

ALIREZA AKBARI

Full-Stack Developer · Next.js / React / Node.js · AI Systems

Istanbul, Türkiye (Remote) · alirezajj118@gmail.com · LinkedIn · inminutes.app

SUMMARY

Full-stack developer with 5+ years building high-performance web and mobile products end to end. Specialized in Next.js, React, TypeScript, and Node.js, with hands-on experience in AI system design and API integration. Currently building InMinutes, an AI website builder I architected and shipped solo — from frontend to backend to live deployment. Equally comfortable owning UI/UX, building APIs, and integrating LLMs into production. Three apps shipped to the App Store.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Dart, Python, HTML/CSS

Frontend: Next.js, React, Flutter, Tailwind CSS, Responsive/Component Architecture, Figma

Backend: Node.js, Express, REST APIs, MongoDB, Authentication, Stripe / PayPal integration

AI / Integrations: LLM API integration, AI agent design, Google Places API, data enrichment pipelines

Practices: Performance optimization, SEO/AEO, CI/CD deployment, conversion analytics, process automation

EXPERIENCE

Founder & Lead Full-Stack Engineer | **InMinutes (Horarium LLC)** *Mar 2026 – Present*

Remote · United States / Istanbul

- Architected and shipped an AI-powered website builder end to end in Next.js, React, and TypeScript — users go from input to a live, multi-page site in under 2 minutes.
- Built the full backend: Node.js APIs, MongoDB data layer, authentication, and a chat-based AI editor that modifies site code in real time from natural-language prompts.
- Integrated Google Places API for live data enrichment (ratings, hours, imagery) and Stripe Express Connect + PayPal for a zero-fee native e-commerce store.
- Drove early traction to 30 sign-ups, 20 generated sites, and first paid conversion; ran conversion teardowns and rebuilt the onboarding funnel after diagnosing a buried call-to-action.
- Implemented analytics and growth instrumentation (TikTok/Meta Pixel in Next.js, MongoDB event guards) to track and optimize the acquisition funnel.

Full-Stack Developer | **NiaTech** *May 2024 – Nov 2024*

Istanbul, Türkiye

- Built modern, high-performance web applications with Next.js and React, owning both UI implementation and backend API development.
- Designed and developed REST APIs and database layers, collaborating with design and product teams to ship production features.
- Focused on application performance, security, and responsive interfaces across the stack.

Frontend Developer | **Dextern** *Jun 2022 – Jan 2024*

Remote · Ireland

- Developed interactive web applications in React.js and cross-platform mobile apps in Flutter.
- Built responsive, accessible UIs and optimized rendering performance, collaborating closely with design and backend teams.
- Delivered WordPress-based dynamic sites for select client projects.

Web Developer | **Zebrit** *Jun 2022 – Nov 2023*

Remote · Ireland

- Built and customized WordPress sites with custom themes and plugins; optimized performance and responsive design.
- Partnered with design and SEO teams to deliver user-friendly, search-optimized experiences.

Web Developer | **49 Tech Hub** *Apr 2021 – Jun 2022*

Istanbul, Türkiye

- Developed custom WordPress themes and plugins and built professional pages with Elementor.
- Optimized site performance and provided ongoing technical support and updates for client projects.

SELECTED PROJECTS

- **InMinutes —** AI website builder (Next.js, React, Node.js, MongoDB, LLM APIs, Stripe). Full product built and deployed solo.
- **CrossCharge, AmUp, 3T Coach —** Three cross-platform mobile apps built in Flutter/Dart and shipped to the Apple App Store.

EDUCATION

M.Eng, Artificial Intelligence & Data Science *Oct 2025 – Oct 2027*

İstanbul Aydın University

B.Sc, Computer Engineering *Jan 2020 – Dec 2024*

İstanbul Aydın University

LANGUAGES & CERTIFICATIONS

Languages: English (Professional), Turkish (Native), Persian (Native)

Certifications: Python for Data Science, AI & Development · Flutter & Dart · Technical Support
