Technical Data Sheet

Brilho para Tinta (Coral Gloss Liquid)

Description: The Gloss Liquid is a colourless liquid that provides gloss when applied over matt water-based paints in interior surfaces. However, if the intention is to regulate the level of gloss of a matt paint, mix the Gloss Liquid gradually to the last coat of the paint, for both interiors and exteriors.

Benefits: The Gloss Liquid also provides waterproofing properties to the surface, makes cleaning easier, has low odour and dries fast.

Other tips: The intensity of the gloss is controlled by the quantity of Gloss Liquid mixed to the paint (maximum 70% of Gloss Liquid and 30% of Paint). If applied over White paint, the colour may get slightly yellowish. When applied over coloured paint, the shades may get a litlle bit darker. In order to achieve an even gloss, we recommend to mix it with either Decora Acrylic Matt or Coralatex Acrylic Paint.

Physical-Chemical Properties

Colour: Clear.	**Viscosity:** 70 - 85 UK.
Gloss (@60°): N.A.	**Specific Gravity:** 1,010 - 1,110g/cm^{3}.
Solids (by volume): 38,2 - 42,2%.	**VOC (Volatile Organic Compound):** 22,05g/L.
Solids (by weight): 39,0 - 43,0%.	**Flash Point:** 100º C.

Technical Information

Composition: Modified acrylic resin, aliphatic hydrocarbons, surfactants, thickeners, non-metallic micro-biocides, other additives and water.	**Shelf life:** 24 months. **Packaging:** 3.6L and 18L.
Toxicity: Low.	

Application data

Diluent: Water.	**Dilution:** As a finishing coat: 10 – 20% clean water. As a gloss regulator: 10-15% clean water mixed with the final coat of the paint.
Spreading rate: Up to 45 m^2/gallon 3.6L/coat.	**Number of coats:** As a finishing coat, apply 2 coats over the cured paint, minim 5 days.
Tools: Short-pile woolen roller or soft-bristled brush.	**Cleaning:** Wash tools with soap and water.
Drying time: 1 hour. **Recoat:** 4 hours. **Final:** 4 hours.	**Recommendations:** Avoid applying the paint during rainy days, temperatures below 10ºC or above 40ºC and air humidity above 85%.
