All Natural Gas Models
High Altitude	Up to 8,400 ft.

Description	Commercial Tankless	Commercial Tankless with Manifold Control
Indoor – Nat. Gas	RTGH-C95DVLN	RTGH-CM95DVLN
Indoor – LP Gas	RTGH-C95DVLN	RTGH-CM95DVLN
Outdoor – Nat. Gas	RTGH-C95XLN	RTGH-CM95XLN
Outdoor – LP Gas	RTGH-C95XLP	RTGH-CM95XLP

Rheem® Parts & Accessories

Cosmetic Pipe Covers

Enhances the installation of the water heater, providing protection from tampering and weather.

- **RTG20227** – Fits RTGH series indoor or outdoor condensing models

Outdoor Recess Box

Allows you to mount an outdoor tankless into the wall, flush with the outside of the building. They are weather resistant and can be locked for security.

- **RTG20226** – Fits RTGH X series
- **RTG20253** – For stucco applications - Fits RTGH X series

Flush Kit

Connects to the service valves for an easy way to flush and de-scale your tankless water heater.

- **RTG20214** – Includes pump, hoses and 5-gallon bucket

AllClear® Water Treatment System

Combat hard water and scale build up for use with one or two unit systems.

- **RTG20251** – AllClear water treatment system
- **RTG20252** – Replacement cartridge

Service Valves (Included)

Webstone®-Brand Tankless Service Valves

- **RTG20220AB** – Clean Brass for Low Lead Code - Includes cold and hot water set and pressure relief valve

Condensate Neutralizer

For managing condensate run-off from venting. Units have built-in condensate neutralizer for secondary heat exchanger.

- **SP12151** – External condensate neutralizer accessory with PVC connections
- **AP16770** – Replacement rocks for condensate neutralizer
- **RXGY-A01** – External condensate neutralizer accessory with flex tubing connections

RJ25 Communication Cables

Additional cable lengths for connecting translators between units or WiFi module to translator where additional length is required.

- **RCPN-AMP03-0013111101-0003** – 48" Long
- **RCPN-AMP03-0013111101-0002** – 72" Long
- **RCPN-AMP03-0013111101-0004** – 240" Long

New EZ-Rack™ Kit

RTG20304

- Easy wall mount or free-standing configurations
- Each EZ-Rack Kit holds one or two units
- Expands with additional kits to hold any number of units
- Assembles easily on the jobsite in under ten minutes

Image depicts three EZ-Rack Kits mounted together. EZ-Rack Kits sold individually.

PROTECH®

PROTECH® Service Kit

Designed with the contractor in mind, this kit provides all the basic parts necessary for a complete repair of a Rheem tankless gas water heater.

- **PROTECH PD966351** – Commercial Tankless Models

Rheem® Commercial Tankless Features

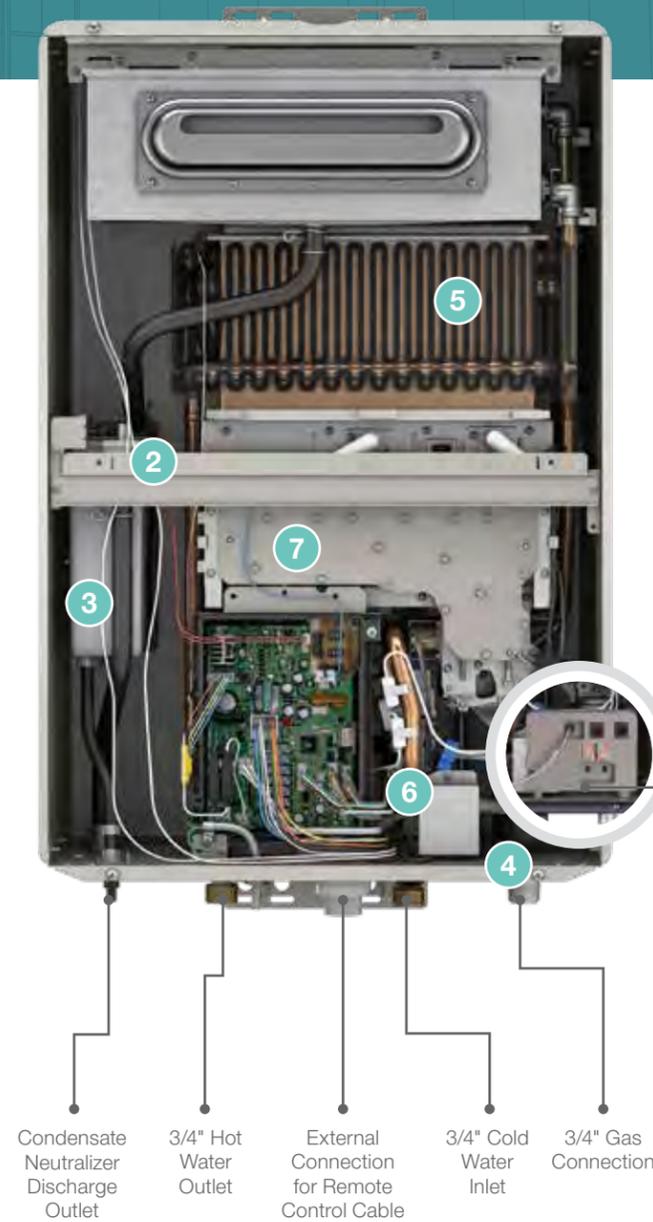

SAVE
TIME
INSTALL
MORE

Indoor Direct Vent

- 1 PVC Venting Compatible**
Vent individual units with 2", 3" and 4" PVC, saving time and money
- 2 Common Vent Compatible**
Vent up to 10 units together to save space and reduce outside wall penetrations (Natural Gas Models Only)
- 3 Built-In Condensate Neutralizer**
Rheem Exclusive
Safely dispose of condensate and save on installation cost and time
- 4 Half-Inch Gas Line Compatible up to 24 ft.¹**
Saves money and time on installation to an existing system

Outdoor

- 5 Overheat Film Wrap**
Rheem Exclusive
Safety feature prevents dangerous temperatures allowing industry-best, 1/2" side-to-side clearance to combustibles
- 6 Low-Flow Activation**
Minimum flow rate of .26 GPM and activation flow rate of .40 GPM ensures hot water in low-demand situations
- 7 Six-Stage Modulating Burner**
Tight control over burner energy efficiency
- 8 EcoNet® Enabled**
All models from 2010 to present can connect to EcoNet mobile app via Tankless EcoNet Accessory Kit (REWRA630TWH)
- 9 Easy to Connect 20 Units**
Models with manifold control easily connect up to 20 units with no additional accessories required

¹Based on Rheem testing of 1/2" gas line with gas supply of 7" w.c. up to 24'; Installation conditions vary; Consult the Rheem Use and Care Manual, the Rheem Gas Piping Facts brochure (TK-GPF-12), the National Fuel Gas Code (NFPA 54, ANSI Z223.1) and any other local gas codes when installing a Rheem Tankless Water Heater.

Why Add EcoNet?

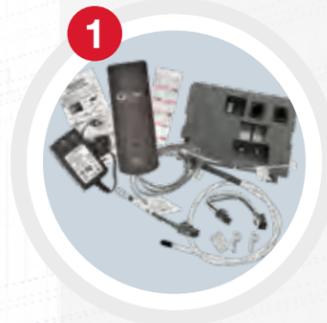

Rheem® is proud to bring EcoNet® WiFi control compatibility to our commercial tankless water heaters. Available via four accessory kits, EcoNet functionality enables businesses to minimize downtime with proactive maintenance alerts, while giving them more savings and control. Features include:

- Water **leak detection** and **auto system shut-off**¹
- **Mobile alerts** for notifications and maintenance reminders
- Gas and water **usage reports**
- Mobile water **temperature control**

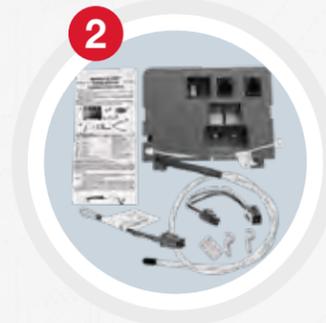

¹Indoor models only

ADDING ECONET WIFI TO RTGH-C95 MODELS (Standard Commercial Models)

EcoNet Tankless Translator & WiFi Module Kit
REWRA630TWH
 Contains all parts required to upgrade single Rheem tankless water heaters to have EcoNet connected features. For multi-unit systems, a Translator Kit is required for each additional unit.
Includes translator kit, WiFi module kit and leak detection kit

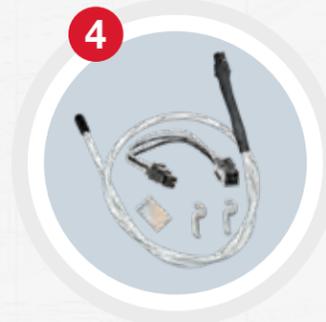

EcoNet Tankless Translator Kit
PD415188
 Each tankless water heater requires a translator to work with EcoNet. Can be used in addition to Tankless Translator and WiFi Module Kit for multiple tankless unit installations.
Includes translator, leak detection kit and connection cables

NEED: **One per system** (installs in first heater) **+** **One per additional heater**

ADDING ECONET WIFI TO RTGH-CM95 MODELS (Commercial Models with included Manifold Control)

EcoNet Tankless WiFi Module Kit
PD415189
 WiFi Module Kit can be used to upgrade Tankless systems already containing Manifold Translator. One WiFi Module is required for each tankless system, not per tankless unit.
Includes WiFi module, connection cable and power cord

EcoNet Leak Detection Kit
PD415190
 Can be connected to built-in Manifold Translator in Commercial Tankless models to add leak detection features.
Includes leak detection sensor and harness

NEED: **One per system** (plugs into translator of any heater in system) **+** **One per heater** (indoor models only)

Rheem Commercial Tankless System

This custom-built solution arrives on the job site factory-assembled with single-point connections, including:

- RTGH-CM95 condensing tankless water heaters
- Factory installed system control manifold
- Pre-sized water and gas manifold
- Electrical wiring
- Condensate lines

Configurations

- Wall-hanging system
- Wall-mount system
- Free-standing system

Engineered Solution by Rheem®

- Scalable from 11,000–1,199,400 BTU/h in one system
- Multiple configurations: 2-6 units per system
- Options for future expansion

Easier Installations

- Reduce installation costs with single-point connections
- crane hooks for lifting
- fits through standard doorway

	MODEL NUMBER	NUMBER OF UNITS	SYSTEM DESCRIPTION	FUEL TYPE	LAYOUT

Commercial Tankless Venting

Common Venting Solutions

Common venting saves space and materials while reducing outer wall penetrations (Natural Gas Models Only)

- Vent up to 10 units
- In-line or back-to-back
- Room air or direct vent
- PPs header kits - 6, 9, 10" diameters

Why PPs:

- Lightweight
- Push fit
- UL-1738/ULC

NOTE: If heaters are common vented, you can still manifold up to 20 units in a bank, however, you must limit the venting cascade to ten units.

PPS CAN BE
28%
THE WEIGHT
OF PVC

Easy to Install

- Gasketed, push-fit connection system installs quickly and easily – no glues, primers or solvents required
- Directional gasket and flow arrows ensure proper vent layout
- Connector ring installs where needed, in seconds ensuring UL-1738 and ULC-S636 compliance
- Venting parts can be field cut to meet any venting requirement

	Centrotherm PPs	PVC	CPVC
Chemical Resistance			
Aromatic Hydrocarbons	✓	X	X
Sulfuric Acid	✓	X	X
Hydrochloric Acid	✓	X	X
UL Listed (0°F to 230°F)	Listed	Not Listed	Not Listed
Actual Working Temperature	32°F (0°C) 248°F (120°C)	50°F (15°C) 149°F (65°C)	50°F (15°C) 194°F (90°C)

10"	27%	2.00	7.55	13.09

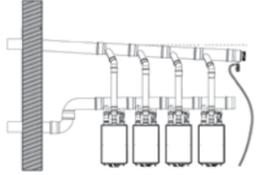

Rheem® Commercial Tankless Common Venting

Header kits include all required venting pieces to connect multiple units. Additional vent run accessories are required to complete installation. Common venting header kits are available for inline or back-to-back installations, direct vent or room air intake options, using 6", 8" and 10" trunk diameters.

Inline Header Kits

Trunk Diameter	Number of units	Direct Vent Part No.	Room Air Part No.

Tankless Multi-Unit Flow Rates

By manifolding up to 20 commercial tankless water heaters together in a system, businesses can produce up to 190 gallons of hot water per minute. Use the chart below to determine the expected gallons per minute (GPM) based on the number of units connected and temperature rise requirements.

Manifold QTY	Total System BTU based on 199,900 Btu per Unit	Total System Gallons Per Minute (GPM) - Per Temperature Rise (ΔT)											
		35	45	50	60	70	77	80	90	100	110	120	140

Sizing Solutions

Get It Sized By Rheem

Rheem® Applications Engineers offer professional sizing and selection services. Provide project details and let our engineers deliver a personal consultation to help with the perfect water heating solutions for commercial projects. Our Tankless Support Team and Applications Engineer are available to support sizing requests and troubleshooting.

Submit your commercial sizing request online at [Rheem.com/Project-Sizing-Solutions](https://www.rheem.com/Project-Sizing-Solutions)

Commercial Financing

Commercial KwikComfort Financing—via Fernwood Capital™ & Leasing—provides financing options for business owners and national accounts, so you can:

- Increase sales with more affordable equipment
- Improve rate of repeat business
- Receive faster payment to your company
- Increase profits by selling monthly payments, not total cost

H₂AC® Rooftop Unit Featuring eSync® Integration Technology

Our integrated air and water system is the first and only system of its kind—and available exclusively from Rheem®. Our eSync Integration Technology brings a new level of savings and efficiency to full-service restaurants and other businesses by using heat that is normally rejected into the atmosphere to heat water.

With the highly efficient integrated air and water system, you will experience:

- Lowest cooling and water heating operational costs available
- Up to 50% savings on your annual water heating costs
- Up to 20% savings on your annual energy costs
- Less than a two-year payback
- Reduced energy footprint
- System contributes to your environmental initiatives
- One-source provider for air and water solutions
- Trusted Rheem quality and reliability
