

## Benefits

- Easy portability: Mini size, portable
- Fast operation
- Accuracy
- Easy one-touch operation
- °C/°F unit exchange
- 2 pin steel probe
- Low battery indication
- Automatic Power-Off feature

## Moisture meter

### Description

It can measure moisture level and the ambient temperature. Drive the probes into the wood, wall or material to be measured. The indication bars indicates the reading.

Digital LCD display

Range of wood: 6 ~ 42%

Range of building material: 0.2 ~ 2.0%

Environment Temperature: 0 ~ 40°C/32 ~ 99°F

Weight: about 50g (including batteries )

Battery: 1.5V, LR44 or equivalent, 4 pieces

### Application

It can be used to measure the moisture level in sawn timber (also cardboard, paper) and hardened materials (plaster, concrete and mortar). It displays the moisture level in the material straightaway. In addition, it can measure the ambient temperature.

### Range

Type	Size mm (W×L×T)	Ref. No.
Moisture meter	80x40x20	IMT23008
