Professional Summary

Experienced Full Stack Web Developer with a passion for creating scalable applications using **PHP, Laravel, Vue.js, and Nuxt.js**. Skilled in backend API development, clean and documented coding, test-driven development, and cross-functional collaboration with mobile and **UI/UX teams**. Experienced in mentoring juniors, resolving critical bugs, and leveraging AI tools. Also supported **ERP** and **POS** systems, improving usability, training users, and ensuring accurate business operations.

Experience

Za Information Technology Co., Ltd.   **Yangon**

Full Stack Web Developer   Nov 2023 – Nov 2025

- Designed and delivered scalable web applications using **PHP**, **Laravel**, **Vue.js**, and **Nuxt.js**, improving performance and reliability.
- Built and optimized **RESTful APIs** with backend and mobile teams, enabling smooth cross-platform integration and collaborated with **UI/UX** and project coordinators to refine user flows and deliver features on schedule.
- Applied **TDD** and AI-assisted tools to speed delivery, reduce defects, and improve development productivity and reviewed code and **mentored** juniors to maintain clean coding standards and documentation quality.
- Delivered rapid bug fixes and performance enhancements during releases, increasing system stability and client satisfaction.

Consumer Goods Myanmar   **Yangon**

ERP Software Support   Dec 2020 – Dec 2021

- Tested **POS** and **ERP** system updates to ensure feature stability and usability, while identifying defects and communicating them to the development team for resolution.
- Trained branch staff on system usage and workflows, improving user adoption and operational efficiency.
- Monitored stock reports and branch discrepancies, supporting accurate inventory management and process improvements.

Freelancing   **Yangon**

Full Stack Web Developer   Sept 2020 – Dec 2023

- Built custom web applications using **PHP** and **Laravel**, designing **RESTful APIs** and database structures to deliver secure, scalable solutions.
- Developed responsive **UIs** with **JavaScript**, **jQuery**, and **Bootstrap**, improving usability, performance, and cross-device compatibility.
- Collaborated with clients on requirements, testing, and delivery, ensuring reliable releases and on-schedule project completion.

Contribution

MCEA (Myanmar Computer Enthusiast Association)   Full Stack Development

- Built core platform features including admin dashboard, role-based access control, member management, event and fund tracking modules.
- Developed content tools for articles, posts, and quiz management, supporting organized learning resources for users.
- Created a responsive client interface for user registration, login, browsing posts, viewing events, and accessing knowledge content.
- Focused on usability, scalability, and a smooth experience across both admin and client interfaces.

Delivery Software (Laravel + Vue 3)   Full Stack Developer

- Built core delivery, fleet, and order management modules to streamline operations and enable end-to-end order tracking for large-scale delivery agents.
- Developed analytics dashboards and reporting features for monitoring deliveries, payments, and operational performance.
- Improved system scalability, code quality, and user experience through workflow optimization, package upgrades, and ongoing feature enhancements.

Myanmar Post (PHP, Laravel, Vue.js)   Full Stack Developer

- Modernized the user interface and delivered new features to improve usability and system efficiency.
- Optimized application performance and error handling, reducing processing time and improving operational reliability.
- Created essential test cases and integrated third-party international services based on client requirements.

Ecommerce Websites (Nuxt.js, WebSockets, Pinia)   Full Stack Developer

- Developed grocery, marketplace and eSIM platforms with product catalog, cart, checkout, order tracking, and customer account features.
- Implemented real-time chat for customer support and integrated payment gateways to enable smooth transactions.
- Ensured responsive UI and optimized performance across web and mobile devices.

POS Lite (Backend API)   Backend API Development

- Developed a scalable core backend API powering multiple e-commerce and POS applications, with multi-platform authentication across web, mobile, and desktop.
- Implemented image processing, notifications, real-time event handling, and integrations with third-party delivery systems.
- Designed the platform for reliability and cross-application integration, supporting consistent performance across projects.

ZaChatSystem (Laravel, Redis, WebSockets)   Backend API Development

- Built a real-time chat backend with high concurrency support, enabling reliable messaging across e-commerce, logistics, and LitePOS platforms.
- Developed API endpoints for integration with third-party systems and internal applications.
- Delivered scalable, event-driven communication features to support customer support and operational coordination.

Freelance Projects

Jetpack Mall (Laravel, Blade, Bootstrap) **Full-Stack E-Commerce Web App**

- Built a production-ready e-commerce platform with authentication, product catalog, cart, checkout, order management, and admin dashboard.
- Designed a secure MVC backend with Eloquent ORM and validations, and delivered a responsive UI deployed on shared hosting via cPanel.

Football Field Renting System (Laravel, Blade) **Full-Stack Web App**

- Developed a booking platform with a user portal for browsing availability and reserving fields, and an admin dashboard for providers to manage listings and schedules.
- Implemented booking workflows, authentication, and permission controls, with a responsive UI and reliable database design for real-world rental operations.

Inventory Management System (Laravel API, Vue 3, PrimeVue) **Full-Stack Web App**

- Built a secure inventory platform with authentication, product and stock management, supplier tracking, and transaction logging, supported by an optimized relational database.
- Developed a responsive admin dashboard and integrated the frontend and backend via RESTful APIs to enable smooth, real-time inventory monitoring and operations.

Skills & Tools

Frontend: HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, Vue.js, Nuxt.js, Vuex, Pinia, React.js, Redux, PrimeVue, Element Plus

Backend: PHP, Node.js, Python, Laravel, Django

Databases: MySQL, MongoDB, PostgreSQL, Redis

Services & Tools: Supabase, Appwrite, VS Code, Postman, GitHub, Netlify, cPanel

Languages

English	**Myanmar**	**Nepali**	**Hindi**
High Proficient	Native Speaker	Native Speaker	High Proficient

Education

Bachelor of Technology — Technological University, Lashio (Dec 2013 – Oct 2018)
Bachelor of Engineering — Technological University, Lashio (Dec 2018 – Dec 2019)

Courses & Certifications

PHP Web Development Bootcamp (Myanmar IT Consulting) **May 2020 – Aug 2020**

JavaScript Fundamental (Udemy) **Aug 2020 – Oct 2020**

The Complete React.js Course (Udemy) **Apr 2024 – Jul 2024**
