

AIRIFIC

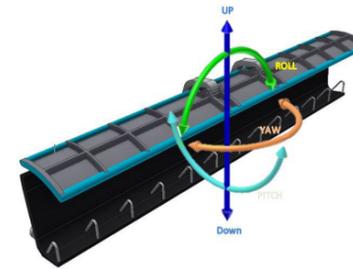

Experience the wonders of flight.

HIGHEST CAPACITY FLYING THEATER IN THE INDUSTRY

HIGHLIGHT

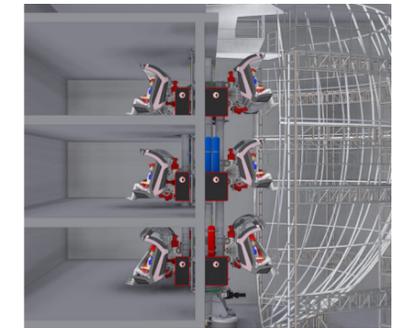

Maximum capacity flying theater with the smallest footprint available.

It's like flying through the sky. Our gondolas are able to pitch, roll and yaw in perfect synchronization with the film. And the special surprise is for your guests, that will board in the loading area and then be turned into the movie theater by rotating the middle column.

Come fly with us. The team of Mack Animation is partnering with us to create stunning movies for the big screen. Well known for 'Fly over Europe' and feature films like 'Happy Family' the studio is your partner for any personalized scenario you want your guests to immerse in.

Let's maximize the capacity. The back-to-back gondolas allow the maximum of loading time. While one set of passengers is in the theater - the other side is facing in the loading area. Therefore a massive reduction in personell and space is achieved.
