SPGT Special Plastics Grease

SPGT is a synthetic grease offering outstanding low temperature performance and excellent compatibility with thermoplastics, including ABS and Polycarbonate, even at elevated temperatures. SPGT is an efficient mechanical lubricant for plastics both with themselves and with metals.

- Excellent plastics compatibility; suitable for use with sensitive plastics (testing advised)
- Tacky characteristic; high tenacity to stay in contact zone
- Stays where placed even on vertical surfaces; ideal for plastic-plastic lubrication
- · Excellent at holding components in place during assembly

Approvals RoHS Compliant (2015/863/EU): Yes

Directions for Use

Depending on packaging type, this lubricant can be applied by one of the following methods (although this list is not exhaustive):

Manually by way of a syringe Semi-automated using syringe dispensing Fully automated by way of a follower/pusher plate with dispensing system

Typical Product Applications

SPGT has been formulated to ensure compatibility with plastics and metals commonly used in the manufacture of electrical switches. It is particularly recommended as an assembly aid in switch manufacture (montage grease). It is also ideal to reduce wear in timers and other plastic/plastic friction points (e.g. photocopiers).
