LEDML-96-36VTR-WH

### Description

#### Product description

Our Mesh Lite® is a low voltage product. The light mesh is available in two sizes - 2m x 1m, and 2m x 4m. According to the model chosen, either 96 or 200 patented points of LED light shine out. By means of the patented Quick-Fix® system, several segments may be connected together without problems. The power supply for all the 36V products to be connected is provided by a central transformer. The number of light meshes that can be connected up is governed by the rating of the chosen transformer.

#### Decoration solutions

Due to the "honeycomb" pattern of Mesh Lites®, the points of light appear symmetrical. This creates a calm, regular and elegant effect. Mesh Lite®, the professional choice for light nets, offers a range of decoration solutions: the light net can easily be wrapped around columns, shrubs and bushes, and, when mounted above corridors and paths, creates a starry sky effect. The LEDs are available in the colors brilliant white and warm white.
