

With more than 70 lawyers, our office in Brussels has one of the largest EU Regulatory teams in Brussels.

It serves as the entry point to the European Union for all your legal challenges and policy needs based upon our vast experience and relationships with policymakers, trade associations and other stakeholders.

This “EU Hub” is complemented by one of the most comprehensive network of legal offices in Europe, which allows our EU experts to dovetail with local national experts when required.

# Amongst our specific areas of expertise

## ANTITRUST AND COMPETITION

Our practice focuses on all aspects of EU competition law, including behavioural antitrust and antitrust litigation, merger control, cartels and state aid.

## DATA PROTECTION

Working from the heart of Europe, we provide clients with unique insights into the European Union's plan for a digital Europe and we provide full-scale services on all aspects of the digital economy.

## CHEMICALS

We have the most experienced chemicals and environmental law team in Brussels covering REACH, WEEE, RoHS, BPR, PPPR, CLP, fertilisers, cosmetics, detergents etc. We offer the full suite of services from compliance advice and advocacy support through to dispute resolution and litigation.

## ENERGY AND UTILITIES

We offer energy services for investors, institutions, and developers in conventional and low-carbon projects, with expertise in carbon markets (CBAM, CCUS), providing implementation advice to industries such as hydrogen.

## ESG

New corporate reporting and disclosure standards are rapidly developing in the EU, including under the CSRD and the EUDR, and the soon-to-be-enacted CSDDD. Our team, together with outside consultants, can help deliver tailored advice not only on the legal issues, but also on the actual implementation of these new rules.

## FOOD

We have a long-standing experience in agriculture and food law. This sector has experienced a rapid evolution and requires a thorough knowledge of the policy-making processes.

## FINANCIAL SERVICES

We actively advise financial services firms of all sizes, on a wide range of regulatory, risk management and compliance issues.

## INTERNATIONAL TRADE AND CUSTOMS

We advise clients in international trade matters, including trade remedies, customs, export controls and sanctions, investment and market access rules, product safety and other market access-related regulations, anti-fraud investigations and preferential trade arrangements.

## LIFE SCIENCES

Our practice offers creative legal and commercial strategies in this highly competitive and complex area. We are deeply involved in the industry networks and understand the scientific, commercial and legal issues.

## PATENTS AND INTELLECTUAL PROPERTY

Our lawyers litigate cases in all fields of intellectual property law, including patents, trade marks, design rights, copyright, trade names and domain names, before both civil and criminal courts.

## PRODUCTS

Our products team advises on general product liability issues, product recalls, etc, including on hot topics such as eco-design, batteries, green claims, packaging, and single-use plastics.
