

Raychem FROSTGUARD

PRODUCT DESCRIPTION

Raychem FrostGuard is a pre-terminated, self regulating, frost protection cable for pipes. The product includes a pre-installed electrical cable and plug for quick and easy connection to the power supply.

The small geometry, yet robust, cable adjusts its power output dependent upon ambient temperature. Therefore more heat is generated automatically when needed and less heat in warmer ambient conditions, saving energy.

Subject to local norms and approvals, FrostGuard can be used for in-pipe applications.

ADVANTAGES

Product selection phase

Available in 10 sizes to suit most application requirements.

Pre-installed with a plug and cold lead to avoid the need for electrical connections.

Self regulating heater to deliver just the heat that is needed.

The installation phase

The quickest and easiest installation possible. Simply plug and go!

Fix the cable to the pipe with GT-66 adhesive tape.

For in-pipe applications (where permitted) install using a Raychem approved pipe entry gland assembly.

The application

Ideal for small diameter pipework.

An excellent solution for condensate pipework of condensing boilers.

The right choice for domestic and small commercial buildings.

FROSTGUARD

TECHNICAL DATA

Nominal power	10 W/m @ 5°C
Voltage	230 Vac
Maximum exposure temperature	65°C
Min. Installation Temperature	-10°C
Heating cable	Self-regulating cable with protective braid and fluoropolymer jacket in compliance with IEC62395.
Approvals	SEMKO, VDE, CE, SITAC (Swedish approval for in drinking water applications.)
