**Designed & Built in the UK with a 5 year Warranty**

**multicube Modular** – a metering system designed for applications where multiple meters need to be installed. C-Tick, UL, CUL Listed.

### Flexible

Each Meter System can expand from 1 Module to 10 Modules

Each Meter Module can be individually configured as 2 x 3 $\phi$  channels, 1 x 3 $\phi$  plus 3 x 1 $\phi$  channels or 6 x 1 $\phi$  channels with a CT rating for each group of 3

Digital Output, Digital Input, Auxiliary Communications, etc Modules can replace Measurement Modules

### Easy to Install & Commission — Right First Time

- Wiring:** Just one Voltage connection for all Modules  
Integral clamp to retain Voltage cables  
Self-retaining plug-in Current & Comms connectors
- Installation:** Mounts on a 35mm symmetrical DIN Rail  
Easy to fit, with added measurements to ensure 'Right First Time' installation

### Easy to Use

One display and one communication port accesses and configures all Meter Modules  
Meter System & Meter Channels can store Real-World Names

### Multi-Parameter

### Fully Supported

Comprehensive operating instructions - supplied with every Meter – provide full information on installation. These include connection schematics and configuration details. Full technical support is readily available from your local Distributor or from Technical Sales at ND Metering Solutions

### Accurate Real World Measurement

A precision measurement system maintains full accuracy up to the 30<sup>th</sup> harmonic (at 50Hz) in the presence of harmonics and randomly and/or periodically interrupted waveforms - as commonly found on modern electronically controlled loads

### Communications

In addition to the standard MODBUS registers, user assignable registers simplify communications. MODBUS RTU<sup>®</sup> is standard, with MODBUS TCP<sup>®</sup> is available as an option  
Other protocols, including M-Bus and full Ethernet web access under development
