FutureFit: Your Pension Scheme Governance Solution

Introduction

FutureFit is our comprehensive solution for implementing an Effective System of Governance for your pension scheme.

Designed to meet the Pensions Regulator's expectations in its new General Code of Practice, our FutureFit platform guides trustees through the details of the Code and provides the tools and expertise to create a governance system which will deliver for members.

The Challenge for Trustees

→ **Implementing an Effective System of Governance**

As trustees, you face the challenge of implementing an Effective System of Governance for your scheme, meeting the Pensions Regulator's expectations in its new General Code of Practice.

→ **Importance of Compliance**

Compliance is not just a legal requirement - it's essential for risk mitigation, stakeholder relations and most of all, good member outcomes.

→ **Navigating the Code**

At 170 pages, the Code presents a formidable challenge for trustees to understand and implement.

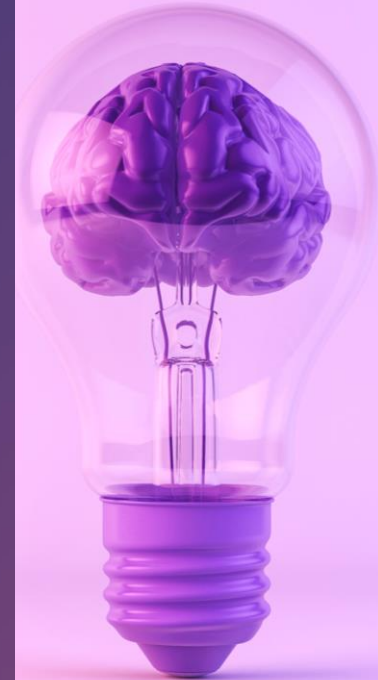

→ **Own Risk Assessment**

Schemes with 100+ members must also review their governance through a formal Own Risk Assessment.

The FutureFit Solution

- **Guided Modules** Our FutureFit platform guides you through a series of modules, detailing the key elements of a Code-compliant Effective System of Governance.
- **Governance Journey Report** Taking information you provide in each module, we will provide you with a report on where you are on your governance journey.
- **Prioritised Action List** The report will contain a prioritised action list of the steps you need to take to be Code compliant and complete your ORA.
- **Document Management** You can use our platform to upload copies of your governance documents for review and to request new governance policies and processes.

The FutureFit Process

Input

Input details of your current governance system

Analyse

We analyse & report on your Code compliance status

Action

Agree & implement a prioritised compliance action plan

ORA

Carry out your Own Risk Assessment

Our service includes:

- Access to our online FutureFit platform
- A detailed governance review report pinpointing Code compliance gaps & priority areas
- A workshop focussing on key recommendations and next steps to achieve full Code compliance
