

## You have an AI Problem

---

Is your organization struggling to integrate AI capabilities effectively? You find yourself creating integrations that are...

- **Expensive to maintain** - Each integration requires unique development
- **Slow to deploy** - No shared patterns mean longer development cycles
- **Inconsistent with user experience** - Different AI interactions across products
- **Limited in interoperability** - No standard way to integrate with other AI agents

## Make it an AI Opportunity

---

The Model Context Protocol (MCP) is the new standard for AI integration. Companies adopting MCP achieve:

- ✓ **Faster development**  
Standardized patterns across all AI features
- ✓ **Improved user satisfaction**  
Consistent, intelligent interactions with natural language
- ✓ **Future-proofed tech stack**  
Industry-standard approach to AI integration
- ✓ **Enhanced interoperability**  
Standard way to integrate with other agents and services
- ✓ **Competitive advantage**  
Enable your customers to interact with your service from inside their own LLM

## Build your AI-Savvy Team

with [Epic MCP: Go from Scratch to Production](#)

- ★ **Hands-on learning** in 4 workshops, from Beginner to Advanced
- ★ **Build real, working MCP servers during the course**
- ★ **Learn with an industry expert instructor.** Kent C. Dodds has trained tens of thousands of developers.
- ★ **Proven curriculum and custom learning environment**

**Just \$300 (early bird) → [enroll your team today!](#)**
