

Condorhibit E 10

Rinse additive to prevent oxidations of the surfaces

Physical chemical properties

Physical state	: Colourless clear liquid
pH at 1%	: $3 \pm 0,5$
Chemical composition	: Ammines, wetting agents and antioxidants
Free of	: Oils and derivates

Typical applications

Condorhibit E10 is suitable mainly for coil with ferrous composition

It is used as antioxidant in the rinse tanks of the pickling lines using hydrochloric and sulphuric acids.

It has the function to brighten up and uniform the surface of the pickled material as well as to prevent formation of stains of early oxidation on the pickled material during stops of the coil.

Characteristics

It is not flammable

It requires stainless steel equipments and storage tanks.

Application conditions

Concentration of use	05, - 1,5 g/l
Treatment time	5" ÷ 30"
Plant:	Spray and immersion
