Sede dell'evento

Grand Hotel Villa Torretta

Via Milanese, 3 - 20099 Sesto San Giovanni MI, Italia - Tel: +39 02 241121

Grand Hotel Villa Torretta (hotel quattro stelle) si trova alle porte di Milano, vicino a quel Parco Nord divenuto ritiro per tutti coloro che cercano un'oasi serena senza troppo allontanarsi dalla città. Raggiungibile facilmente da tutti i principali snodi stradali, poco distante dalla Stazione Ferroviaria di Milano Centrale e facilmente accessibile dagli aeroporti di Linate e Malpensa, Villa Torretta è il perfetto connubio per i viandanti che amano soggiornare in una dimora storica senza però tralasciare tutti i più moderni comfort.

Grazie alla vicinanza con il centro storico (a soli 15 minuti grazie alla fermata, poco distante dall'hotel, della metropolitana della nuova linea M5, inaugurata di recente), permette di vivere appieno la Milano capitale del design, della moda, della cultura e del bel canto; la Milano che, con la sua ricchezza, è divenuta la capitale della finanza italiana.

China Iron and Steel Association
WWW.chinaisa.org.cn

Brief introduction of China Iron and Steel Association

China Iron and Steel Association is a national wide industrial organization of Chinese steel industry. Guided by the Party's lines, rules and policies, it follows scientific development view and provides services to the enterprises, the industry, the government and the society. It is dedicated to maintaining the overall interests and legal rights of the member companies, functioning its role as a bridge between the government and enterprises and continuously improving the competitiveness of the Chinese steel industry in the domestic and overseas market.

Business scope of China Iron and Steel Association:

1, Make the rule and regulations to specify the industry's self management, and establish the self discipline mechanism, according to the relevant national policies, laws and regulations plus the industry's own characteristics. Play a role of self-discipline for the steel enterprises' structural adjustment, market development, healthy and stable progress of steel industry and import and export of steel products, thus promote the enterprises' fair competition, safeguard the legal right and the overall interests of steel industry.

2, Carry out the industrial investigation and research work and participate in making the industrial development planning, and relevant policies, laws and regulations. Provide consultations and suggestions for strengthening the governments' macro control and administration.

3, Organize the collection, process and various issue of information concerning the domestic and overseas steel market, business management, economic & technology. Provide the consultant service based on the analysis and assessment for the member companies' business management, strategic development, and economic & technology index. Summarize, publicize and spread the advanced and typical experience.

4, Participate in making and amending the criteria and regulation of the relevant technology, economic and management, organize to push forward the implementation of the member companies, and carry out industrial examinations and assessment. Cooperate with the government branches to supervise and urge the reform and improvement of enterprises and products that are not in line with the quality and other criteria.

5, Participate in the pre certification of the progressiveness, economical efficiency, and feasibility of the important investment, innovation, and project exploration within the industry. Organize the specialized discussion, promote the technology development and cooperation, carry out the examination and appraisal of science and technology achievement awarding, spread the application of the industrial technology achievement, and make efforts to enhance the industrial technology progress.

6, Organize the relevant business training, make studies to conduct the relevant title evaluation criteria and test, and improve the staff professional and technological skill.

7, Participate in the relevant international activities on behalf of China's steel industry, establish relationship with the relevant overseas steel organizations, and promote the international economic and technology communication and cooperation.

8, Committed and authorized by the government branches to develop the steel industrial statistics, investigations, analysis and working report, organize the supervision for the process and export of specialized steel products, represent or coordinate enterprises on the relevant missions concerning anti-dumping, anti-subsidy, and insurance measures, execute the relevant rights on foreign affairs including the examination and approval of going abroad, introduce talents from abroad, organize international and domestic exhibitions.

9, Take on other affairs delivered by the government branches, and provide specialized services committed by the society and member companies.
