

8 Climate Trak

Description

Climate Traks are used for radiant heating applications in both new construction and retrofit applications.

The product is designed to strongly grip the PEX tubing without air gaps or the need for sealant/adhesives, ensuring high heat conduction. Climate Traks are fastened tightly to the underside of subfloor for maximum system performance.

Technical Data

Available for $\frac{3}{8}$ " or $\frac{1}{2}$ " ViegaPEX Barrier tubing, in 4 foot or 8 foot lengths.

Pre-drilled holes for attachment to subfloor (10 holes per 4 foot Trak, 20 holes per 8 foot Trak).

Specifications

Material

Extruded aluminum

Weight

$\frac{3}{8}$ " Plates:

■ Product No. 15209	4 foot length 1.07 lbs.
■ Product No. 15207	8 foot length 2.14 lbs.

$\frac{1}{2}$ " Plates:

■ Product No. 15210	4 foot length 1.16 lbs.
■ Product No. 15208	8 foot length 2.32 lbs.

Dimensions

$\frac{3}{8}$ " Plates:

- 3.5" x 48" x 0.515"
- 3.5" x 96" x 0.515"

$\frac{1}{2}$ " Plates:

- 3.5" x 48" x 0.605"
- 3.5" x 96" x 0.605"
