

MÎNUT

Smart Home Alarm

Product sheet

Protect your home

Minut is a home security system designed with humans in mind. That means it's easy to use and install. It is also unique in respecting your privacy.

Instant security alerts to your phone

If the unexpected should happen, Minut sends a notification to your preferred device.

Work with your neighbours

Collaborate with your friends, family and neighbours to create the network behind your smart home alarm system.

Recognise other alarms

Minut listens to other alarms in your home and notifies you in case one of them sounds.

Keep a healthy home environment

Track your home environment to ensure that the temperature and humidity remains at a healthy level. Minut notifies you if your home is within the risk zone of developing mould.

Fully Automatic Alarm

Minut knows the last person to leave your home and turns on the alarm automatically if you desire.

Plug and play installation

To install, fasten the magnetic mounting plate in the ceiling and attach Minut. No cables required.

Your home is one tap away

The Minut app allows you to control the alarm, keep track of your home environment, and invite guests—wherever you are.

Specifications

Coverage

One Minut covers a large room, approximately 50 m² (530 ft²). We recommend placing Minut in a central location where motion would be detected should an intrusion occur.

Sensors

- Sound
- Temperature
- Humidity
- Tamper
- Motion
