

Environmental Product Sheet

PATO 4 Leg Fully upholstered, 4202

Design story of the product

Pato is a versatile chair concept based on a shell in 100% recycled polypropylene, which is also available with seat upholstery or fully upholstered, and with a wide range of bases. This version with a four-leg tube base is stackable and certified with the EU eco-label. Keeping material flows as clean and recyclable as possible, the Pato components are kept homogeneous to a degree where they can be recycled in the future as needed.

Company description

Since 1911 the core of Fredericia's company ethics has been to encourage customers to buy fewer but better products. With the ultimate goal of creating furniture's that become more beautiful with age and can be passed from generation to generation. These core values are rooted in our sense of responsibility, seen in our use of natural materials, our ethical methods of production and our respect for the people using our furniture every day.

Supplier support

Through our ongoing implementation of Sustainable supplier selection and Code of Conduct, we ensure that our suppliers meet our conditions regard to human rights and environmental standards among other things.

Design for environment criteria

In the phase of developing new products or re-engineering existing products Fredericia Furniture follows the below listed principles:

- Timeless design
- Long material lifetime
- Crafted to last
- Easing disassembly of products to increase circularity and ease repair of broken parts
- Increase the use of recycled materials

Material declaration

Fully upholstered chair, stackable. Inner shell of 100% recycled polypropylene with CMHR or HR foam, covered in fabric or leather. Cover is nonremovable. Frame of steel tube chromed or powder coated. Mounted with interchangeable plastic glides.

Environmental data

The whole product incl. packaging material
Recycled content: 62%
Virgin content: 38%

Life cycle assessment data

The Climate footprint = **34 kg of CO₂e** in a level 2 screening validated by the Danish Company, Målbar. This result is based upon the lowest emitting variant of the model and is Målbar's estimate on the outcome within the boundaries of 28 – 38 kg of CO₂e.

The CO₂e accounts for carbon dioxide and other gases e.g., methane and nitrous oxide. The screening complies with the European LCA-rules PEF (Product Environmental Footprint) meaning that it covers the whole product life cycle incl. extrusion of raw materials to end-of-life handling.

Environmental Certifications

EU Ecolabel variants: Black powder coated frame with HR upholstery in Omni leather, Connect, Remix or Re-Wool fabric.

Test

EN 16139:2013 (L2)

Warranty

Fredericia Furniture A/S offers a 7-year guarantee against manufacturing defects in standard products (materials and construction). The warranty does not cover wear and damage to covers, surface treatment, inappropriate use and the like.

Disclaimer

The Climate footprint assessment is based upon delivery to an average EU customer and a 15-year lifetime. Be aware of the variety of assumptions when comparing different life cycle assessments from different companies as the level of detail can vary.
This document is not third-party validated, and the communication is only intended for B2B customers.

Content Declaration

The charts below describe the materials used in the product.

MATERIAL	MASS [KG]	SHARE	CONTENT
Polypropylene (PP)	2,9	51%	Recycled content
Steel	1,8	32%	Recycled content
Polyethylene (PE)	0,3	5%	Virgin
Powder coating	0,3	5%	Virgin
Textile	0,2	4%	Virgin
Glue	0,1	2%	Virgin
Foam	0,05	1%	Virgin
Brass	0,004	0 %	Virgin
Total	5,5		

PACKAGING MATERIAL	MASS [KG]	SHARE	CONTENT
Cardboard	1,2	74%	Recycled content
HDF	0,3	19%	Recycled content
PE - LD foil / foam	0,1	7%	Virgin
Total	1,6		

Detailed Climate Footprint Assessment - CO₂e

The Climate footprint assessment is verified by Målbar October 22nd, 2022.

- 
Disposal: At Fredericia Furniture, we recommend our customers to handle our products with care when the product have served its use. We emphasize therefore that spare parts are reused/recycled when possible and/or products repaired with thought of the future. Sort the spare parts according to your country's regulations.
- 
Use phase: This is the longest phase of the life cycle. During the use phase of our products, a limited environmental impact occurs.
- 
Transport: Includes all transport between suppliers and from manufacturing gate to end consumer.
- 
Packaging: Includes all packaging material.
- 
Production: This phase includes both the manufacturing of components but also the assembly of finished goods.
- 
Production waste: Includes the waste that is generated during the different production processes that is needed to manufacture the product.
- 
Cover: Expresses the environmental impact that the cover has if the product consist of it.
- 
Upholstery: Expresses the environmental impact that the upholstery materials has if the product consist of it.
- 
Surface treatment: Showcases the total environmental impact that the product has concerning surface treatments.
- 
Materials: Includes the extraction of materials, and the benefit of recycled content is considered.
