PRODUCTION MANAGEMENT

The **integration between ERP and EASYPROD** leads to build a backbone of **synchronized manufacturing**, saving significant time in terms of efficiency, through the integration of production processes, reducing manual activities, reducing human errors, archieving strategic benefits in progressing towards a digital company, optimizing costs, improving productivity and reducing waste.

F-ERP
Enterprise Resourse Planning

ERP Integration

MRP - Manufacturing Resource Planning
- F-GANTT (Production scheduler finite capacity)
- F-START (Control panel tooling machines)
- F-WIRE (Control panel raw materials availability)

F-MES
Manufacturing Execution System

Data collection and monitoring
- F-TERM (Terminals beside machine)
- F-GROUP (Control panel machines group)
- F-LOG (Event maps departments/machines)

Analysis of KPI factory
- F-VIEW (Control panel efficiency departments/machines)
- F-MAPS (Monitoring control panel and efficiency control of production departments)
- F-OEE (Effectiveness indicator of the structure through a sophisticated analysis system of availability, efficiency and quality)

Batches/ID numbers traceability

Workflow production batches

F-QUALITY
System and Quality Control

Entrance Control

Quality control process
- F-SPC (Automates all SPC processes, reducing time and costs of execution)

F-MANU
Maintenance Management Systems
Navigable Timetable Control Panel
