Mendeley menambahkan info yang hilang secara otomatis

# Web Importer

Menyimpan artikel penelitian ketika browsing secara online

## How it works

1. Drag the "Save To Mendeley" button to your Bookmarks Bar

Can't see your Bookmarks Bar?

2. Find an article

Search for articles in a wide variety of sites, such as those listed below.

3. Click the "Save to Mendeley" bookmark

Click the "Save to Mendeley" bookmark you just created, and the article details will display on the right hand side of the page.

4. Review the details and Save

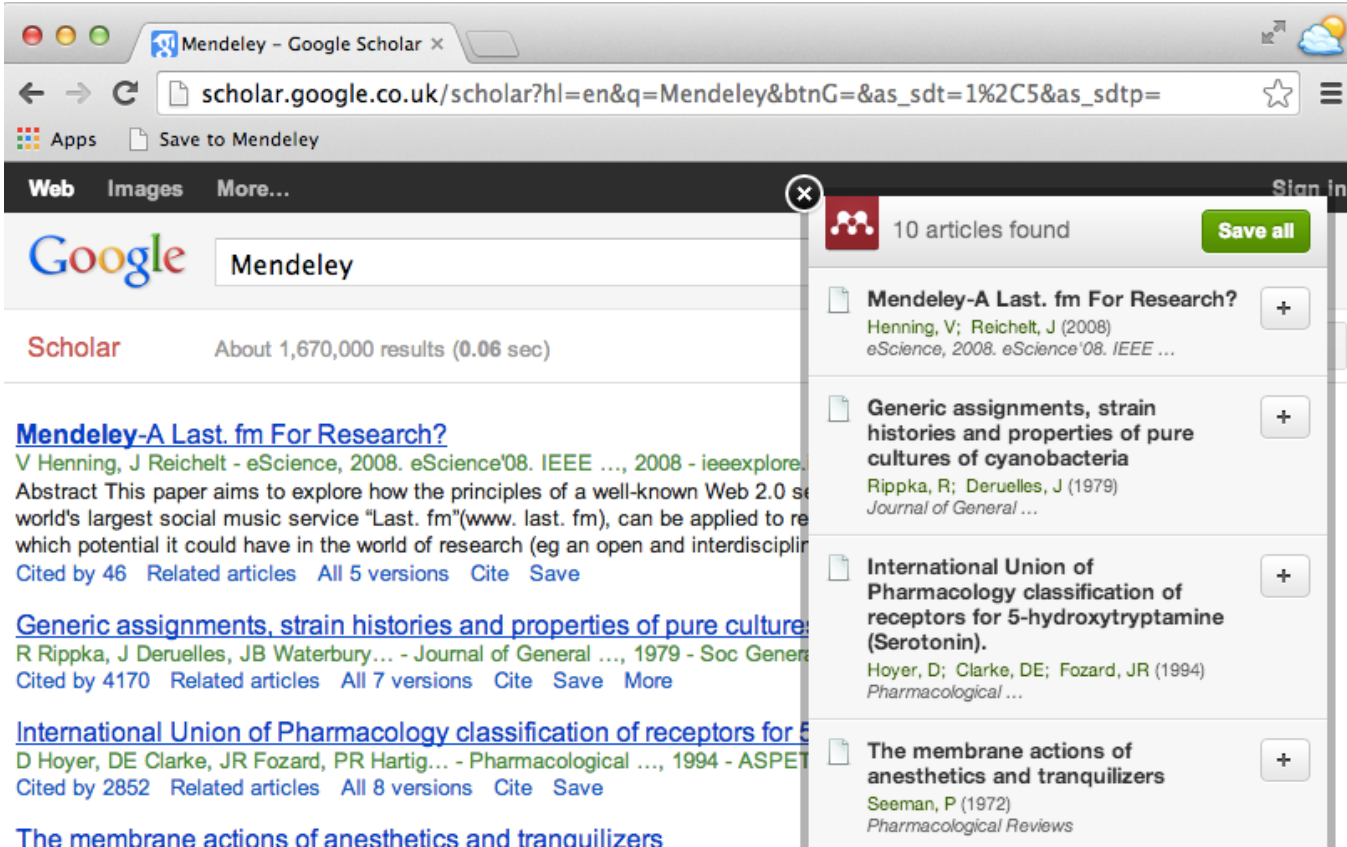

If the details look ok, click the "Save" button.

Next time you sync Mendeley Desktop, any newly saved articles will appear in the "Recently Added" section.

# Menggunakan Web Importer

Klik 'Save to Mendeley' untuk mengimpor referensi hasil pencarian Anda

The screenshot shows a web browser window with the address bar containing the URL: `scholar.google.co.uk/scholar?hl=en&q=Mendeley&btnG=&as_sdt=1%2C5&as_sdtp=`. The browser's address bar includes a 'Save to Mendeley' button. The main content area shows a Google search for 'Mendeley' with 'About 1,670,000 results (0.06 sec)'. The search results include:

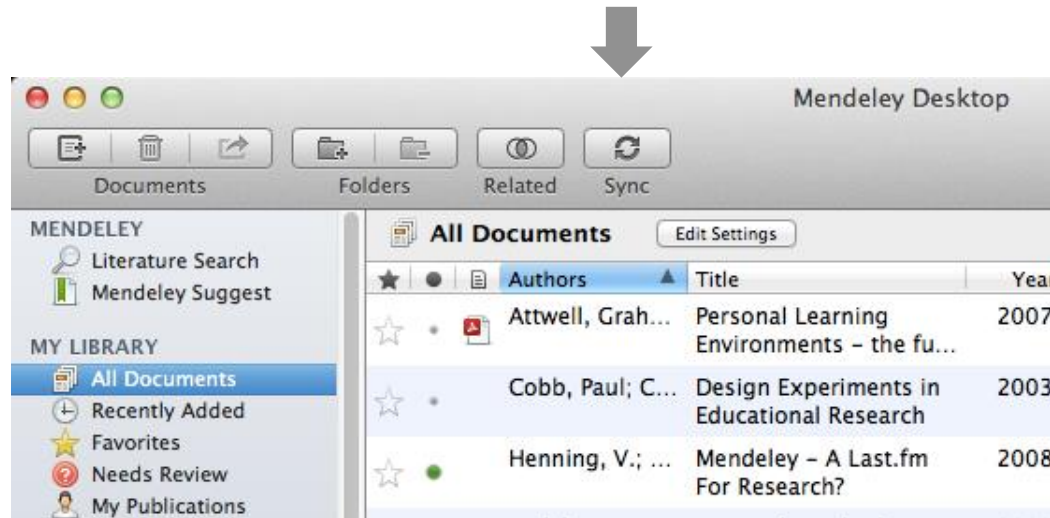

- [Mendeley-A Last. fm For Research?](#) by V Henning, J Reichelt (2008)
- [Generic assignments, strain histories and properties of pure cultures of cyanobacteria](#) by R Rippka, J Deruelles (1979)
- [International Union of Pharmacology classification of receptors for 5-hydroxytryptamine \(Serotonin\)](#) by D Hoyer, DE Clarke, JR Fozard (1994)
- [The membrane actions of anesthetics and tranquilizers](#) by Seeman, P (1972)

A Mendeley web importer overlay is positioned on the right side of the browser window, displaying '10 articles found' and a 'Save all' button. The overlay lists the same four articles as the search results, each with a '+' button next to it.

Pilih sebuah artikel dan impor referensi tersebut ke dalam perpustakaan Anda dalam satu kali klik.

# Sync

Menyelaraskan perpustakaan Anda dengan Mendeley Cloud untuk mengaksesnya dimanapun & membacanya pada berbagai perangkat Anda

OPEN ACCESS Freely available online PLOS BIOLOGY

**Perspective**

## Why Full Open Access Matters

**Michael W. Carroll\***  
American University, Washington, D.C., United States of America

Scientific authors who pay to publish their articles in an open-access publication should be congratulated for doing so. They also should be aware that they may not be getting full open access from some publications that charge for publication under the "open access" label. Two features define an open-access publication: (1) the published contents are freely accessible through the Internet, and (2) readers are given copyright permission (see Box 1) to republish or reuse the content as they like so long as the author and publisher receive proper attribution [1]. Recently, some publications have begun offering an open-access option that charges for Internet publication without granting readers full reuse rights, such as Springer's Open Choice or Nature's Scientific Reports. These publishers have adopted a business model through which authors pay for immediate publication on the Internet but the publisher nonetheless keeps commercial reuse rights for itself. This is not full open access (see Box 2).

Getting open access right matters because the new publishing model is designed to increase the pace and impact of scientific communication through the power of the Internet. Immediate, free publication increases the audience for scientific research and overcomes the increasingly high price barrier to access imposed by the traditional.

is to shift from a model that uses copyright to control reuse of content to one that uses copyright to encourage republication, preservation, and translation.

**Why Support the Open-Access Financial Model?**

Pricing of traditional, subscription-financed scientific journals is highly inefficient. The growth in digital technologies and in digital networks should be driving down the price of access to the scholarly journal literature, but instead prices have increased at a rate greatly in excess of inflation (e.g., [4,5]). Moreover, studies from journal publishing in some disciplines show that commercial journal publishers successfully charge significantly more than non-commercial journal publishers, such as scholarly societies, even when the commercial offerings make less valuable contributions to the progress of science and knowledge as measured by citations (e.g., [6]).

The economic roots of the pricing problem are not difficult to discern. Journal publishers provide a platform between authors of journal articles and their readers. In these situations, the go-between can choose a mix of prices to each side of the relationship, usually charging more to the party that is more dependent on the go-between. The traditional demand is relatively inelastic for two reasons. First, libraries are mission-driven to acquire as broad a swath of the literature as they can afford to serve their patrons effectively. Second, subscriptions for academic journals within a given field are not readily interchangeable, unlike, say, subscriptions to news magazines, because each academic journal publishes unique research. Having their subscribers over a barrel, commercial publishers have steadily consolidated to reduce their costs while increasing profits through uncompetitive pricing [7].

The open-access model fundamentally shifts the balance of power in journal publishing, and thereby greatly enhances the efficiency and efficacy of scientific communication. In its most common form, the model shifts the costs of publication entirely to the author-funder side of the relationship so as to broaden access as far as the Internet reaches and to remove the need for any lingering usage barriers. By shifting the costs of publication entirely to the author-funder side, journals must compete head-to-head on quality and price without diminishing impact through price or usage barriers because authors have greater choice over where to publish than libraries have over whether to subscribe. This increased competition will reduce the overall costs

## Open Access Publishing: What Authors Want

Authors: R. Nariani, L. Fernandez

 View research catalog entry for this paper

Journal: *College & Research Libraries*

Year: 2012

Volume: 73

Issue:

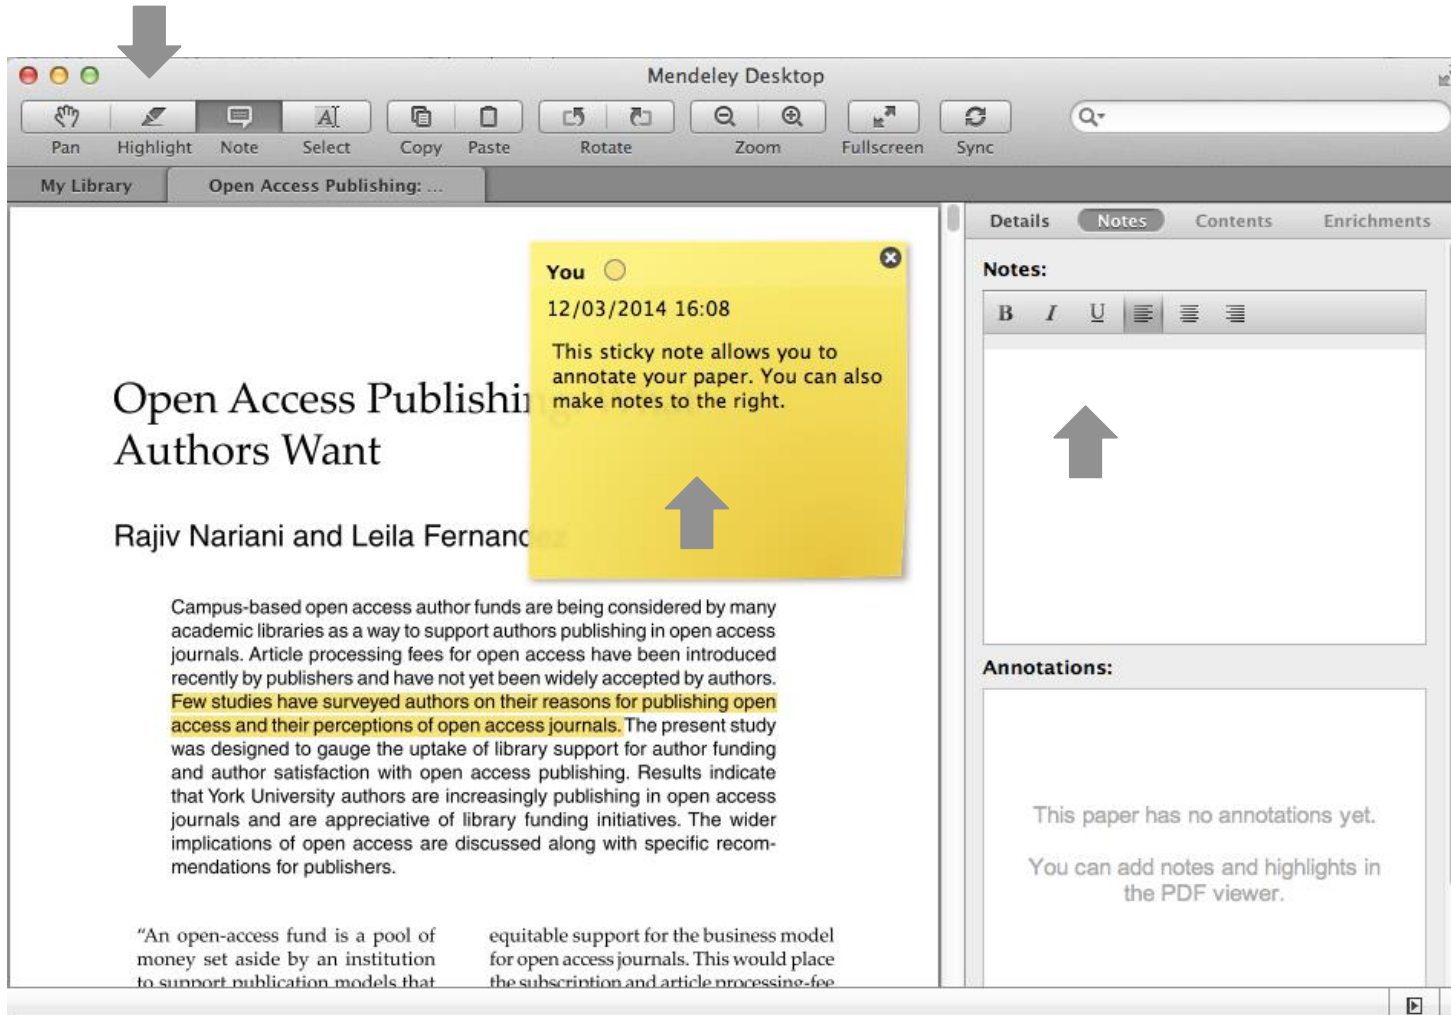

Pages: 182-195

**Abstract:**

Campus-based open access author funds are being considered by many academic libraries as a way to support authors publishing in open access journals. Article processing fees for open access have been introduced recently by publishers and have not yet been widely accepted by authors. Few studies have surveyed authors on their reasons for publishing open access and their perceptions of open access journals. The present study was designed to gauge the uptake of library support for author funding and author satisfaction with open access publishing. Results indicate that York University authors are increasingly publishing in open access journals and are appreciative of library funding initiatives. The wider implications of open access are discussed along with specific recommendations for publishers.

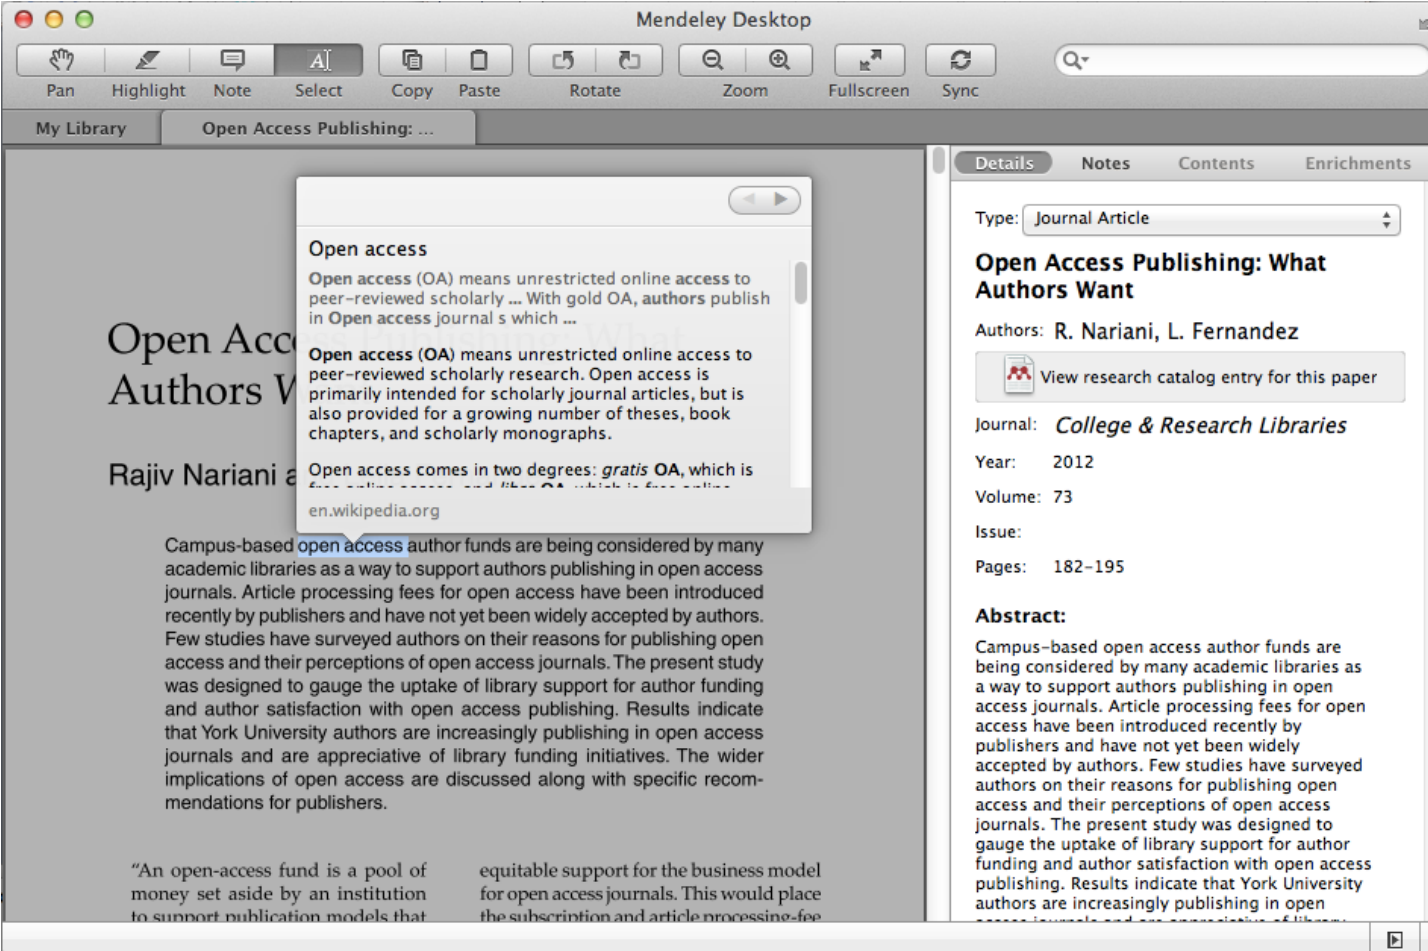

"An open-access fund is a pool of money set aside by an institution to support publication models that equitable support for the business model for open access journals. This would place the subscription and article processing-fee

The screenshot shows the Mendeley Desktop application window. The title bar reads "Mendeley Desktop". The menu bar includes "Pan", "Highlight", "Note", "Select", "Copy", "Paste", "Rotate", "Zoom", "Fullscreen", and "Sync". The main content area displays a document titled "Open Access Publishing Authors Want" by Rajiv Nariani and Leila Fernand. A yellow sticky note is overlaid on the document, containing the text: "You 12/03/2014 16:08 This sticky note allows you to annotate your paper. You can also make notes to the right." The right sidebar shows the "Notes" panel with a text area and a "Notes:" section. Below the text area is an "Annotations:" section with the text: "This paper has no annotations yet. You can add notes and highlights in the PDF viewer." A large grey arrow points from the top of the sticky note to the "Notes:" section in the sidebar.

# Melihat definisi istilah

The screenshot shows the Mendeley Desktop interface. A tooltip is displayed over the text 'Open access' in the article preview, providing a definition: 'Open access (OA) means unrestricted online access to peer-reviewed scholarly research. Open access is primarily intended for scholarly journal articles, but is also provided for a growing number of theses, book chapters, and scholarly monographs. Open access comes in two degrees: *gratis* OA, which is free online access and *libre* OA, which is free online access and the right to reuse the content.' The article entry on the right is titled 'Open Access Publishing: What Authors Want' by R. Nariani and L. Fernandez, published in *College & Research Libraries* in 2012, volume 73, pages 182-195. The abstract text is also visible on the right side of the interface.

### Discipline summary

Biology is the study of life. It attempts to understand the structure, function, processes and evolution of living organisms and how they relate to their environment. Modern biology covers a wide variety of fields and is highly interdisciplinary, drawing on advances in areas such as computer science, mathematics, psychology. Because biology is such a broad subject, it is subdivided according to the ...

# Membuat Profil Penelitian Anda

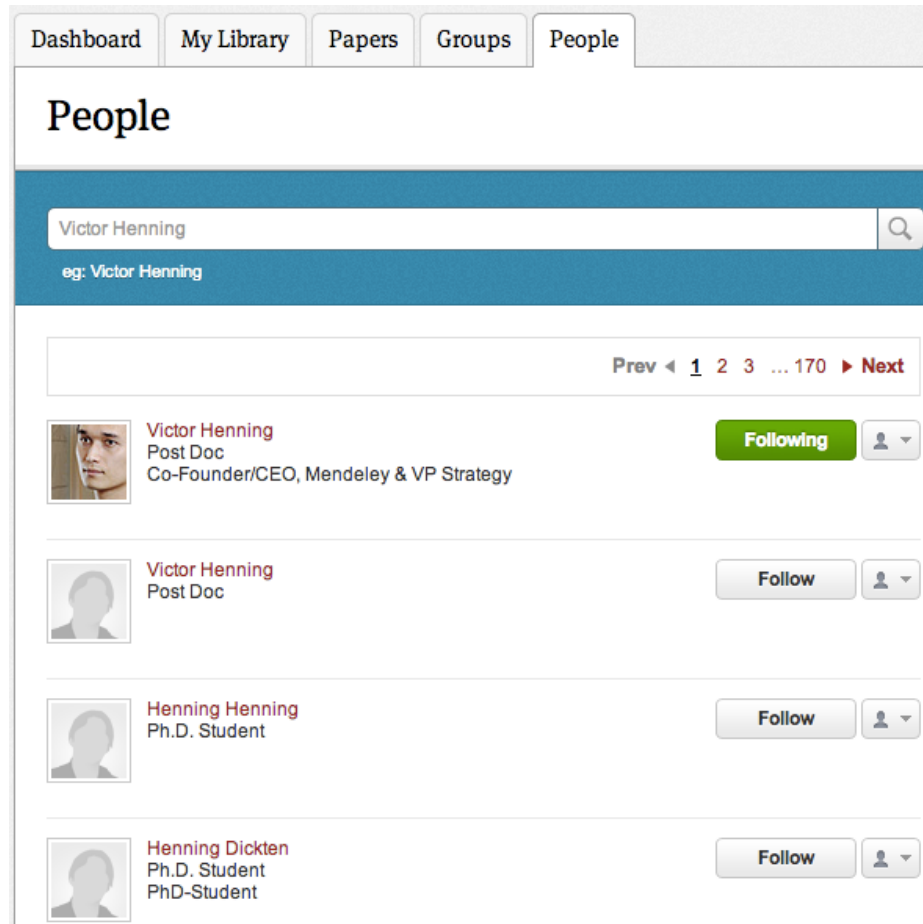

The screenshot shows the Mendeley user profile for Dr. Victor Henning. The interface includes a navigation bar with 'Dashboard', 'My Library', 'Papers', 'Groups', and 'People'. A search bar contains 'jan reichelt'. The profile section features a profile picture, the name 'Dr. Victor Henning', and his title 'Co-Founder/CEO, Mendeley & VP Strategy, Elsevier, Amsterdam, Netherlands'. His research field is 'Psychology - Cognition', with sub-fields: 'Emotions, Decision Making, Theory of Reasoned Action, Intertemporal Choice, Motion Picture Economics'. The profile shows he is 'Following' and has '492 Following' and '494 Followers'. Below the profile, there is a 'Publications' section with a dropdown for 'Journal Article (6)'. The first publication is 'Victor Henning, Thorsten Hennig-Thurau, Stephanie Feiereisen (2012) Giving the Expectancy-Value Model a Heart, 765-781. In *Psychology & Marketing* 29 (10)'. The second is 'Victor Henning (2012) 研究者コミュニケーションを根本から変える文書管理の変革: Mendeley CEOが語る学術情報流通の将来 (Revolution of the reference management tool and its huge potential power to scholarly communications: The future of scholarly communications described by CEO of Mendeley Ltd.), 253-261. In *Journal of Information Processing and Management* 55 (4). <http://japanlinkcenter.org/DN/JST...>. The third is 'Kris Jack, James Hammerton, Dan Harvey et al. (2010) Mendeley's Reply to the DataTEL Challenge, 1-3. In *Procedia Computer Science* 1 (2). [Download PDF \(13.42 KB\)](#)'. The fourth is 'Thorsten Hennig-Thurau, Victor Henning, Henrik Sattler (2007) Consumer File Sharing of Motion Pictures, 1-18. In *Journal of Marketing* 71 (October)'. On the right side, there are sections for 'Public Groups' and 'Institution groups'. Under 'Public groups Victor is a member of', there are: '@MyOpenArchive', 'altmetrics', 'Building a healthier scientific...', 'Creatively named research papers', 'Earthquake and Tsunami', 'Future of Science', 'German-speaking Advisors...', 'Interactive Analog Media', 'Mendeley Publications', and 'Organic User Interfaces'. Under 'Institution groups Victor is a member of', there is 'Elsevier'. Under 'Public groups Victor is following', there are: 'Gravity', 'Mendeley Paper of the Day', and 'Neuro - Big Trends'.

The screenshot shows the Mendeley 'People' page. At the top, there are navigation tabs: Dashboard, My Library, Papers, Groups, and People. Below the tabs is a search bar containing 'Victor Henning' and a search icon. Below the search bar is a list of researchers. The first researcher is Victor Henning, a Post Doc and Co-Founder/CEO of Mendeley & VP Strategy, with a green 'Following' button. The second researcher is Victor Henning, a Post Doc, with a grey 'Follow' button. The third researcher is Henning Henning, a Ph.D. Student, with a grey 'Follow' button. The fourth researcher is Henning Dickten, a Ph.D. Student, with a grey 'Follow' button. At the bottom right, there is a decorative graphic of a molecular structure.

Mencari katalog

The screenshot shows the Mendeley Desktop application window. The title bar reads 'Mendeley Desktop'. The interface is divided into several sections:

- Left Sidebar:** Contains 'MENDELEY' options (Literature Search, Mendeley Suggest), 'MY LIBRARY' (All Documents, Recently Added, Favorites, Needs Review, My Publications, Unsorted, The Lancet, Create Folder...), and 'GROUPS' (Create Group...). Below this is a 'Filter by Authors' dropdown menu with a list of authors including All, Andrews, J.G., Aycock, Mary, Bailey, Charles W., Benson, Philippa J., Björk, Bo Christer, Brody, Tim, Carr, Les, Carroll, Michael W., Chandrasekhar, V., Collins, Maria, Cryer, Emma, and Evans, James A.
- Search Bar:** Located at the top left of the main area, containing the text 'Open Access'.
- Search Results:** A list of search results with checkboxes and download icons. The selected result is 'Why full open access matters' by Michael W. Carroll - 2011 - PLoS Biology.
- Details Panel:** On the right, it shows 'This document is not in your library' with a 'Save PDF' button. Below this, it displays the document's type (Generic), authors (M. Carroll), year (2011), and an abstract: 'This perspective explains the mechanics of copyright and scholarly publishing and warns authors who support open-access publishing about a new pseudo open-access publishing model in which authors pay but publishers still retain commercial reuse rights.'

# Pencarian pada Katalog Online

The screenshot shows the Mendeley Papers search interface. At the top, there are navigation tabs: Dashboard, My Library, Papers (selected), Groups, and People. Below the tabs is a search bar with the text "Search papers..." and a magnifying glass icon. Below the search bar, there is a hint "eg: scientific impact measures" and a link for "Advanced search". Below the search bar, there are two tabs: "Popular" (selected) and "Latest". Below the tabs, there are two search results. The first result is titled "How To Choose a Good Scientific Problem" by Uri Alon in *Molecular Cell* (2009). The abstract text is: "Choosing good problems is essential for being a good scientist. But what is a good problem, and how do you choose one? The subject is not usually discussed explicitly within our profession. Scientists are expected to be smart enough to figure it out...". Below the abstract, there are icons for "Save reference to library" and "Related research", and the number "54,629 readers". The second result is titled "Whitesides' Group: Writing a Paper" by G M Whitesides in *Advanced Materials* (2004). The abstract text is: "Insights into conducting research and the writing of scientific papers are given by Prof. Whitesides in this short essay. The manuscript and its guidelines has been circulated within the Whitesides' research group since 1989." Below the abstract, there are icons for "Save reference to library" and "Related research", and the number "31,758 readers".

# Cara Cepat Menambahkan Penelitian Baru

The screenshot shows the Mendeley web interface for a research article titled "How to choose a good scientific problem." by Uri Alon. The interface includes a navigation menu (Dashboard, My Library, Papers, Groups, People), a search bar, and a main content area with sections for Overview, Related research, and Readership Statistics. Annotations include a green box around the "Save PDF to library" button, a yellow box around the "Look up this article using an OpenURL resolver" link, and a red box around the "Readership Statistics" section.

Jika artikel tersedia secara bebas, hanya satu kali klik untuk menambahkan pada perpustakaan Anda
