RAPID-FIT®

MEET THE NEW RAPID FIT PRODUCT LINE!

LSP is committed to delivering innovative products to market and is pleased to announce the new and improved LSP Rapid Fit product line.

Rapid Fit Bath Waste Assemblies are available as ABS, PVC or Brass 1 ½" Schedule 40 kits, and designed for easy bath tub installation. Rapid Fit kits are available as Rough-In (no Finish Trim included) or Chrome Finish Assembly kits to provide installation flexibility. Rapid Fit provides a variety of Drain Stoppers and Overflow Plates with multiple trim finish options to match designer finish bath tub hardware. Rapid Fit provides rough-in test capabilities and an accessory to make the Lift & Turn Drain Stopper ADA compatible.

The newly designed overflow elbow included in our Rough-In Kits has a built in knock-out feature and can be used with 1 and 2 hole overflow plates.

Our new Designer Finish Trim Kits come in a variety of designer finishes to improve the appearance of the existing tub drains. The newly designed Push-On strainer covers make it super simple to update the tub's designer finish without the hassle of removing the tub's strainer. We now offer Matte Black and Champagne Bronze finishes!

Please feel free to reach out to your LSP Representative or LSP Customer Service at 800-854-3215 for more information or clarification, as well as availability dates.

Rough-In Kits

Rapid Fit Rough-In assemblies with testing features. The newly designed overflow elbow with knock-out test feature now combines the 1 & 2 hole overflow plate. The Revolver Overflow Elbow incorporates an integrated test feature, as well as a snap-on overflow plate. The Dual-Test feature provides overflow/drain plugs and hardware to test and then mount overflow plates. Rough-In kits are offered in ABS and PVC, half or full (includes pipe and tee) kit options.

Designer Finish Trim Kits

Designer Finish Trim Kits can be used to improve the appearance of the existing tub drains or change to a different designer finish. The newly designed push-on strainer covers are offered in designer finishes with different overflow and stopper configurations. Just remove the old stopper, insert a new drain flange and install the new stopper without removing the strainer. Kit includes - overflow plate, screws (1 or 2), push-on strainer cover and stopper.

RFT-100-C
Tub Drain Kit

Universal Tub Drain Kit

Our Universal tub drain kit is used with older tubs that have a smaller drain hole. The Universal tub drain kit includes a strainer adapter bushing, which allows for the use of the standard drain shoe. The included 1 hole overflow plate can replace an existing 1 or 2 hole overflow plate by using the included overflow adapter bar.

RF-1287
Rapid Test Kit

Rapid Test Kit

Rapid Test Kit includes the tub drain and overflow test plugs. Used for Rough-In pressure testing of the tub drain assembly. The Overflow test plug can be used with the 1 & 2 hole overflow if the knockout is removed or damaged. The tub drain test plug can also be used to protect the tub drain strainer finish during the rough-in phase.

PREVIOUS PART #	NEW PART #	DESCRIPTION	MSTR CTN QTY

RF-03136
Gasket Retainer

Strainer Gasket Retainer

The Gasket Retainer screws into the strainer during the rough-in installation of the drain shoe to help locate the tub drain opening and keep the tub gasket in place on the drain shoe. After the drain shoe is correctly located, the Gasket Retainer is removed and the drain strainer can be installed. A standard drain strainer tool can be used to remove the Gasket Retainer.
