**EFFICIENT SOLUTIONS
FOR THE WIRE
AND CABLE INDUSTRY**

QUALITY

IS NOT A QUESTION, BUT RATHER A DECISION

Consummate quality is only possible if every detail is spot on. With spare parts from Heinze & Strengh, you make no compromises. You receive top quality products, precisely processed and aligned towards functionality and durability. Our solutions are designed such that your production processes are optimised through reduced downtimes and the quality of your products is enhanced.

You have special requirements? Then let's discuss them. There is bound to be a smart solution.

ADVANTAGES

EXACTLY WHY HEINZE & STRENG

INCREASE PRODUCTIVITY

The high quality of our products pays off for you. Thanks to their durability, our accessory parts reduce your machine downtimes and therefore enhance your production efficiency. You optimise your workflow, save time and money.

ENHANCE PRODUCT QUALITY

With custom designs and the precise processing of our spare parts, they can have a major influence on your products. For example, the specific coating of contact tubes, the creative design of carbon bows and the high quality nickel contact bands.

GLOBAL SERVICE

From our site in Mengerskirchen, at the heart of Hesse, we are internationally active and we are supported in this by numerous representatives across a total of 6 continents.

LONG-TERM EXPERIENCE

For over 20 years, we have been a trade partner for high quality spare, wear and accessory parts across the sphere of wires and cables. Due to our global presence and customer-oriented approach, we know the needs of the industry and we adjust our portfolio accordingly.

CONSTANT INNOVATION

Time never stands still, and neither does development. We therefore always attempt to think one step ahead and incorporate the trends of tomorrow in our work today. You receive technically top quality products from us, which optimally support your workflow.

INTERDISCIPLINARY SPECIALIST KNOWLEDGE

The wire and cable industry is highly diversified. However, our team possesses broad-based knowledge from a wide range of segments. We specifically apply this combined expertise for the trade, with solution-oriented products.

ENVIRONMENTAL AWARENESS

Each individual and above all every company bears responsibility for the future of our environment. And we are also committed to this subject. As such, we are increasingly supporting products that are designed for energy efficiency, we attempt to consolidate orders, and we use recyclable packaging materials to conserve important resources.

PRODUCTS

SPARE AND WEAR PARTS

In order that wire and cable machines work optimally on a long-term basis, you need high quality spare and wear parts. As an industry expert with decades of experience, we utilise quality materials and well-conceived designs in our products. As a result of this, spare and wear parts from Heinze & Streng are characterised by functionality and durability.

Contact tubes

Optimised coatings and ultra-fine polished surfaces. Produced from pure nickel, high polished nickel plated steel, copper or brass.

Composite flyer bows

Carbon bows of exceptional quality thanks to a special manufacturing process, for all conventional stranding machines.

Contact bands

Nickel, Elmedur or copper strips in top quality, deflected, available as coil or ring material.

Carbon brushes / holders

In every quality and design that you require. Also available with wear signalling strands.

HEINZE & STRENG

EQUIPMENT FOR THE WIRE AND CABLE INDUSTRY

PRODUCTS

Seals

Mechanical seals (also in acid-resistant design), lamellar rings, shaft seals, O-rings.

Drawing tools

Fully ceramic, ceramic - steel composite, coated ceramic, coated carbide or tempered steel

Mechanical spare parts

Tooth belts, belt pulleys, chains, V-belts, take-off belts, shafts, gear wheels, return pulleys, insulating flanges and more.

Slip rings

For transferring signal and measuring currents from stationary to rotating components. Pressed, sprayed or shrunk.

PRODUCTS

Electrical spare parts

Regulation and control electronics and accessories, frequency converters, servomotors, AC/DC motors and more.

Ceramic parts

Eyelets, rods, pipes, banana runners. In a standard design or in accordance with individual specifications.

AirWipes

Patented design with durable and exchangeable ceramic inserts. Constant drying at all system speeds.

Hydraulic and pneumatic elements

Cylinders, control valves, hoses, lines, connections, maintenance units, pressure accumulators, units, valves.

HEINZE & STRENG

EQUIPMENT FOR THE WIRE AND CABLE INDUSTRY

PRODUCTS

EQUIPMENT

Specific requirements apply to areas in which cables and wires are produced. In order to satisfy these, we offer intelligent equipment for your production. You benefit from high quality components and devices, which aid your processes.

Stacker spare parts

We can supply you with brand and model-specific spare parts and handling equipment for stackers from all renowned manufacturers, such as Linde, Caterpillar, Mitsubishi, TCM.

Cold welders & spare parts

High quality machines for welding round wire produced from copper, aluminium and other non-ferrous metals. No pre-treatment of the welding ends is necessary.

Maxi 100 cable stripping machine

For cables with diameters of approx. 4 - 90 mm. Two synchronously running rollers transport the cables to the blades and on to the discharge point after stripping.

Battery-powered wire cutters

Electro-hydraulic steel cutters, with or without battery-powered drive. Handy, light and powerful.

MACHINES

LEADING-EDGE TECHNOLOGY FROM KINREI

Stranding machines bearing the Kinrei brand fulfil the highest quality demands for stripping and stranding fine and ultra-fine wires. With high productivity, these machines stand out due to their efficient use of energy and operating materials. The Kinrei product range encompasses bow stranding machines, tubular stranders, outlets and much more. Heinze & Strengh is your sales partner for Kinrei machines and spare parts throughout Europe.
