SUPER ROD

Chain & Magnet

SPECIFICATION

Product Name	Chain & Magnet
Item Code	CRCM
Length	480mm (chain fully extended)
Attachments	N/A

CONTENTS

1 x Chain
1 x Magnet

ABOUT

The chain and magnet combination is a simple but effective method for routing cable. Simply screw the chain onto the end of your rod and place into the void you wish to route through. Next, take the Super Magnet and screw it onto the other rod. Finally, using your final access point (ie plug socket, floor board etc) fish inside the void until the magnet comes into contact with the chain and draw the rod through.

APPLICATION

• Route • Retrieve
