

Smart Tie System

The **Smart-Tie** is a fast and innovative rebar tying system. It is composed of a device adoptable to any screwdriver and a wide range of clips for the most various tying combinations systems. It guarantees the following advantages compared to all the other current systems:

- **More Versatile:** for all kinds of tying. It makes both the simple snap tie or the saddle tie - impossible with the other automatic systems.
- **Better Quality:** ties are twisted closer and tighter than every other system.
- **Wide range of use:** it has the capability of tying from the smallest to the largest rebar diameters ($\varnothing 10 / \varnothing 10$ mm a $\varnothing 40 / \varnothing 40$ mm).
- **Safer:** does not require repetitive rotation of the hand and wrist thus reducing the risk of carpal tunnel type injuries.
- **Less tiring:** the job is made by an electrical screwdriver and not by hand.
- **Easier:** even an inexperienced operator does quality ties.
- **Universal:** can be used with any type of drill/driver available on the market.
- **More Durable:** needs a minimal amount of maintenance.
- **Comfortable:** A practical container that can be clipped to a belt; ideal for the quick and easy placement of the tie around the rebar.
