

Software Developer Internship at GM (First semester 2022)

General Motors (Ireland)

Long Mile Road Works, Long Mile Road Dublin 12

About GM

Are you looking to revolutionize the automotive industry and help make an impact on a global scale? Kick-start your career with a software development internship at our Innovation Centre in Dublin, Ireland. There's never been a more exciting time to work at General Motors!

At General Motors we pride ourselves on designing, building and selling the world's best vehicles. We are seeking a new generation of visionaries to help launch bold engineering and business initiatives, and shape new directions for General Motors.

Job Description

As a software development intern, you will gain experience developing software applications using sound, repeatable, industry best practices, in accordance with GM's software development project methodology.

Under the mentorship of more senior developers, you will work hands-on writing software or solutions, based on detailed requirements and system specifications. Development activities will include updating existing software and/or developing new software solutions to address a specific need or tackle a particular business problem.

The main technologies being used are Java, Angular, Python, React, and SQL among others. You will work in multi-disciplined, full-stack development teams with a mentor assigned individually to you, making sure you can take advantage of significant hands-on training and real-world Enterprise experience.

Responsibilities

- Coding and debugging applications/solutions in one or more software languages, with a focus on software quality and maintainability
- Demonstrate mastery of at least one programming language, tool and/or technology
- Work closely with more expert IT professionals to gain additional knowledge and expertise
- Assists with Application improvements
- Document software solutions and ensure that technical documentation meets GM standards
- Holds themselves and others accountable for demonstrating GMs values and cultural behaviours. Models GM behaviours and builds a winning culture.

Diversity Information

General Motors is committed to being a workplace that is not only free of discrimination, but one that genuinely fosters inclusion and belonging. We strongly believe that workforce diversity creates an environment in which our employees can thrive and develop better products for our customers. We understand and embrace the variety through which people gain experiences whether through professional, personal, educational, or volunteer opportunities.

We encourage interested candidates to review the key responsibilities and qualifications and apply for any positions that match your skills and capabilities.
