Internship/Student Employee in the field of Embedded Hardware Development (m/f/d)
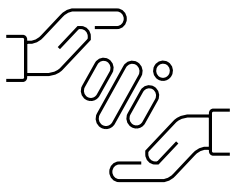

Wirelane

ABOUT WIRELANE

Wirelane is an innovative and future-oriented technology company focused on electromobility solutions. Our great, dynamic and motivated team consists of hardware and software developers, IT and sales experts, project manager and many other creative minds.

We are on a mission: Rock-solid hardware meets smart software to become the market leader in the field of e-mobility.

We offer our employees a warm, family-like atmosphere, public transportation subsidisation, free fruit and soft drinks, regular team-events, participation in training courses and the most exciting challenge to take an active role in shaping the future of our planet.
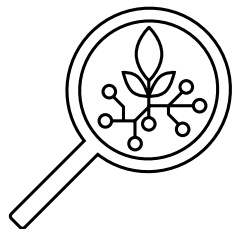

Why not use your skills and talents to build meaningful products?
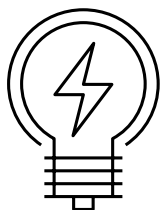

WHAT WE ARE LOOKING FOR

To expand our hardware development team in Saarbrücken and Berlin, we are on the lookout for a passionate and dynamic student with a solid electronic and embedded skillset. If you appreciate to develop electronic circuits, support our hardware development team regarding testing, program microcontrollers (Arduino/ATmega) or embedded Linux systems (Raspberry Pi) in C and Python, then Wirelane is the right place for you

We welcome developers who think outside the box, can transform requirements into technical concepts and do not shy away from responsibility. In return we promise that you will not get bored!

WHAT YOU SHOULD HAVE

• Sound knowledge in analog and digital electronics and embedded systems
• Experience with Linux
• Programming skills in C and Python
• Nice to have: experience with designing and layouting PCBs
• A highly analytical mind-set
• Good knowledge of the German and English language

We are looking forward to receiving your application at ***jobs@wirelane.com****!*
