

MEGAPRESS® G

Press safer. Press bigger.

The safer, faster, cleaner way to connect gas pipe. Available up to 4".

Strict deadlines and tight budgets demand efficient pipe connections. With Viega MegaPressG press technology, you can make flameless connections on 1/2" to 4" gas pipe in 16 seconds or less. 60-90% labor savings and faster connections mean you can focus on the bigger picture – safer, more efficient projects.

PRODUCT FEATURES

- Carbon steel alloy with corrosion-resistant zinc nickel coating
- Sizes and configurations from 1/2" to 4"
- HNBR sealing element for fuels and gases
- Graphite separator ring engineered to withstand high temperatures
- Most application approvals of any carbon steel press fitting system
- For use with ASTM Schedule 5 to Schedule 40 carbon steel pipe
- Configurations include elbows, couplings, no-stop couplings, reducers, tees, reducing tees, adapters, reducing adapters, unions, caps and flanges
- Connections in 16 seconds or less
- Can reduce labor costs by as much as 60-90%
- Smart Connect® technology helps identify unpressed connections
- Approved for underground use according to local code

SAFER

Flameless connections eliminate the need for hot work permits and fire watch. No open flames mean other trades can work simultaneously and safely.

FASTER

Connections are made in just 16 seconds or less, saving you up to 60-90% on labor costs versus traditional methods.

CLEANER

Unlike traditional joining methods, MegaPressG doesn't use any consumables, threading oils or breakaway plastic tabs, keeping jobsites cleaner.

BIGGER

MegaPressG is approved for connecting gas pipe up to 4", making it the first technology of its kind.

SMARTER

Smart Connect® technology helps easily identify unpressed connections.
