Safety information

Important information

Read these instructions carefully and look at the equipment to become familiar with the device before trying to install, operate, service, or maintain it. The following special messages may appear throughout this manual or on the equipment to warn of potential hazards or to call attention to information that clarifies or simplifies a procedure.

The addition of either symbol to a “Danger” or “Warning” safety label indicates that an electrical hazard exists which will result in personal injury if the instructions are not followed.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that accompany this symbol to avoid possible injury or death.

DANGER

DANGER indicates a hazardous situation which, if not avoided, **will result in** death or serious injury.

Failure to follow these instructions will result in death or serious injury.

WARNING

WARNING indicates a hazardous situation which, if not avoided, **could result in** death or serious injury.

CAUTION

CAUTION indicates a hazardous situation which, if not avoided, **could result in** minor or moderate injury.

NOTICE

NOTICE is used to address practices not related to physical injury.

PowerTag Energy

* Monoconnect series
+ Flex series

For your safety

⚡ ⚠ DANGER

HAZARD OF ELECTRIC SHOCK, EXPLOSION, OR ARC FLASH

Safe electrical installation must be carried out only by qualified electrical personnel. Qualified electrical personnel must prove profound knowledge in the following areas:

- Connecting to installation networks
- Connecting several electrical devices
- Laying electrical cables
- Safety standards, local wiring rules, and regulations

Failure to follow these instructions will result in death or serious injury.

About the device

PowerTag E (hereinafter referred as PowerTag) is a compact, robust, and easy-to-install wireless communication energy sensor. It is used together with the **Gateway/Hub** to collect information from every equipped circuit to identify the energy consumption of each connected load. It is designed specifically to manage energy consumption for new and existing residential installations. It monitors and measures energy and power in real-time, and also provides complete visibility of power transfer between power source and loads.

Features of PowerTag:

- Easily mounted with top or bottom position directly on circuit breaker.
- Measures energy consumption and real-time power.
- Sends real-time notifications and alarms to the Wiser app in case of consumption limit set by user in automation exceeds.

Benefits of PowerTag:

- Easy accessibility and fastest installation.
- Energy Class 1: accurate measurement.
- Compact and cost effective.

Installing the device

It is recommended to install the PowerTag within 3 meters of the **Gateway/Hub** for best results. This provides good network signal strength and helps to prevent online/offline issues, which might result in corrupt data. Refer to the installation instruction supplied with this product.

Instruction manual links:

- [PowerTag Resi9 F63](#)

Supported mounting positions

Mounting position	PowerTag Energy	Model number
Primary models		
Top or Bottom	PowerTag Energy R9 M63 3P	R9M40
Top or Bottom	PowerTag Energy R9 F63 1PN	R9M60
Top or Bottom	PowerTag Energy R9 F63 3PN	R9M70
Other models		
Top or Bottom	PowerTag Energy R9 M63 1P	R9M20
Top	PowerTag Energy R9 M63 1PN	R9M21
Bottom	PowerTag Energy R9 M63 1PN	R9M22
Top	PowerTag Energy R9 M63 3PN	R9M41
Bottom	PowerTag Energy R9 M63 3PN	R9M42
Top or Bottom	PowerTag Energy R9 M63 3P 230V LL	R9M43

Pairing the device

Pair your PowerTag with the **Gateway/Hub** to access and control the PowerTag using the Wiser app.

- We recommend to configure your main PowerTag as **Grid** on the main incomer of the house. This helps to record the overall consumption.

NOTE:

- **Grid:** main supply (referred as **Grid** in the app) of the house.
- **Load:** power consumed from the Grid or a production source by electrical devices such as light, water heater, and fridge.
- If you have more than one PowerTag installed, it is recommended to pair the main PowerTag first and set it as Grid. Refer to *Setting PowerTag as Grid*, page 11 and then pair the additional PowerTag.

NOTE:

- Main PowerTag is connected to the Grid.
- Additional PowerTag are connected to the loads.

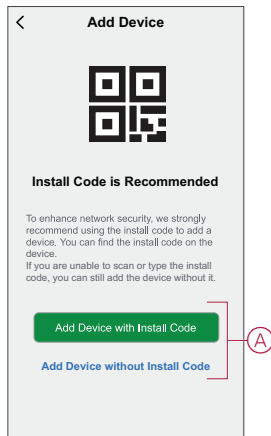

IMPORTANT: PowerTag must be installed by qualified professional.

Pairing device manually

To pair the device manually:

- On the **Home** page, tap **+**.
- Tap , select the required **Wiser Hub** on the slide-up menu.

3. Select an option to add the device (A):
 - **Add Device with Install Code**
 - **Add Device without Install Code**

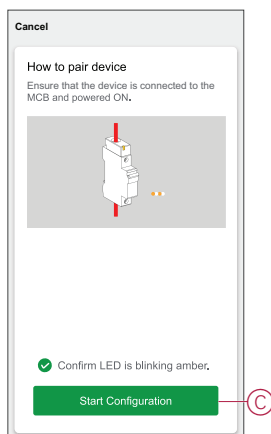

TIP: It is highly recommended to add the device with install code.

4. To pair the device with install code, tap **Add Device with Install Code** to display the slide-up menu. Select any one of the options (B):
 - **Scan Install Code** - you can scan the device for the install code. Position your camera to scan the QR code or barcode available on the PowerTag.
 - **Enter Install Code Manually** - you can manually enter the install code on the device.

After adding the device with Install Code, proceed to **Step 6**.

5. To pair the device without install code, tap **Add Device without Install Code**.
6. Select **Confirm LED is blinking amber > Start Configuration** (C).

NOTE: PowerTag must be connected to the MCB and powered ON.

Wait for a few minutes for the app to connect with your PowerTag.

On successful pairing, PowerTag will appear on the home screen.

Pairing device with auto scan

Pairing the device with auto scan automatically discovers the device when the corresponding device is powered on.

To pair the device:

1. On the **Home** page, tap **+**.
2. Tap **Auto scan** and then tap **Confirm**.
3. If you have one hub proceed with step 5, if you have multiple hubs proceed with step 4.
4. Tap **Select hub** and select the **Wiser Hub** from the slide-up menu.
5. Tap **Next** and select **PowerTag**.

6. Tap **Done** once all **PowerTag** are paired successfully.

NOTE: Tap  to rename the PowerTag.

Configuring the device

Setting PowerTag as Grid

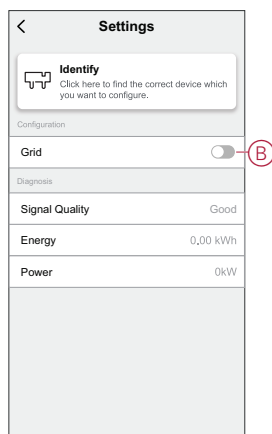

It is mandatory to configure the main PowerTag as **Grid** on the main in-comer of the house. This helps to record the overall consumption and to display recorded data in **Energy Dashboard** tab.

To set the PowerTag as Grid:

1. On the **Home** page, select the **PowerTag** which you want to set as Grid.
2. Tap **Settings** (A).

3. Enable the toggle switch (B) to set the PowerTag as **Grid**.

Once PowerTag is set as **Grid**, you can see the **Energy Dashboard** option on the **Home** page.

Tariff information

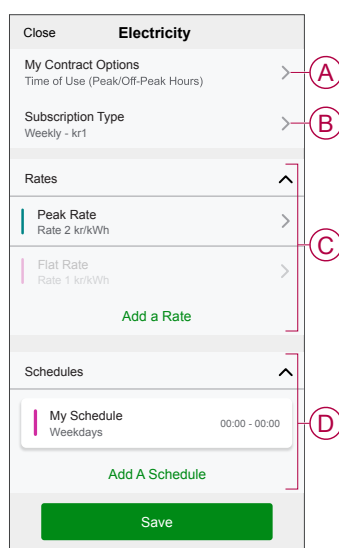

You can view and update tariff information in the Wiser app to access your energy cost and billing data.

To access tariff information:

1. Tap  on the home page.
2. Select **Home Management** and select your home where the energy device is installed, to view **Home Settings**.
3. On Home Settings page, select **Tariff > Electricity**.

You can view and update the following in electricity menu:

- A. **Contract options**, page 13
- B. **Subscription type**, page 14
- C. Rates, page 14
- D. Schedules, page 16 (Only available for time of use contract option)

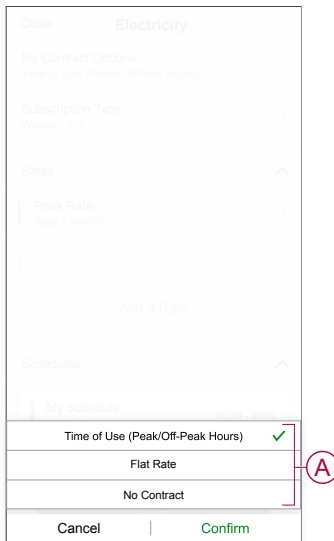

4. Once all the settings are updated, tap **Save**.

Setting contract options

You can update flat and peak rate based on your contract option in the Wiser app.

1. Tap **My Contract Options** on Electricity page.
2. In the slide-up menu, select any one of the following (A):
 - **Time of Use (Peak/Off-Peak Hours)**: rate set to a specific period of time at which consumption is at its highest. It is the amount you pay for each unit of electricity consumed for the time period set.
 - **Flat Rate**: fixed rate for the entire time period of electricity consumption.
 - **No Contract**: electricity rate is not set, no information related to bill will be shown in the app.

NOTE: By default, **No Contract** option is set.

3. After selecting an option, tap **Confirm**.

Setting subscription type

Based on your electricity subscription, you can update subscription period and price in the Wiser app.

1. Tap **Subscription Type** on Electricity page.
2. Select the subscription period (A).
 - **Yearly**
 - **Monthly**
 - **Weekly**
 - **Daily**
3. Enter **Subscription Price** (B).

The screenshot shows the 'Subscription types' screen. At the top, there is a back arrow, the title 'Subscription types', and a 'Set' button. Below the title is a list of subscription options: 'Yearly', 'Monthly', 'Weekly' (which has a green checkmark), and 'Daily'. A red bracket labeled 'A' is positioned to the right of this list. Below the list is a section titled 'Subscription Price (kr)' with a text input field containing the number '1'. A red circle labeled 'B' is positioned to the right of this input field.

4. Tap **Set**.

Adding tariff rate

You can add flat and peak rate value in the Wiser app.

1. Tap **Add a Rate** on Electricity page.
2. Enter name and rate per kWh (A).

3. Tap **Add** (B).

The screenshot shows a mobile application screen titled "Add a Rate". At the top left is a back arrow icon. Below the title, there is a "Rate" label and a text input field. Below that is a label "Rate - kr/kWh" and another text input field. A red bracket labeled "A" encompasses both input fields. At the bottom of the screen is a green button labeled "Add", with a red line and a circle labeled "B" pointing to it.

NOTE: Flat rate should be lower than peak rate.

Adding schedule to tariff rate

You should add a scheduled time period for which a tariff rate will be active.

1. Tap **Add A Schedule** on electricity page.
2. Enter a schedule **Name** (A).
3. Select the number of **Days** (B).
4. Tap **Start Time** and **Finish Time** to set the time period (C).
5. Tap **Rate** (D) and select the type of rate (Flat or Peak rate).
6. Tap **Add** (E) to save the schedule.

Checking currency type

You can view the currency type in the Wiser app.

NOTE: Default currency is set based on the home location.

To view currency type:

1. Tap  on the home page.
2. Select **Home Management** and select your home where the energy device is installed, to view **Home Settings**.
3. On Home Settings page, you can view the currency type.

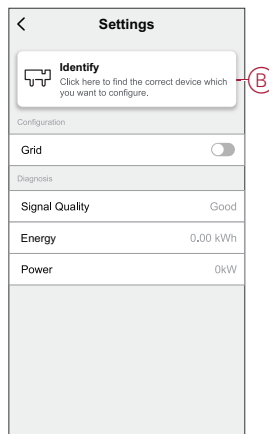

Following currency are available based on home location:

- **Kr NOK:** Norway
- **Kr SEK:** Sweden
- **Kr DKK:** Denmark
- **€ EUR:** Finland and Spain
- **Ft HUF:** Hungary
- **£ LE:** Egypt

Identifying the device

Using the Wiser app, you can identify the device.
To identify the PowerTag :

1. On the **Home** page, select the desired PowerTag from the list of available devices.
2. Tap **Settings** (A) and then tap **Identify** (B).

3. Tap **OK** on the pop-up notification panel when the PowerTag is identified.
NOTE: The green LED on the identified PowerTag blinks for 30 s.

Changing the device icon

You can change the device icon using the Wiser app.

1. On the **Home** page, select the device for which you wish to change the icon.
2. At the top-right corner of the screen, tap  .
3. Tap edit  next to the device name.
4. Tap **Icon** to view the menu.

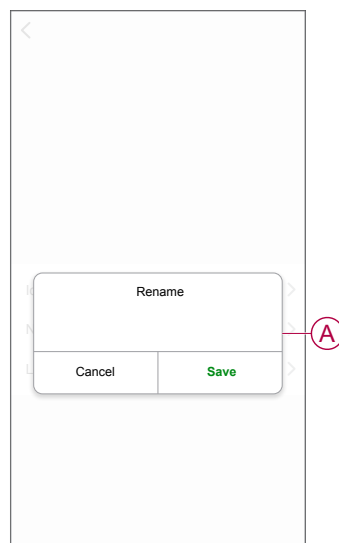

5. In the slide-up menu, select any one of the following (A) to change the device icon:
- **Take photo** - allows you to click a photo from the mobile camera.
 - **Select from Icon Library** - allows you to select an icon from the app library.
 - **Select from Album** - allows you to select a photo from the mobile gallery.

Renaming the device

You can rename the device using the Wisier app.

1. On the **Home** page, select the device for which you wish to rename.
2. At the top-right corner of the screen, tap .
3. Tap edit  next to the device name.
4. Tap **Name**, enter the new name (A) and then tap **Save**.

Personalized Energy Insights

NOTE:

- Personalized Energy Insights is available only in Sweden.
- This feature will be available after 30 days from setting the grid.

Personalized Energy Insights is an energy management feature dedicated to monitor the way we use energy in our everyday life. This feature estimates energy consumption of a household purely based on data from their utility.

This makes it possible to follow the consumed energy over time and calculate a load/energy consumption and provides you with the following personalized energy insights:

- comparison of energy consumption with similar homes
- breakdown of energy consumption
- energy saving tips

Enabling Personalized Energy Insights

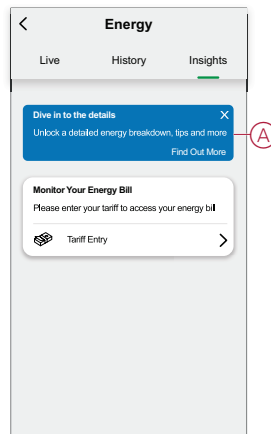

Using the Wiser app you can enable Personalized Energy Insights to monitor the energy breakdown, and comparison between similar homes and also view energy-saving tips.

NOTE: To enable Personalized Energy Insights you must meet the following conditions:

- User should be registered in the Europe data center.
- Users home location must be Sweden.
- One PowerTag should be configured as Grid (main incomer).
- User should have minimum 30 days of load consumption data.

To enable Personalized Energy Insights:

1. On the **Home** page, tap **Energy Dashboard > Insights**, then tap **splash screen (A)**.

NOTE: Do not accidentally close the splash screen as it takes 3 weeks for this option to reappear, until that you cannot enable Personalized Energy Insights.

2. Read the tutorial information and tap **Next** twice, then tap **Unlock Personalized Energy Insights**.
3. Read the privacy notice and tap **Activate** on each page.

NOTE: Accepting consent is optional.

- Once Personalized Energy Insights is successfully enabled, you will receive an in-app notification and then immediately you will be prompted to create a home profile. Refer [Creating home profile](#), page 20.

NOTE: You can also navigate through in-app notification which is received after enabling Personalized Energy Insights by tapping .

Creating/updating home profile

User must create a home profile to compare the energy consumption with similar home profiles and also to get the energy usage breakdown based on categories like heating, cooking, lighting, washing etc.

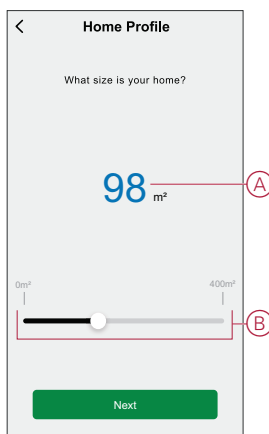

To create home profile:

- On the **Home Profile** page tap **Continue**.
- Select the type of home and tap **Next**:
 - **House**
 - **Apartment**
 - **Semi-detached**
 - **Holiday Home**
 - **Other**

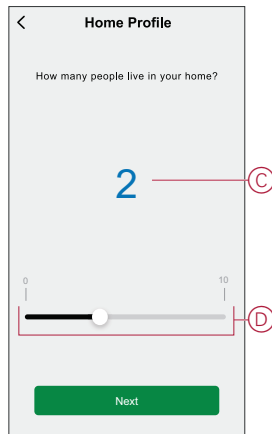

NOTE: Based on the type of home step 4 to step 12 may differ.

- Set the size of your home either by tapping (A) or using the sliding bar (B).

NOTE: Maximum home size can be 400 sq m.

4. Set the number of people living in the home either by tapping (C) or using the sliding bar (D).

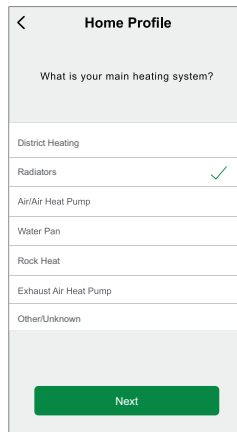

The screenshot shows a mobile app interface titled "Home Profile". The question is "How many people live in your home?". The answer "2" is displayed in a large blue font. Below the number is a horizontal sliding bar with a white dot at the position of 2. The bar is labeled with "0" on the left and "10" on the right. A green "Next" button is located at the bottom of the screen. Red circles with letters "C" and "D" are placed next to the number and the sliding bar respectively, indicating the two methods for setting the value.

NOTE: Maximum 10 people can be added.

5. Select the main heating system and tap **Next**:

- **District Heating**
- **Radiators**
- **Air/Air Heat Pump**
- **Water Pan**
- **Rock Heat**
- **Exhaust Air Heat Pump**
- **Other/Unknown**

The screenshot shows a mobile app interface titled "Home Profile". The question is "What is your main heating system?". Below the question is a list of seven options: "District Heating", "Radiators", "Air/Air Heat Pump", "Water Pan", "Rock Heat", "Exhaust Air Heat Pump", and "Other/Unknown". The "Radiators" option is selected, indicated by a green checkmark. A green "Next" button is located at the bottom of the screen.

6. Select the applicable secondary heating systems and tap **Next**:

- Radiators
- District Heating
- Air/Air Heat Pump
- Air Water Heat Pump
- Water Pan
- Rock Heat
- Exhaust Air Heat Pump
- Floor Heat
- Other / Unknown

The screenshot shows a mobile application interface titled "Home Profile". Below the title is a question: "What is your other heating system?". A list of options is displayed, each with a checkmark icon to its right. The options are: Radiators, District Heating (which has a green checkmark), Air/Air Heat Pump, Air Water Heat Pump, Water Pan, Rock Heat, Exhaust Air Heat Pump, Floor Heat, and Other/Unknown. At the bottom of the screen is a green button labeled "Next".

7. Select the type of hot water system and tap **Next**:

- Hot Water Tank
- Air/Air Heat Pump
- Air Water Heat Pump
- Rock Heat
- District Heating
- Other / Unknown

The screenshot shows a mobile application interface titled "Home Profile". Below the title is a question: "What hot water system do you have?". A list of options is displayed, each with a checkmark icon to its right. The options are: Hot Water Tank, Air/Air Heat Pump (which has a green checkmark), Air Water Heat Pump, Rock Heat, District Heating, and Other/Unknown. At the bottom of the screen is a green button labeled "Next".

8. Select the appliances used to cook and tap **Next**:

- **Gas Stoves**
- **Gas Ovens**
- **Electric Stoves**
- **Electric Ovens**
- **Microwaves**

NOTE:

- By default it will be 0, use +/- to set the number.
- Maximum of 5 individual appliances can be added.

9. Select the appliances in your home and tap **Next**:

- **Washing Machines**
- **Dishwashers**
- **Dryers**
- **TVs**
- **Game Consoles**
- **Laptops**
- **Stationary Computers**

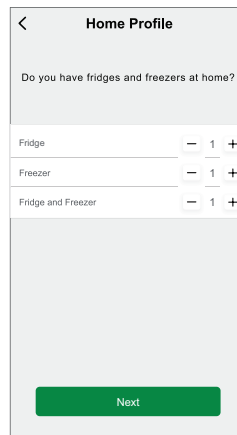

NOTE: Maximum 5 individual appliances can be added.

10. Select the fridges and freezers from the list:

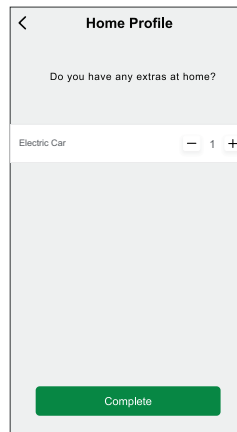

- **Fridge**
- **Freezer**
- **Fridge and Freezer**

NOTE: Maximum 5 individual appliances can be added.

The screenshot shows a mobile app interface titled "Home Profile". At the top, there is a back arrow and the title. Below the title, the question "Do you have fridges and freezers at home?" is displayed. Underneath, there are three rows, each with a text input field and a numeric counter set to "1". The rows are labeled "Fridge", "Freezer", and "Fridge and Freezer". At the bottom of the screen, there is a green button labeled "Next".

11. Select the number of Electric cars, tap **Complete** and then tap **Done**.

The screenshot shows a mobile app interface titled "Home Profile". At the top, there is a back arrow and the title. Below the title, the question "Do you have any extras at home?" is displayed. Underneath, there is one row with a text input field labeled "Electric Car" and a numeric counter set to "1". At the bottom of the screen, there is a green button labeled "Complete".

NOTE: To update the home profile, on the **Home** page, tap **Energy Dashboard > Insights > Update my home profile**, follow from step 2.

Checking Grid energy consumption

Using the Wiser app, you can monitor the live and history data of the PowerTag as well as statistical analysis and comparison of energy consumption with similar homes.

- **Live:** provides live data of the Grid energy consumption.
- **History:** provides history of power consumed over the required duration (hours, days, months and years).
- **Insights:** provides annual bill for the tariff set, comparison of energy consumption with similar homes and information on energy savings.

Live

Using the Wiser app, you can view the live energy consumption. To view live data, on **Home** page, tap **Energy Dashboard > Live**.

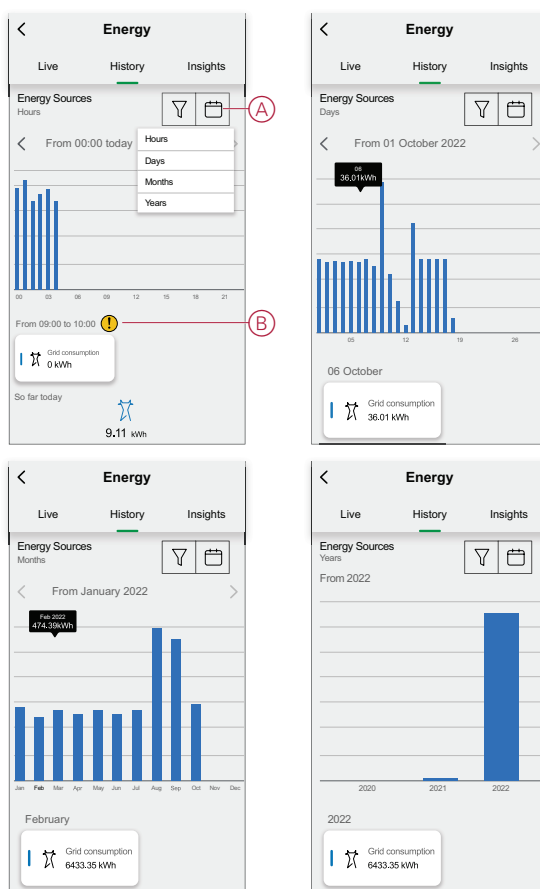

History

Using the Wiser app, you can monitor the energy consumption by accessing the history.

History of energy consumption:

1. On **Home** page, tap **Energy Dashboard > History**.
2. On the **History** page, select a required time frame (A):
 - **Hours:** to view the hourly consumption.
 - **Days:** to view the daily consumption.
 - **Months:** to view the monthly consumption.
 - **Years:** to view the yearly consumption.

NOTE: ⚠️ (B) indicates the missing data for a specific duration, when the PowerTag was offline/disconnected.

NOTE: Tap on the required hour/day/month/year in the bar graph to view the energy consumption.

History of load consumption:

NOTE: This feature is available once Eliq is enabled.

1. On the **History** page, tap  and select **Load consumption**.
2. Tap (A) and select a required time frame:
 - **Months:** to view the monthly consumption.
 - **Years:** to view the yearly consumption.

TIP: Select the desired load, for example Washing, Cooking etc. to view the load consumption data.

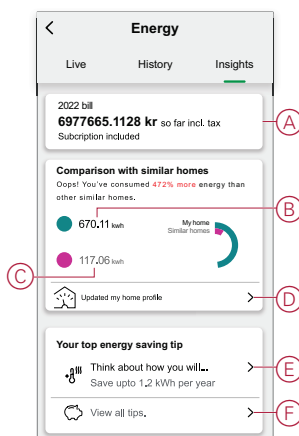

NOTE: Select the required month/year in the bar graph to view the respective breakdown.

Insights

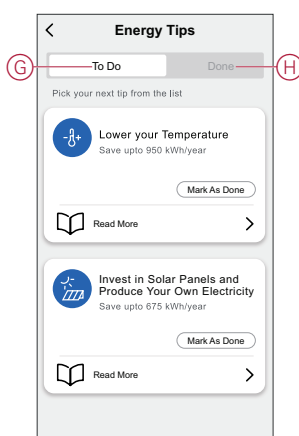

Using the Wiser app, you can check the annual bill for a specific tariff for all users. Compare energy consumption with similar homes and energy saving tips for Eliq users.

To view insights:

1. On **Home** page, tap **Energy Dashboard > Insights**.
2. On the **Insights** page, you can see the following:
 - Annual bill as per the tariff set (A).
 - Comparison of energy consumption with similar homes.
 - ● (B) indicates energy consumption of your home.
 - ● (C) indicates energy consumption of similar homes.
 - Update home profile, page 20 (D).
 - Energy saving tips (E).
 - List of additional tips to save energy (F).

3. Tap (F), to **View all tips**.
 - **To Do (G)**: list of tips to save energy.
 - **Done (H)**: list of completed tips.

TIP:

- Tap on **Read more** to view the detailed information regarding the tip and also the estimated savings per year.
- Once the tip on **To Do** tab has been implemented, tap **Mark As Done**. The tip will now appear in **Done (H)** tab.

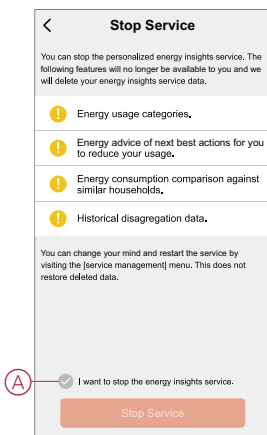

Disabling Personalized Energy Insights

To disable/stop Personalized Energy Insights services:

1. Tap  on the home page.
2. Select **More Services** >  and select the homes for which you want to disable Personalized Energy Insights service.

NOTE: You can select multiple homes at a time.

3. Read the information and tap  (A), then tap **Stop Service**.

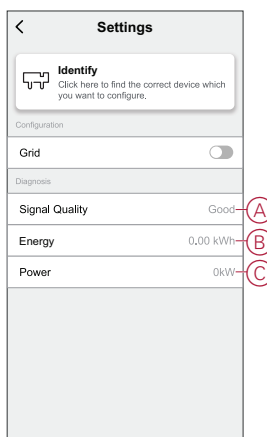

Using the device

Identifying the signal strength

The signal strength is an indicator of the wireless range that is received by the device.

To check the signal strength:

1. On the **Home** page, select the **PowerTag** for which you want to check the signal strength.
2. Tap **Settings**, in the Diagnosis section you can see the following:
 - **Signal Quality (A)**: the signal strength is an indicator of the wireless signal that is received by the device.
 - **Energy (B)**: total energy consumed by PowerTag in kWh.
 - **Power (C)**: instant power consumed by PowerTag in kW.

Checking individual device history

1. On the **Home** page, tap **All devices** and select PowerTag.
2. Tap **History (A)**.

3. In the **History** window, select required time frame:

- **Day:** to view the daily consumption.
- NOTE:** Hourly information is only available for last 7 days.
- **Week:** to view the weekly consumption.
- **Month:** to view the monthly consumption.
- **Year:** to view the yearly consumption.

NOTE: Select the required day/week/month/year in the bar graph to view the energy consumption.

Creating an automation

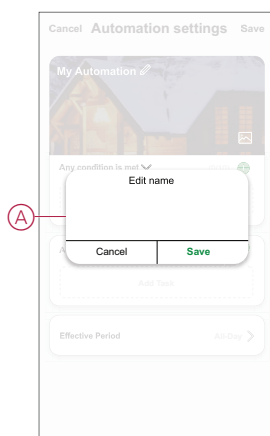

An automation allows you to group multiple actions that are usually done together, triggered automatically or at scheduled times. By using the Wiser app, you can create automations based on your needs.

NOTE: Automation is only possible with the PowerTag assigned as Grid.

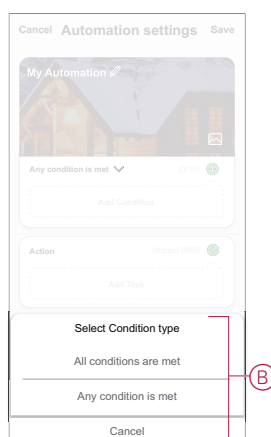

To create an automation:

1. On the **Home** page, tap on .
2. Go to **Automation** > **+** to create an automation.
3. Tap **Edit Name** , enter the name of the automation (A) and tap **Save**.

TIP: You can choose the cover image that represents your automation by tapping .

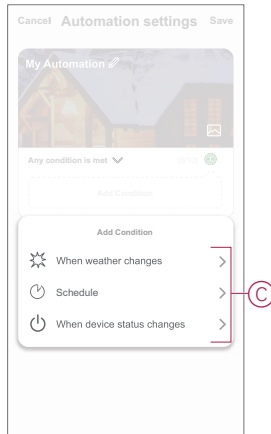

4. Tap **Any condition is met** to select any one of the condition type (B):
 - **All conditions are met:** the automation is triggered when all the conditions are met.
 - **Any condition is met:** the automation is triggered when at least one condition is met.

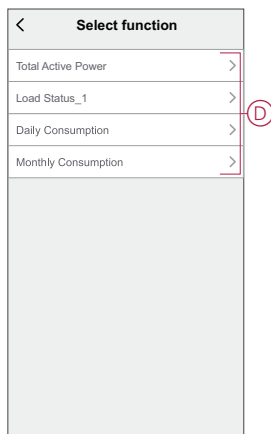

5. Tap **Add Condition** to display the slide-up menu.

6. In the **Add Condition** menu, you can do either or all of the following options (C):
 - **When weather changes:** select various weather settings.
 - **Schedule:** set the time and day.
 - **When device status changes:** select the device and its function.

NOTE: You can add one or more conditions using .

7. Tap **When device status changes > Grid** and select any of the following function (D):

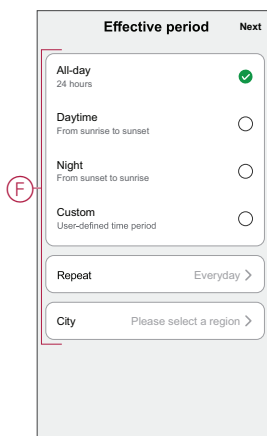

- **Total Active Power:** to set the real-time energy consumption (kW).
 - **Load Status:** to set the total load consumption:
 - For the PowerTag as Grid, you can set **Load On** or **Load Off**.
 - For the PowerTag other than Grid, you can set **Load>9W** or **Load<=9W**.
 - **Daily Consumption:** to set the daily energy consumption.
 - **Monthly Consumption:** to set the monthly energy consumption.
8. Tap **Add task** to display the slide-up menu.

9. In the **Add task** menu, you can do either or all of the following options (E):
- **Run the device:** select the devices that you want to trigger.
 - **Moment or Automation:** select the moment which you want to trigger or select the automation that you want to enable or disable.
 - **Send notification:** turn on notification for the automation.
 - **Delay:** set the delay time.

NOTE: You can add one or more actions using .

10. Tap on **Effective period** to set the time range for the automation. You can select any one of the following (F):
- **All-day:** 24 hours
 - **Daytime:** From sunrise to sunset
 - **Night:** From sunset to sunrise
 - **Custom:** User defined time period

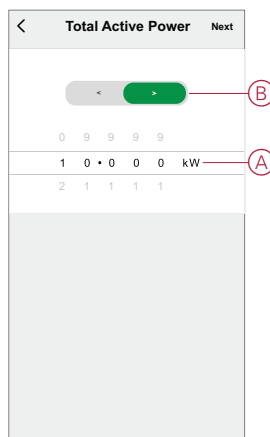

11. Once all the actions and conditions are set, tap **Save**.
Once the automation is saved, it is visible on the **Automation** tab. You can tap the toggle switch to enable/disable.

Example of an Automation

This demonstration shows you how to create an automation to switch off the load and receive notification when total active power consumption is more than set value.

1. Go to **Automation** > **+** to create an automation.
2. Tap , enter the name of the automation and tap **Save**.
TIP: You can choose the cover image that best represents your automation by tapping .
3. Tap **Add Condition** > **When device status changes** > **Grid** > **Total Active Power**.
4. Enter a target value (A), tap > (B) and then tap **Next**.

5. Tap **Add task** > **Run the device** > **Light**.
6. On **Select function** window, tap **Switch** from the slide-up menu and select **Off** > **Save** > **Next**.
7. Tap **Add task** > **Send Notification** select **Notification** then tap **Next**.
8. In the **Automation Settings** page, tap **Save**.

Once the automation is saved, it is visible on the **Automation** tab. You can tap the toggle switch on the automation to enable it.

Editing an automation

To edit an automation:

1. On the **Automation** tab, locate the automation you want to edit and tap **⋮**.
2. On the **Edit** page, you can tap each item (such as dimmer, shutter, delay, temperature, etc.) to change the settings.

TIP:

- You can add one or more actions using .
- To delete an existing condition or action, slide each item towards left and tap **Delete**.

Deleting an automation

To delete an automation:

1. On the **Automation** tab, locate the automation that you want to delete and then tap **⋮**.
2. Tap **Delete** and tap **Ok**.

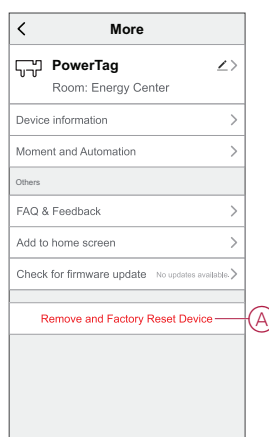

NOTE: After deleting an automation, the device action can no longer be triggered.

Removing the device

Using the Wiser app, you can remove a device from the device list.

To remove a PowerTag:

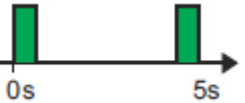

1. On the **Home** page, tap **All devices** and select the **PowerTag** to be removed.
2. Tap  to display more details.
3. Tap **Remove and Factory Reset Device (A) > Confirm**.

TIP: On the **Home** page, tap and hold the **PowerTag** to remove the device.

All the historical data will be deleted.

LED indications

Behavior	Communication indicator light
	PowerTag switched off.
	PowerTag is searching a Gateway in pairing mode.
	PowerTag is in identification mode.
	PowerTag is in network. Normal communication with the Gateway.
	Occasional loss of communication.
	Loss of communication with the Gateway.
	Internal error detected.

Troubleshooting

Symptom	Possible cause	Solution
Currency or the cost related information is not appearing correct.	User has not configured the tariff plan.	Configure the tariff plan correctly by setting the consumption and production target.
Signal strength is bad.	Poor signal between the Wiser Gateway and PowerTag.	Move the Wiser Gateway closer to the PowerTag.
Dashboard is blank and the user unable to see the PowerTag.	User has not set any PowerTag as Grid.	Set a PowerTag as Grid. Refer Setting PowerTag as Grid, page 11.
Individual PowerTag data is not available in dashboard.	<ul style="list-style-type: none"> Device is offline. System/Gateway is unable to receive data. Ethernet connection is incorrect. 	Restart the device. Also, ensure to correct the Ethernet connection.
The hourly data is incorrect against real local time.	Incorrect time configuration as per the user's country.	Set correct time zone as per your country.
The Wiser Gateway LED blinks amber continuously.	<ul style="list-style-type: none"> IP address not assigned by the router. There is no internet router yet. 	<ul style="list-style-type: none"> Check for a proper internet connection. The Wiser Gateway switches to Discovery mode and tries to capture unmatched components. <p>NOTE: Discovery mode lasts no longer than 10 minutes.</p>
The PowerTag LED blinks red rapidly.	PowerTag has lost connection with the Wiser Gateway.	<ul style="list-style-type: none"> Do a power cycle by switching OFF and ON the PowerTag. Ensure that the LED starts blinking amber and try adding again. <p>NOTE: If the LED still blinks red, replace with a new device and try adding again.</p>
The PowerTag LED blinks red continuously.	The PowerTag is not working permanently.	Replace with a new PowerTag and try adding again.
The PowerTag LED is OFF	PowerTag is probably not powered ON.	<p>Recheck the wiring and power connection of the PowerTag and see if gets powered ON. Try adding the device after it is powered ON.</p> <p>If the above mentioned method do not work, replace the PowerTag and retry.</p>
The PowerTag LED blinks orange.	PowerTag is in discovery mode and is ready to be connected.	<p>Perform any of the methods:</p> <ul style="list-style-type: none"> Reduce the distance between the Gateway and the device if possible. Try adding again. Power OFF any other Gateways in the area which have wireless devices and try adding again. Replace with a new device and try adding again.

Technical data

Main data

Commercial Reference	R9M20	R9M21	R9M22	R9M40	R9M41	R9M42	R9M43	R9M60	R9M70
E-number	Not defined								
Product color	White								
Product or component type	Energy Sensors								

Features

Rated Voltage	Un	1P+N/2P	Phase-to-neutral/Phase-to-phase	200...240 V AC \pm 20 %
	Un	3P	Phase-to-phase	380...415 V AC \pm 20 %
	Un	3P+N	Phase-to-neutral	220...240 V AC \pm 20 %
			Phase-to-phase	380...415 V AC \pm 20 %
Frequency	50/60 Hz			
Maximum current	I _{max}		63 A	
Basic current	I _b		10 A	
Saturation current			130 A	
Starting current	I _{st}		40 mA	

Environment

Operating temperature		-25 °C to +60 °C
Storage temperature		-40 °C to +85 °C
Overvoltage category	As per IEC 61010-1	Cat. III
Measuring category	As per IEC 61010-2-030	Cat. III
Altitude		\leq 2000 m
Degree of protection	Device only	IP20
	IK	05

Radio-frequency communication

ISM band 2.4 GHz		2.4 GHz to 2.4835 GHz
Channels	As per IEEE 802.15.4	11 to 26
Isotropic Radiated Power	Equivalent (EIRP)	0 dBm
Maximum transmission time		< 5 ms
Channel occupancy	Messages sent every	5 seconds (approx.)

Characteristics of measuring functions

Function		Performance category as per IEC 61557-12 PMD-I/DD/K55/1	Device measuring range	
Active energy (delivered and received)	Ea	Class 1	Total and partial 0 to 99999999.9 kWh	
Power	P	Class 1	1P+N	≤ 1 VA
			3P/3P+N	≤ 2VA

Weight

R9 M63	Type	Weight (g)
	1P + Wire	16.4
1P + N	17.5	
3P	28	
3P + N	35	
R9 F63	1P + N	16
	3P + N	40

Compliance

Compliance information for Green Premium products

Find and download comprehensive information about Green Premium products, including RoHS compliance and REACH declarations as well as Product Environmental Profile (PEP) and End-of-Life instructions (EOLI).
