

# Condorlube CS 15

## Physical chemical properties

Physical state	: Clear light brown liquid
Chemical composition	: Semi synthetic oil
Free of	: Aromatic and chlorinated solvents

## Typical applications

Condorlube CS 15 is a special fluid designed with highly selected synthetic bases and oily additives to be used, as delivered, as antiwear in light and heavy rolling with recirculation systems. It is indicated for ferrous materials leaving on the parts a thin oily film which protects the metal but does not stain it.

Condorlube CS 15 does not release the typical odours of the mineral oils

## Characteristics

High flash point in relation to its viscosity, eliminating almost totally the possibility that product may ignite.

Remarkable cooling power.

Very low level of fumes.

High resistance to high temperature.

The product is absolutely safe to the operator since it does not contain harmful products.

Excellent sliding oily power antiwear.

Perfect finishing of the part with no swear

Precision in the deformation

Equipment does not need any particular material, they can be in common steel.

## Application conditions

The product is applied with no dilution

The product can be applied by spray or immersion

Storage in the original packaging is recommended between 5 and 40°C.
