

MEGA COASTER HYPER COASTER

COASTERS

A true giant among coasters.

WITH THE MEGA COASTER WE LIFT YOUR GUESTS UP TO 200 FT IN THE AIR.

HIGHLIGHT

For even higher speeds and more thrills choose the Hyper Coaster going up more than 200 ft.

A steady, yet fast climb to the top.
MACK Rides will provide a classic lifthill with the dramaturgy that comes with it: Until the top is reached your guests can get a look from above and see how deep they will plunge next. In comparison to other drive mechanisms this is not only the most cost-effective but also the most proven one.

We will put you upside down!
Our customized layouts will fit your site perfectly and can include several inversions to get a unique rollercoaster experience. Let us show you what options we can include in your ride.

Let us illuminate your train.
Built-in LEDs in the front and side panels create an extraordinary effect during the nighttime. Bright front lights will guide the way while the rest of the coaster is illuminating the track beneath the cars.
