

How to control
rooms you rarely enter

At DEVI, we are proud to offer you nothing less than a revolutionary world novelty within electrical floor heating. We call it Devilink™. Wireless

heating control with the ability to adjust all temperatures of your home from one central control point in your house. So here it is. The perfect means

to keep control – also in places you're not welcome.

Wireless temperature adjustment –

Safe and reliable, Devilink™ is a two-way communication system based on wireless technology. If you think that advanced indoor heating control is complicated, inconvenient and expensive – think again. Devilink™ is here for your convenience, setting

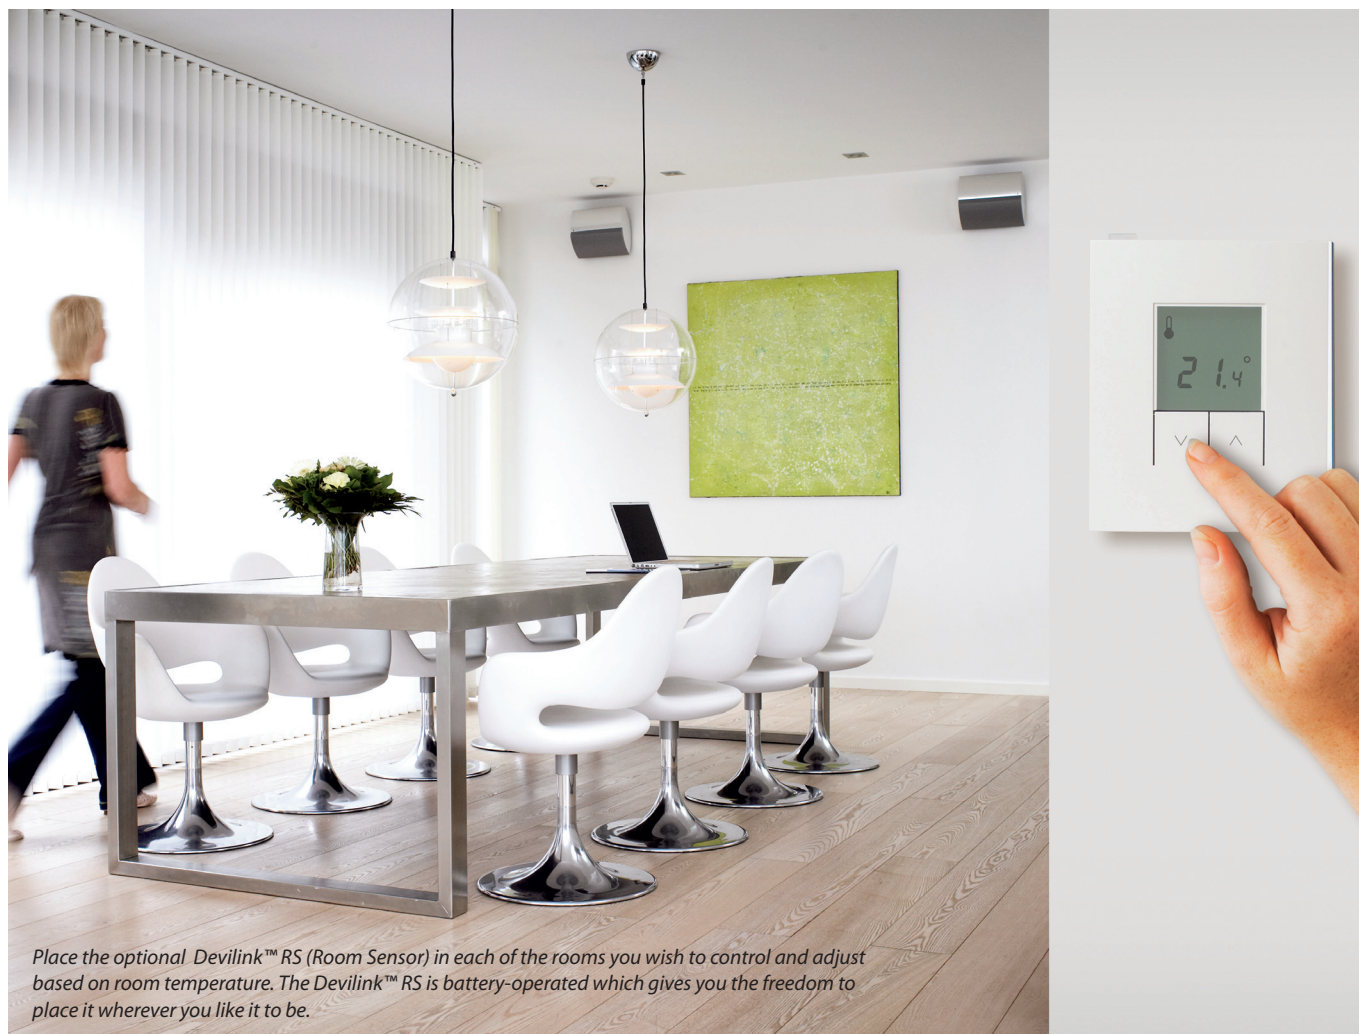

new standards within modern heating control. It is state-of-the-art technology, giving you the possibility of controlling your indoor temperatures from one central place in your home. The Devilink™ solution consists of three wireless

devices: The mandatory Devilink™ CC (central controller) and Devilink™ FT (floor thermostat as well as the optional Devilink™ RS (room sensor). Put together these devices give you an indoor environment you can easily enjoy to the fullest every day.

The next generation of temperature adjustment. Control all room temperatures in your home from one central point. Place the Devilink™ CC central controller where it gives you most convenience.

from one central point in your home

Place the optional Devilink™ RS (Room Sensor) in each of the rooms you wish to control and adjust based on room temperature. The Devilink™ RS is battery-operated which gives you the freedom to place it wherever you like it to be.

Accurate heating in your house: 20.5 degrees means 20.5 degrees

Reliable and user-friendly, Devilink™ consists of a centrally placed main unit for controlling of sensors and thermostats throughout the house. It gives you exactly the heating comfort you demand.

24-7-365, this piece of modern equipment puts you in control of all individual temperatures within your home. Regardless of the room, you easily adjust temperatures as you like it. It is easy. Different

personalities mean different needs and thus different temperatures. Devilink™ makes everybody happy.

Devilink™ FT (Floor Thermostat) is a relay switching on and off the heating mats/cables placed underneath the floor. It communicates wirelessly with both Devilink™ CC and Devilink™ RS. Simply place the Devilink™ FT discreetly above the baseboard, e.g. behind curtains or drapes. Devilink™ FT fits perfectly in your frame system (ELKO, ELJO and JUSSI) and is therefore easily replaceable with your existing thermostat.

A cutting edge solution – stylish

Devilink™ is intelligent and wireless communication technology on the inside and stylish on the outside with its timeless design. A design created to blend perfectly into any environment, no matter your interior.

User-friendly touch screen display with easy-to-operate functions

Devilink™ is simple and easy to operate for every member of the family. With just a few taps on the intelligent touch screen control display, you can adjust temperatures. The clever touch screen is highly user-friendly and guides you – in multilanguage –

through all the choices you make. In case you need assistance a context sensitive help guide assists you on every screen image. On the opposite page you can see some of the features of Devilink™

Less installation time – wireless set-up in no time

Enjoy the wonderful indoor environment of your home almost instantly. Devilink™ is up and running in no time. Due to technology, the wireless installation requires a minimum of wiring work from a professional contractor.

Think green! – optimize energy consumption to the benefit of the environment

Devilink™ is cost-effective consumption of energy. At all times. No more waste of energy as you can easily schedule your weekly heating requirements in terms of when you're away, when sleeping or when needing less warmth. And in addition, the away function makes you save energy, hence money, when you are away from home. Simply plot in your away-period and Devilink™ adjusts temperatures.

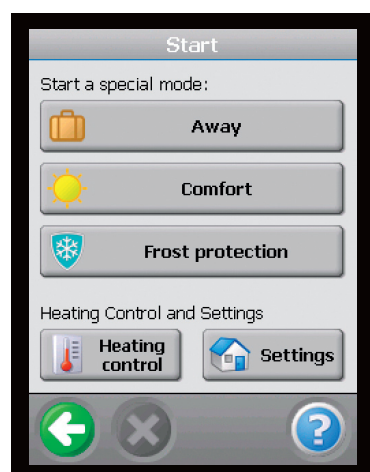

and timeless design for every home

Selected features of Devilink™

Devilink™ is the heating control system of tomorrow. It builds on a scalable platform, so new

requirements are easy integrated. The system is build to expand with your needs. Below are listed some of the

key features to give you an impression of the many possibilities.
