### **APPLICATION FIELDS**

## A GREAT CERTAINTY AS COMMON BASEGROUND

Pneumatic

Transmission

From automotive to food, ISB supports middle and larger firms and companies, studying **products and solutions for every specific need**. Thanks to a consulting approach and to a **one-to-one technical support**, our company can guarantee the results certainty and a total involvement, throughout design, realization and assistance. Thus, year after year, national and international leader companies from the most various industrial sectors keep deciding to choose and trust us.

#### - MAIN SECTORS:

- Agriculture
- Automation

Automotive

- Electronic
- Medical
- Hydraulic

## MATERIALS

ISB uses materials characterized by a high quality and reliability and wholly respecting the reference standards.

All parts can be supplied with different coatings, among the others: rust preventing coatings, zinc coating, Dacromet®, Geomet®, phosphate coating and painting.

MANY SOLUTIONS, JUST ONE PARTNER

In 1954 ISB was founded by Francesco Silvestri in Bologna. During the years, the company grows in size and in knowledge, affirming its primary vocation: be more than just a supplier, becoming a **reliable and complete partner** which can provide on-demand solutions specifically for each industrial sector.

After more than 60 years, ISB endures in its vision, complementing excellence in products with focus on the service.

# MANY SOLUTIONS, JUST ONE PARTNER

**COMPLETE:** We meet the customers' needs, thanks to a wide range of tailored made products like springs, blanked metal parts and assemblies.

**NEAR:** Near the customer for the entire product life. From the initial technical assistance R&D, and up to after sales support.

**INNOVATIVE:** Research and development, to provide the best solutions with the most advanced measurement and analysis tools.

## OUR PRODUCTS

ISB delivers the best technical standards meeting the highest performance demands from the most competitive markets. Our wide range of solutions allows our clients to rely on just one partner for various families of products, e.g. springs, blanked metal parts and assemblies.

Many solutions, in name of a quality in which a long-time experience joins a state of the art technology and an integral attention. Deep control of the production process guarantees excellence in the result: ISB handles every step from tool design and engineering, up to co-design, simulation and fatigue tests.

#### - FOCUS ON PRODUCTION RANGE: —

- √ Round wire springs:
- ✓ Compression ✓ Extension
- ✓ Torsion
- ✓ Double torsion
- ✓ Wave Springs
- ✓ Belleville Washers ✓ Bent & cold punched parts
- ✓ Assembled parts

✓ Retainers

contatcs

√ Fasteners and electrical

#### **TECHNOLOGY**

# ALL THE NUMBERS OF PERFORMANCE

Who chooses ISB can count on the high know-how of our designers and technicians and on the most state of art and reliable tools.

# **EXCELLENCE UNDER CONTROL**

Every ISB product **undergoes the most meticulous and strictest tests**, starting from fatigue life test through Goodman diagram and ending to empirical accelerated proofs.

Moreover, ISB has recently introduced the **SEM (Scanning Electron Microscope)**, the most up-to-date technology for the quality material testing and for the analysis of possible problems on products.
