TABLE SAW 1700W

This 1700W table saw makes straight and cross cuts in wood. It enables you cleaving and cross-cutting solid wood, laminated wood, as well as chipboard and wood core plywood. The table saw disposes of a large saw table with 2 extenders. You get perfectly sawn wider boards.

You easily adjust the angle and height of the Ø210mm saw blade and the POWX07590 makes very accurate parallel cuts in wood up to 70mm thick and mitre cuts up to 45mm deep. The Powerplus table saw features a solid base frame, which provides extra stability while cutting large pieces of wood at a comfortable working height of 785mm.

The angle and parallel fence hold your workpiece in place for extra accuracy. You can be sure to obtain very precise and smooth cross, mitre and bevel cuts. For safety reasons, the saw is equipped with a protective hood and a push stick. Just connect a dust extractor for an orderly and clean working environment without sawdust.
