

LAUNCH COASTER

Your guests will gawp at this sensational attraction.

A REMARKABLE RIDE PLEASURE FOR EVERYONE WHO ISN'T AFRAID OF SPEED.

HIGHLIGHT

After a powerful start this coaster is ready for any twist and turn you can imagine.

We will put you upside down!

Riders are treated to twists, turns, airtime hills, loops, and a lot more surprises on the way. To give your ride another boost ask us for multiple launch options, either forwards or backwards.

No shoulder restraints guarantee maximum freedom.

Our launch coaster trains set the new standard in the industry with their state-of-the-art seating. You have never ridden a firstclass seat in a roller coaster like this within the highest safety category (class 5).

A powerful boost, easy to maintain.

Whether you start from standing still or give the train an extra boost – the LSM drives of our launch coaster can enhance your ride story. Rushing out of a building or initiating the second stage of the ride is a blast. More than 2000 hp accelerate the train from 0 – 100 kph in just a blink of the eye.
