

STRYKER

COASTERS

Unleash the power!

GET THE BEST ROLLERCOASTER HARDWARE!

HIGHLIGHT

Highly dynamic layouts only possible with the compact design of the Stryker trains.

It's like flying through the sky.

The compact design of the train allows sharp turns and quick transitions throughout the track. A heartpumping coaster ride filled with adrenaline rushing elements are at the core of this product.

Embrace the position.

On the Stryker coaster, the seating offers a unique experience! Two riders sit directly above the track, while two sit on the sides with their feet resting on a footrest. This design not only makes boarding easier but also adds extra comfort and safety, ensuring an exhilarating yet secure ride for everyone.

Let's maximize the capacity.

For the maximum capacity we can recommend an omni-moving station that allows a comfortable entry and exit from the ride while keeping the exact speed. So even with 16 seater trains we can achieve a THRC of 1600 pph.
