

POWERED COASTER

COASTERS

Do the Locomotion.

PERFECT TO INTRODUCE FIRST-TIME USERS TO ROLLER COASTERS.

HIGHLIGHT

As the ride is rather comfortable and the speed is flexible, it is a perfect familyshared experience.

Sparking enthusiasm easily. This family favorite is the perfect solution for indoor and outdoor use. Whether it's a shopping center, above a lake, or starting off with a Dark Ride section - our Powered Coasters have it all.

Enjoying speed for the first time. As there is no straight lift hill you can start right from the station and speed up when going through curves.

High emotions low to the ground. The track twists and turns and the ride gets faster and faster as the train moves along, and that all while keeping low to the ground.
