

First Aid Policy

The Company maintains 1 in 50 staff trained in First Aid at Work. This is monitored by the Rail Sentinel Manager, who monitors competency and re-training through the training database.

Where individuals are involved in works of a short duration, or transient worksites, First Aid boxes will be provided within vehicles. It is essential that the contents of the First aid boxes are monitored, and maintained with adequate stock Levels.

If the type of work involves higher than normal risks for staff working on track, a risk assessment will be carried out and a new ratio applied for that specific project.

The Method Statement or Works Package Plan will detail the first aid arrangements on site, although the Company would expect either the Client, or the Principal Contractor on remote sites, to provide adequate facilities.

The need for facilities will be reviewed with any contract that requires a presence on site.

Adequacy of First Aid cover is reviewed regularly at management meetings.

Special consideration will be given to availability of first aid for staff working alone.

This policy and supporting arrangements will be reviewed at least once annually
