

Data Sheet

Connection Sets for X-tra Collection™

Application

Set for 50 mm wall connection

Set for standard wall connection

Set for 50 mm floor connection

Connection pipe set

The connection sets complete the elegant and modern design of Danfoss X-tra Collection™ products in combination with towel rails and designer radiators.

The sets are available in chrome, Inox (brushed steel) and white RAL 9016, thus matching a wide range of modern radiators.

A pipe set for connecting the radiator to the system pipes is optional. The set includes Ø12 mm pipes with connection fittings and internal pipe support.

A connection set can be applied after the radiator is connected and in function:

1. Shorten the cover tube to proper length. Open the tube slit for mounting it over a supply pipe.
2. Apply the rosette parts around the cover tube and click the parts together.
3. Press the rosettes against the wall, use glue if necessary.

Ordering

Product	Colour	Code no.
Pipe set, Ø12 mm, incl. ½" connection parts	–	013G3127
Set for 50 mm floor connection (1 square rosette, 2 cover tubes)	white RAL 9016	013G3207
