

COMFORT

Due to the use of a cushioned subbase the Herculan TC Pro provides a lot of comfort to the players. It also reduces knee, leg and lower back injuries because of a very good shock absorption in combination with the excellent performance of the toplayer.

MODERN COLORS AND DESIGN

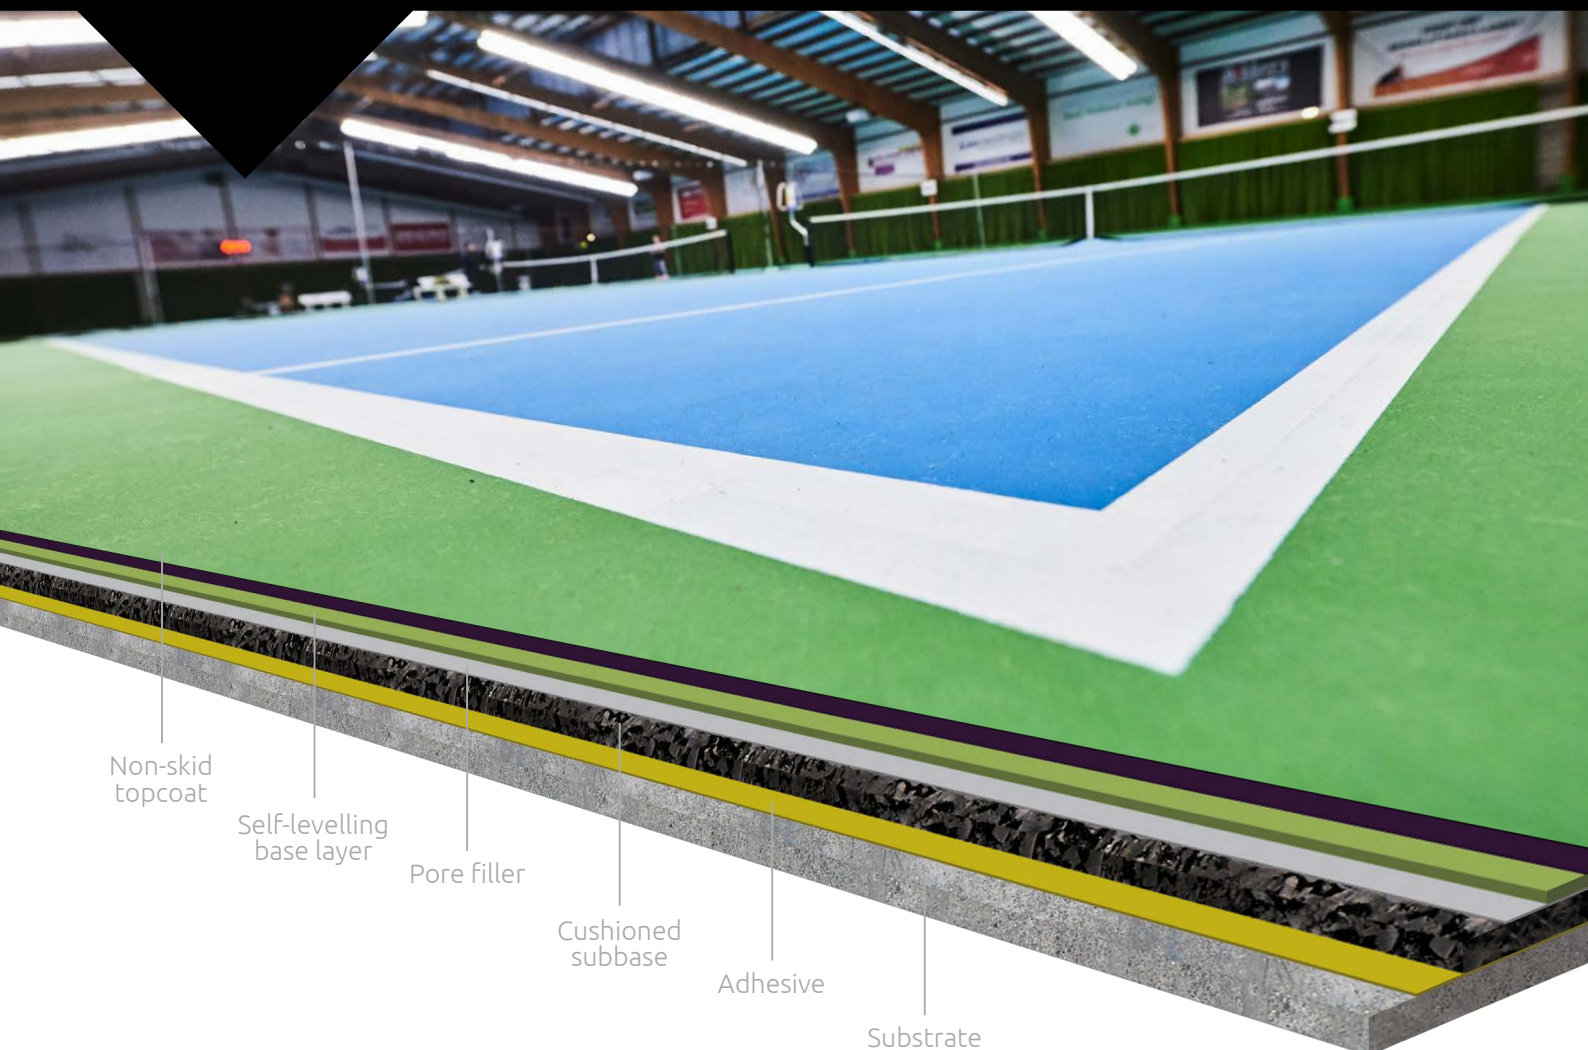

Your Herculan sports floor is not restricted to traditional colours. We offer a range of contemporary and modern colours in the design of your choice. There is also the option to use more than one colour, to give your sportsfloor a completely unique look.

SAFETY AND THE ENVIRONMENT

The Herculan TC Pro meets the German AgBB emissions requirements. This makes the system extremely environmentally friendly and safe to use from the time of installation up to and including first use by the players.

ON TOP OF PRODUCT TECHNOLOGY
