

the network

Actively building and celebrating individuals from under-represented ethnicities in the legal industry

Mission Statement

the network is an action group for any member of staff who recognises the value in our work place better reflecting the diverse make-up of society. **the network** brings together the skills of individuals who share its ethos to create meaningful change through career development, discussion and outreach.

Career Development

the network works with Fieldfisher's management and HR in a consultant role to ensure the long term career development of talented members of staff. It is an advocate for the Firm's greatest asset, its people, to help every person achieve their professional ambitions irrespective of their background.

Discussion

the network organises events to challenge the status quo through interactive Q&A sessions and insightful seminars. These discussions create the opportunity for people to understand more about a particular issue and develop their contacts with colleagues, a wide range of external speakers and diversity champions.

Outreach

the network's outreach programme focuses on challenging young people's self-limitation before they are faced with decisions that may impact their adult life. It provides bespoke workshops which encourage frank discussion and educate about the wider legal system in England and Wales and the lesser known influencers in British history.

If you would like to get involved with or support the network please contact us at thenetwork@fieldfisher.com

the network is an inclusive group.
Everyone in the firm is welcome to join.
