

Company introduction

GMP Slovakia group is worldwide leader in the production of steel reels, drums and handling equipments for the wire and cable industry.

Both sales and technical departments and manufacturing department team have a long experience in the wire and cable industry and they work together to meet all customer's requirements and expectations.

GMP Slovakia always try to satisfy customer's request, and it is specialized in finding solutions to customized requirements, studying innovative solutions suitable for every application.
These are the strengths of GMP Slovakia, the long experience and the great know how.

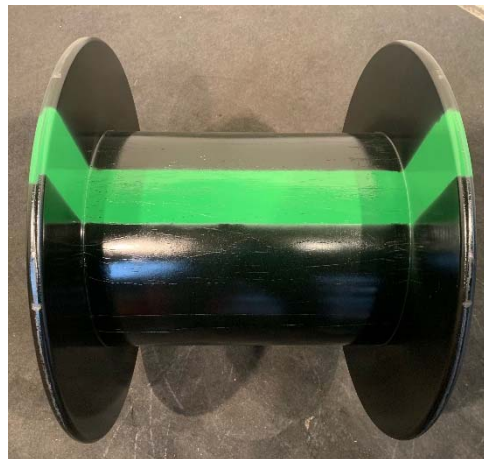

Reparation of reels

GMP Slovakia has the possibility to restore every kind of used reels or drums. Old reels can be restored by easy operations like grinding of the surfaces, straightening, painting and balancing, but we can also restored them by repairing of strokes, welding crakes and substitution of broken parts.

GMP Slovakia will be glad to check your reels and to give you a proposal.
Please see below some examples.
