A licence to participate in FIS races is issued by a National Ski Association to competitors who fulfil the criteria for participation through registering the competitor with FIS in the respective discipline(s).

203.1 The FIS licence year begins on July 1st and finishes on June 30th of the following year.

203.2 To be eligible for participation in FIS events, a competitor must have a licence issued by his National Ski Association. Such a licence shall be valid in the Northern and Southern hemispheres for the licence year only. The validity of a licence can be limited to participation in one specific country or in one or more specific events.

203.2.1 The National Ski Association must guarantee that all competitors registered with a FIS License to participate in FIS races accept the Rules of the International Ski Federation, in particular the provision which foresees the exclusive competence of the Court of Arbitration for Sport as the court of appeal in doping cases.

203.3 A National Ski Association may only issue a FIS licence to participate in FIS races when the competitor has proven his nationality and therefore eligibility by submitting a copy of his passport and signed the Athletes Declaration in the form approved by the FIS Council and returned it to his National Ski Association. All forms from under-age applicants must be counter signed by their legal guardians. Both the copy of the passport and signed Athletes Declaration must be made available to FIS on request.

In addition, the competitor must have had his principal legal and effective place of residence in the new country for a minimum of two (2) years immediately prior to the date of the request to change registration to the new country/National Ski Association. An exception to the two year residency rule may be waived if the competitor was born in the territory of the new country, or whose mother or father is a national of the new country. Applications will not be accepted if a parent has obtained a passport for the new country, but is not resident, and/or there is no family ancestry.

Furthermore the competitor is required to submit a detailed explanation with the application about his personal circumstances and the reason for requesting a change of licence registration.

- 203.5.1 If a competitor has already participated in FIS calendar events for a National Ski Association, he must have the written agreement to be released from the former National Ski Association in addition to the citizenship, passport and residency requirements in art. 203.5 before the new National Ski Association may submit a request to FIS for a change of registration.
If such a written agreement is not given, the competitor may not participate in any FIS calendar events for a period of twelve months from the end of the last season in which he competed for his present National Ski Association, nor may he be issued with a licence to participate in FIS races by the new National Ski Association.
These rules are also valid when a competitor has more than one nationality and would like to change National Ski Association licence registration.
- 203.5.2 The FIS Council reserves the right in its absolute discretion, to grant or to decline to grant, a change of licence notwithstanding the fulfilment of the aforementioned conditions where it deems it is contrary to the spirit of the rule and in the best interests of the International Ski Federation to do so (e.g. to decline to grant a change of licence if a member National Ski Association tries to “import” a competitor).
- 203.5.3 In the event that a competitor does not fulfil all the criteria required to apply for a change of National Ski Association licence registration, the onus shall be on the competitor to demonstrate in writing to the satisfaction of the FIS Council that exceptional circumstances exist and it is in the best interests of the International Ski Federation to grant the change.
- 203.5.4 A competitor will retain his FIS points if he changes his National Ski Association under the condition that the former National Ski Association granted the release of the competitor.
- 203.5.5 In the event that any of the documents for an application to change licence registration submitted by the National Ski Association (letter of release from the former National Ski Association, passport, residency papers) are found to be false, the FIS Council will sanction the competitor and the new National Ski Association.

In the agreements concerning production with a TV organisation or agency acting as host broadcaster, the quality of TV transmissions for ski and snowboard events published in the FIS Calendar – especially for FIS World Cup competitions – must be considered. Of particular importance, while taking into consideration applicable national laws and rules affecting broadcasting, are:

- a) Top quality and optimal production of a TV signal (for live or deferred transmission depending on the event) in which sport is the centrepiece;

- b) Adequate consideration and appearance of venue advertising and event sponsors;
- c) A standard of production in conformity with the FIS TV Production Guidelines and appropriate to current market conditions for the discipline and to the level of the FIS competition series. This means live coverage of the entire event including the winner presentation for live transmission (unless circumstances determine that a live production is not provided). This coverage shall be produced in a neutral way, shall not concentrate on any athlete or nation and shall show all competitors
- d) The live international signal of the host broadcaster must include appropriate graphics in English, particularly the official FIS logo, timing and data information and results, and international sound.
- e) Where it is appropriate to the individual TV market, there should be live TV transmission in the country where the event takes place and in other countries with a high interest.

208.3.2

Production and Technical costs

Except when otherwise agreed between the National Ski Association and the agency/company managing the rights, the cost of producing the television signal for the exploitation of the different rights will be borne by the broadcaster having acquired the rights in the country where the competition takes place or a production company mandated to produce the signal by the company owning the rights. In certain cases, the organiser or the National Ski Association may assume these costs.

For each of the different rights granted under this rule the technical expenses that are to be paid for by those organisations that have acquired the rights and which are seeking to access the television signal (original picture and sound without commentary), have to be agreed between the producing company or the agency/company managing the rights, as applicable. This also applies to any other production costs that may be requested.

208.3.3

Short extracts

Short extracts granting news access for non-rights holders are to be provided to television companies according to the following rules. It is noted that in a number of countries national legislation governs the showing of short extracts in news programmes.

These extracts may only be used in regularly scheduled news programmes and cannot be kept for archive purposes

- a) In those countries where legislation exists regarding news access to sporting events then this legislation will always hold precedence for reporting on FIS events.
- b) In those countries where no legislation exists regarding news access by competing networks and provided that agreements between the company managing the rights and the primary rights holder take precedence then short extracts of a maximum of 90 seconds news access will be granted to competing networks by the agency/company managing the rights for transmission four hours after the rights holding network has shown the competition. The use of this material will cease 48 hours after

the end of the competition. If the rights holding network delays its transmissions by more than 72 hours from the end of the competition, then competing networks can show extracts of a maximum of 45 seconds commencing 48 hours after and ending 72 hours after the event itself. Any request to exploit short extracts shall be addressed to the agency/company managing the rights which shall grant to the broadcasters access to the short extracts subject to agreement regarding the technical costs incurred to receive the material.

- c) In those countries where no transmission rights have been purchased by a television company, all television organisations will be able to transmit short extracts of 45 seconds as soon as the material is available, subject to agreement with the agency/company managing the rights regarding the technical costs to be incurred to receive the material. Permission for the use of this material will expire after 48 hours.
- d) Short extracts will be produced by the host broadcaster or the agency/company managing the rights and distributed by that agency/company, taking into consideration 208.3.2 above.

208.4

Radio

The promotion of FIS events through radio programmes will be encouraged by making available accreditation to the principle radio station(s) in each interested country. Access to the venue will be granted solely to those radio organisations that have obtained the necessary contractual authorisation from the rights holder, and will be only for the production of radio (audio) programmes. If accepted by national practice and the authorisation is granted, these programmes can also be distributed on the internet site of the radio station.

208.5

Internet

Unless the contract for the sale of the Electronic Media Rights on FIS events states otherwise, each television rights holder that also acquires the internet rights, will ensure that video streams from its website other than short extracts are geoblocked against access from outside its own territory. Regularly scheduled news bulletins containing material of FIS events may be streamed on the rights holding broadcaster's website, provided no changes are made to the bulletin as transmitted in the original programme.

Video and audio material produced in public areas where accreditation, tickets or other permissions are not required to gain access must not contain race footage. It is recognised that new technology provides members of the public with the possibility to produce unauthorised video recordings that may be posted on websites. Appropriate information advising that the unauthorised production and use of video material is prohibited and that legal proceedings could be taken, will be shown at all entrances and printed on entrance tickets.

All National Ski Associations and the rights holders/agencies will give permission for short extracts to be placed on the FIS website for non-commercial use subject to the following conditions:

- a) When short extracts have not been acquired for Internet distribution the maximum duration of the news material from FIS competitions will be 30 seconds per discipline/per session and will be accessible on the FIS

website until 48 hours after the end of the competition. The financial conditions relating to the provision of this material will be agreed between the FIS and the rights owner.

- b) The material will be provided by the rights owner or host broadcaster as soon as possible, but at the latest six hours after the end of the competition.

208.6 Mobile and portable devices

In the cases where the rights for distribution by mobile and portable devices have been awarded, the rights purchaser/operator will be free to produce from the television signal the content it considers best meets the needs of its customers. Any live streaming of television programmes on a national basis using these devices shall not be altered from that available through other distribution channels.

In countries where no mobile distribution rights have been sold, short extracts or clips of a maximum duration of 20 seconds will be offered to operators when the material has been produced and for a period of 48 hours on the condition that the operators pay all related technical costs to the agency/company managing the rights.

208.7 Future developments

The principles contained in this Rule 208 shall be the basis for the exploitation of Electronic Media Rights to FIS events in the future. The FIS Council, on the recommendation of the National Ski Associations, the relevant commissions and experts, will establish the conditions considered appropriate to each new development.

209 Film Rights

All agreements regarding film productions of FIS competitions will be between the film producer and the National Ski Association or the company managing the related rights. All contractual arrangements regarding the exploitation of other media rights will be respected.

210 Organisation of Competition

211.1 The Organiser

211.1.1 The Organiser of a FIS competition is the person or group of persons who make the necessary preparations and directly carry out the running of the competition in the resort.

The FIS shall provide its employees and appointed officials, who are not members of the Organising Committee (e.g. equipment controller, medical supervisor, etc.), with liability insurance when they are acting on behalf of the FIS.

212.2 Before the first training day or competition, the organiser must be in possession of a binder or cover notes issued by a recognised insurance company and present it to the Technical Delegate. The Organising Committee requires liability insurance with coverage of at least CHF 1 million; whereby it is recommended that this sum is at least CHF 3 million; this sum can be increased according to decisions of the FIS Council (World Cup etc).
Additionally, the policy must explicitly include liability insurance claims by any accredited participant, including competitors, against any other participant including but not limited to officials, course workers, coaches, etc

212.3 The Organiser respectively its' National Ski Association may request the FIS insurance broker to arrange cover for the competition (at the cost of the Organiser) if the organiser does not have the necessary insurance cover in place.

212.4 All competitors participating in FIS events must carry accident insurance, in sufficient amounts to cover accident, transport and rescue costs including race risks, as well as an appropriate third party liability insurance. The National Associations are responsible for adequate insurance coverage of all their competitors sent and inscribed by them.

In the data service area, access to the internet (at least ADSL speed) is required for World Cup, World Championships and Olympic Winter Games competitions.
- 218.2 The data and timing generated from all FIS competitions is at the disposal of FIS, the organiser, the National Ski Association and participants for use in their own publications, including websites. Use of data and timing on websites is subject to the conditions laid down in the FIS Internet Policies.

218.3 FIS Internet Policies and Exchange of Data relating to the FIS Competitions

218.3.1 General

As part of the ongoing promotion of skiing and snowboard, the International Ski Federation encourages and appreciates the efforts made by the National Ski Associations to provide messages and information to their members and fans. An increasingly important medium for this provision of information is through the Internet.

The following policy has been established in order to assist National Ski Associations through the provision of data from FIS competitions, and to clarify certain conditions that relate to the use and presentation of the data from FIS competitions.

218.3.2 FIS Calendar data

The online FIS Calendar programme has been developed for the free use of National Ski Associations and is available in the members Section of the FIS website.

218.3.3 Results and Standings

National Ski Associations can obtain official results, after they have been approved by the FIS Points verification procedure at the FIS Office. This data will be available on request to the FIS IT Manager who will provide the necessary instructions and/or routines on a case-by-case basis. The FIS World Cup results will include a credit to the results service providers. Standings from the various Cup series will also be available after receipt from the results service providers in the case of the FIS World Cup, or they have been input manually for other Cup series.

1. The results and data from FIS competitions may only be used on the National Ski Associations', Organisers' and participants' websites and may not be passed on for commercial use to third parties or organisations.
The National Ski Association may download the data into its' own software for evaluating performances, etc.
2. National Ski Associations who wish to display results on their website, but do not have a database structure to upload the raw data can create a link to the relevant page of the FIS website. The exact addresses can be obtained from the FIS IT Manager.
3. A link will be established from the FIS Website to all National Ski Associations with their own website, as well as the ski industry and relevant media websites on requests. A reciprocal link to the FIS website should also be created.

218.3.4 Organisers access to results

Organisers of FIS World Cup races can obtain official results from their races after they have been approved by the FIS Points verification procedure in the results database. The upload is a computer-automated procedure for World Cup races and takes place immediately after the end of the race.

The pdf file containing the results and standings can be downloaded from www.fis-ski.com followed by the discipline code and the name of the site: AL (Alpine), CC (Cross-Country), JP (Ski Jumping), NK (Nordic Combined); SB (Snowboarding), FS (Freestyle Skiing) etc. The individual competition can be identified by the competition codex as published on the detailed page of the calendar on www.fis-ski.com.

219 Prizes

- 219.1 The detailed rules concerning the awarding of prizes will be published by the FIS. Prizes shall consist of mementos, diplomas, cheques or cash. Prizes for records are forbidden. The FIS Council decides in the autumn on the minimum respectively maximum values of the prize money approximately one and a half years before the competition season. The organisers have to inform the FIS by October 15th of the amount.
- 219.2 If two or more competitors finish with the same time or receive the same points, they shall be given the same placing. They will be awarded the same prizes, titles or diplomas. The allocation of titles or prizes by drawing lots or by another competition is not allowed.
- 219.3 All prizes are to be awarded no later than the final day of a competition or event series.

220 Team Officials, Coaches, Service Personnel, Suppliers and Firms' Representatives

In principle these regulations apply to all disciplines, taking into consideration the special rules.

221 Medical Services, Examinations and Doping

221.1 National Ski Associations are responsible for the fitness of their competitors to race. All competitors, male and female are required to undergo a thorough evaluation of their medical health. This evaluation is to be conducted within the competitor's own nation.

221.2 If requested by the FIS Medical Committee or its representative, competitors must undergo a medical examination before or after the competition.

221.3 Doping is forbidden. Any offence under these FIS Anti Doping Rules will be punished under the provisions of the FIS Anti-Doping Rules.

221.4 Doping controls may be carried out at any FIS competition (as well as out-of-competition). Rules and procedures are published in the FIS Anti-Doping Rules and FIS Procedural Guidelines.

221.5 Gender of the Competitor

If any question or protest arises as to the gender of the competitor, FIS shall assume responsibility for taking the necessary steps to determine the gender of the competitor.

221.6 Medical Services Required from Event Organisers

The health and safety of all those involved in a FIS competition is a primary concern of all event Organisers. This includes the competitors as well as volunteers, course workers and spectators.

The specific composition of the medical support system is dependent on several variables:

- The size, level, type of the event being held (World Championships, World Cup, Continental Cup, FIS-level, etc.) together with the local medical standards of care and geographic locations and circumstances.
- The estimated number of competitors, support staff and spectators
- The scope of responsibility for the Event Medical Organisation (competitors, support staff, spectators) should also be determined.

The Organiser / The Chief of Medical and Rescue Services must confirm with the race director or technical delegate that the required rescue facilities are in place before starting the official training or competition. In the event of an incident, or issue that prevents the primary medical plan from being utilized, the back up plan must be in place before recommencing the official training or competition.

The specific requirements concerning facilities, resources, personnel and team physicians are contained in the respective discipline rules and the FIS Medical Guide.

222 Competition Equipment

- 222.1 A competitor may only take part in a FIS competition with equipment which conforms to the FIS Regulations. A competitor is responsible for the equipment that he uses (skis, snowboard, bindings, ski boots, suit, etc). It is his duty to check that the equipment he uses conforms to the FIS specifications and general safety requirements and is in working order.
- 222.2 The term competition equipment encompasses all items of equipment which the competitor uses in competitions. This includes clothing as well as apparatus with technical functions. The entire competition equipment forms a functional unit.
- 222.3 All new developments in the field of competition equipment must be approved in principle by the FIS.
The FIS does not take any responsibility for the approval of new technical developments, which at the time of introduction may contain unknown risk to the health or cause an increase in the risk of accidents.
- 222.4 New developments must be submitted by May 1st (Grass Ski August 1st), at the latest, for the following season. The first year new developments can only be approved provisionally for the following season and must be finally confirmed prior to the subsequent competition season.
- 222.5 The Committee for Competition Equipment publishes equipment by-laws after approval by the FIS Council (definitions or descriptions of the equipment items which are allowed).
In principle unnatural or artificial aids which modify the performance of the competitors and/or constitute a technical correction of the individual's physical predisposition to a defective performance, as well as competition equipment which impact the health of the competitors or increase the risk of accidents are to be excluded.
- 222.6 Controls**
- Before and during the competition season or on submission of protests to the Technical Delegate at the competition concerned, various controls can be carried out by members of the Committee for Competition Equipment or official FIS Equipment Controllers. Should there be a well-founded suspicion that regulations were violated, the equipment items must be confiscated immediately by the controllers or Technical Delegates in the presence of witnesses and be forwarded sealed to the FIS, which will submit the items to a final control by an officially recognised institution. In cases of protest against items of the competition equipment, the losing party will bear the investigation costs.
No testing of equipment or material in independent laboratories may be requested at races where a FIS Technical Expert has performed the controls, unless it can be demonstrated that the controls have not been carried out according to the rules.
- 222.6.1 At all FIS events where official FIS measurement experts using the official FIS measurement tools are appointed, the result of measurements carried out at the time are valid and final, irrespective of previous measurements.

For the competition, the Jury is required to meet, once a jump has reached 95 % of the established Hill Size (HS) to consider whether the round of jumps is to continue. The Jury must decide whether the round in progress can be continued with the same inrun speed, or whether it must be cancelled and repeated from a lower starting gate. If the jumps are too short, the round can be stopped, cancelled, and re-started from a higher gate.

For this reason the measuring distance, which these distance measurers are assigned to, can be up to 10 m long, and the distance measurers have to stand higher off to the side. In addition, there must be cross-lines marked every 5 m on the landing hill.

At OWG, WSC, WCNC, SGPNC the measuring can be done without distance measurers as long as the recording of all jumps is secured.

504.1.2.2 Distance Recorder

The distance recorder shall be located in a suitable location on the landing hill opposite the distance measurers but offers the distance recorder an advantageous position from which to receive reported distances. For each competition a team captain meeting is carried out. It should take place one day before the official training and before the competition.

The date, time and place of the team captains' meeting has to be published in the competition program (article 216). In principal two representatives per participating team are allowed to take part in the team captains' meeting.

At OWG, WSC, WCNC and JWSC competitions the seating arrangements of the participating teams have to be marked.

At OWG, WSC, WCNC and JWSC competitions the team captains' meeting shall be held in English. Supplementary translations should be provided.

506.2 Agenda

A written agenda has to be distributed for the team captains' meeting. It is prepared by the competition secretary in cooperation with the chief of competition and the TD.

At all international competitions the agenda normally contains the following items:

511 Informatin on the Jumping Hills

511.1 The competitions for Nordic Combined will be carried out on normal hills and/or on large hills

511.2 Classification of the Jumping Hills according to sizes

The class of the hill will be determined by the distance of the L-point (HS): Hills are classified by sizes as follows:

| Large hills | 110 m and larger | 100 m and larger |
| Flying hills | 185 m and larger | 170 m and larger |

Large hills for which the height difference between the lowest point in the outrun and the edge of the takeoff exceeds 88 m will not be homologated by the FIS.

Whenever new twin-hill construction is to take place, the difference between the distances at HS on the normal and large hill should be a minimum of 25 meters.

512.2 General information

At World Cup competitions, Cross-country courses exceeding the highest point (1800 m) must be approved by the FIS Council.

512.3 Norms for the Cross-Country course

Cross-Country courses must be laid out so that they provide a technical, tactical and physical test of the competitors' qualifications. The degree of difficulty should be in accordance with the level of the competition. The course should be laid out as naturally as possible to avoid any monotony, with rolling undulating sections, climbs, and downhill sections.

Rhythm should not be broken by too many sharp changes in direction or steep climbs. The downhill sections must be laid out so they challenge the competitors. At the same time it should be possible to ski the course even under fast snow conditions.

512.4 Competition course

In principle, the Cross-Country course should consist of:

- One-third up hills defined as climbs with a gradient between 9% (1:11) and 18% (1:5.5) with height differences over 10 meters plus some short climbs steeper than 18%

- One-third undulating, rolling terrain, utilizing all terrain features with short climbs and downhills (with height differences of 1-9 meters).
- One-third varied downhills, demanding versatile downhill techniques.

The courses may only be used in the direction established for the competition.

512.5 Technical parameters of the Cross-Country courses

512.5.1 Height Difference (HD)

The difference in height (HD) between the lowest and highest points of a

| 2000 m | 40 m |
| 2500 m | 50 m |
| 3750 m | 60 m |

512.5.2 *Maximum Climb (MC)*

The maximum length difference of a single climb (PHD) must not exceed these limits but can be interrupted by a section of undulating terrain that does not exceed 200 m in length or a down hill that does not exceed 10 m. PHD.

| | |
|--------|---------------------------------|
| 1500 m | 25 m (for a Team Sprint course) |
| 2000 m | 40 m |
| 2500 m | 45 m |
| 3750 m | 50 m |

512.5.3 *Total Climb (TC)*

The total climb (TC) should be within:

| | |
|--------|--|
| 5 km | 150 – 210 m |
| 7.5 km | 220 – 255 m (for a Team Sprint course) |
| 10 km | 250 – 400 m |
| 15 km | 400 – 550 m |

512.5.4 *Description of Uphills*

The uphill is defined by the Partial Height Difference (PHD). PHD is the height difference from the lowest to the highest point of the uphill. Additional description of the uphill is given by the Partial Climb (PC). PC is the total climb of the uphill. Sum of all PCs is the Total Climb (TC) of the course.

512.6 **Course Design**

Ideally the course should consist of several laps, so that spectators are entertained by repeated appearances of the competitors in the stadium.

512.7 **Homologation**

The homologation of Nordic Combined Cross-Country tracks will be carried out by the Nordic Combined Sub-Committee for Officials, Rules and Control based on the Cross-Country ICR Book II art. 311 and 312 and the Cross-Country Homologation Manual.

513 **Working conditions at the Competition areas**

513.1 **At the Jumping Hill**

513.1.1 *Judges Tower*

The following requirements in and around the judges tower must be fulfilled:

- Ensure that enough space for Jury and additional staff (TV, Data-Service, technical equipment wind measuring system, Info PC, start control)
- Contact to the environment (it must be possible to open the window)

- The view to the start, to the take off and landing area including the out-run
- Communication to all important points and officials on the jumping hill
- Judges compartments
- Room for the announcer

513.1.2 *Coaches Stand*

For jumping hill facilities, where international competitions are to be organized, coaches must have two suitable stands (for 20 persons each) One stand should be in the area near the edge of the take off and the second should have an unobstructed view of the jumpers flight and landing.

For OWG, WSC and WGS WCNC events, coaches' stands for 40 coaches must be available.

~~513.1.3 *Mechanical Lift*~~

~~For OWG, WSC and WC-NC events, a mechanical lift for the jumpers is required~~

513.1.3 *Warming Area The Ski Jumping Hill Infrastructures*

For OWG, WSC, JWSC and WCNC competitions, ~~a warming area large enough to accommodate 20 jumpers is required near the inrun~~ the infrastructure requirements are regulated in the FIS matrix, available in the document library of the FIS Website.

513.2 **Cross-Country Stadium**

513.2.1 A Cross-Country stadium has to be prepared for OWG, WSC, JWSC and WCNC competitions, with a well-designed start/finish area.

513.2.2 The stadium arrangement should provide a functional entity divided and controlled as necessary by gates, fences and marked zones. It must be prepared in such a way that:

- the competitors may pass through it several times
- competitors, officials, media, service people and spectators may reach their respective areas easily
- there is enough space to carry out Individual starts, Team starts, and mass starts and the finish can be as wide and long as required.

513.2.3 Competitors should be able to reach the following areas, without being disturbed:

- the team preparation area (wax cabins)
- the ski testing area and the warm-up tracks
- the equipment control and transponder distribution
- the storage for warm-up clothing
- the start
- the through lap or relay/Team Sprint exchange (with exit)
- the finish
- the immediate care area (tents for the exchange of clothes, refreshments etc.)
- the exit

513.2.4 Competition officials and Jury members must have proper working conditions. Coaches, officials, media and service people must have proper working zones within the stadium area so that they can work without disturbing the process of start and finish. The access of these persons to the stadium area must be regulated by accreditations.

513.2.5 *Jury Room*
At OWG, WSC, JWSC and WCNC competitions, FIS officials and Jury members must be provided a working room in the immediate vicinity of the stadium.

513.2.6 *Timekeeping Building*
Timekeeping and calculation should be located in a building with a good view of the start and finish.

513.2.7 *Ski Test Area*
A ski glide testing area with tracks for all participating teams must be located near to the stadium. It should also be in close proximity to the team wax cabins and warm up track.

513.3 Requirements for Competition areas

513.3.1 *Team areas and wax cabins*
For OWG, WSC, JWSC, WCNC and COCNC a secured team preparation area with wax cabins equipped with electrical current supply must be installed in the immediate vicinity of the Jumping hill and the stadium.

513.3.2 *Medical Services Room*
See specifications of the Medical Committee in the Medical Guide.

514 Measuring Devices

514.1 Ski Jumping

514.1.1 *Jumping Distances*
Distance markings shall be placed on both sides of the landing from the distance of 0.5 K to the HS. To correctly position the distance markings, take a measuring tape, and measure from the two sides of the takeoff edge down the landing slope to the point that is 50% of the K-point (w rounded up to a full m). At this measured point, fasten the appropriate distance marking on both left and right sides of the landing slope. Measure along the slope in 1 m intervals to mark the location of the other distance markings.

For the measuring of the distances with a technical system (technical distance measuring), the approval of the Jumping Committee is required for its operational validity.

514.1.2 *Definition of Jumping Distance*
The distance to be awarded is measured from the edge of the takeoff to the jumpers landing place on the landing slope. The landing is considered complete when both feet are in full contact with the landing slope. For abnormal landings (e.g. only one foot is in full contact with the slope and the

other foot is raised in the air) the distance measured will be the point where the first foot is in full contact with the landing slope.

The landing point is determined by the exact place where the jumper's feet touch the landing slope. For the jumper landing in the telemark position, the distance to be measured is the midpoint between the feet.

If the landing does not proceed by placing the skis on the snow (a fall), the distance measured will be the point where any part of the jumper's body first touches the landing slope.

514.1.3 *Measuring of the Jumping Distance by the Distance Measurers*

The distance measurers stand on one side of the landing slope and follow the jumper's trajectory with their eyes up to the landing point. The measurer in whose measuring area the viewed jump landed shall mark the jumping distance to an accuracy of 0.5 m. The mark to be awarded is indicated by the placement of the measurer's hand on the distance markings. Half meters are indicated by an additional rising of the free arm. The distance markings shall be placed on both sides of the landing slope to prevent parallax mistakes by the markers.

514.1.4 *Measuring of the Jumping Distance by the Technical Measures*

Technical measuring devices that measure distances to an accuracy of 0.5 meter and tabulate the distance are permitted for the recording of the jumping distance and the calculation of distance points.

Distances must also be practically measured by distance measurers as a back-up and in case of mechanical failure of the technical measuring device.

514.1.5 *Inrun Speed*

The devices for the measurement of inrun velocity (v_0) shall be placed as follows:

- the measured distance is 8 m
- the second photocell beam must be located 10 m before the edge of the takeoff
- the photocell beam must be 0.2 m above the snow profile

For jumping hills listed on the FIS competition calendar Hill Size (HS) 85 m and larger, inrun velocities must be measured during all training periods and throughout competition.

514.1.6 *Wind Velocity and Direction*

The wind measuring instruments must be placed alongside the landing slope at the height of the optimal flight trajectory. The measurement data for these devices must be available to competition officials in the Judges Tower and shown in the most consolidated, readable form possible. Measuring instruments must be placed in three locations on normal and large hills (at the edge of the takeoff as well as at approximately 50% and approximately 100% of the distance to the K-Point). In addition, at least 8 wind flags or wind socks must be placed along each side of the landing hill at the height of the flight trajectory. The Jury can change the locations of some of these devices if specific conditions on the hill require it.

If the wind/gate application is used there are special rules relating to the fixation of wind measuring devices.

514.1.7 Start Permission and Start Time Control

514.1.7.1 Three phase mode

Start permission and starting time control at OWG, WSC, JWSC, WCNC, GPNC as well as COCNC will be determined by means of a three-coloured (red-yellow-green) stoplight and a digital clock which are connected and running automatically depending on the adjustable starting rhythm program.

During the red phase (start preparation) the clock runs backward from the adjusted time to zero seconds. The red phase is for the direction of the competition and can be stopped whenever needed. During the consecutive yellow phase the clock runs forward. The competitor is allowed to take the position on the starting bar with the begin of the yellow phase. According to the external conditions the Jury decide about the minimal duration of the yellow phase (usually between 10 and 15 seconds). The duration of the yellow phase can be between 10 and 45 seconds. If the conditions do not allow to start the competitor, the yellow phase switches to red automatically. In this case the competitor must leave the starting bar and prepare for the new starting procedure. The yellow phase switches to the green phase after 10 seconds at the earliest.

With the switching to green light the starting time begins and will be finished after 10 seconds. Within these 10 seconds the competitor must start and leave the starting bar. The light automatically switches back to red and the starting procedure for the next jumper begins.

The times for yellow and red phase must be clearly visible to the athletes on the separate display on the starting semaphore.

514.1.7.2 Two phase mode

The start permission and the start time control FIS events must be done with an automatically controlled light signal (traffic light). The light shall be a steady green for 5 seconds, a flashing green for a minimum of 5 seconds up to a maximum of 10 seconds.

After the entire start time period of a minimum of 10 seconds up to a maximum of 15 seconds, a red light thereafter. The established start time period must be clearly visible to the athletes. The countdown of starting time may also be shown by an automatically directed clock.

The chief of competition or an assigned assistant is responsible for controlling the start-time device.

514.1.8 Lengths, Angles, and Temperatures

The following measuring devices and instruments must be available on site for the TD and the TD Assistant at all times:

- a 50 m measuring tape
- a hydrostatic balance (digital level)
- a balance bar
- a goniom
- a thermometer

– a metric tape measure (minimum 3 m).

These measuring devices will allow the TD to review the actual and current snow profile, snow temperature, and air temperature.

514.2 Measuring Devices for Cross-Country

For all competitions listed in the FIS Calendar, electronic timekeeping is mandatory. Electronic timing will always be supported by hand timing as a backup system and the results cross checked between the two systems.

514.2.1 Timekeeping – Start

The Gundersen start is carried out without an electronic start gate. In order to guarantee an exact start, a large display digital clock must be used. The clock is started by zero time when the first competitor starts. At the same time, the starters must start an additional stop watch for control. The starting procedure must be recorded by a HD video camera which focused to the clearly marked starting line (see marking start line, art. 515.2.7).

As a backup system for OWG, WSC and WCNC an additional transponder line has to be placed 1,5 m beyond the starting line. The reference time for the Jury to check the start procedure is 1 second, which means all earlier starts must be checked.

514.2.2 Intermediate Time

An intermediate timing point will be established according to the local circumstances and the respective length of the course. In principle it should be 1 – 2 intermediate timing points per round.

514.2.3 Finish Timing

Times will be measured in full tenths of a second. Times to one hundredth of a second will not be used.

When using hand timing, the time is taken when the competitor's first foot crosses the finish line.

In case of electronic timing, the time is taken when the contact is broken. The measuring point of the light or photo barrier must be at a height of 25 cm above the snow surface.

Additionally, the finish is to be recorded by video cameras. The first camera must be positioned on one the side of the finish line providing a picture of the finish and an additional camera positioned to identify the starting bibs.

514.2.4 Photo-Finish camera

At OWG, WSC and WCNC special Photo-Finish cameras (Line-CCD) must be employed to record the correct order of finish. To attain a correct and swift result evaluation, it is imperative that every competitor wears an additional starting bib on the outside of his thigh where the camera position is. The height of the starting bib digits should not be less than 8 cm.

The Line-CCD camera must be able to register finish line crossing with a 1/1000 s precision. The CCD camera must be synchronised with the main timing system 1/2 hour before competition starts. The display of the time behind the winner or display of the running time is sufficient.

In the case of Photo-Finish decisions, the image of the Line-CCD camera must be presented on the system monitor to the Jury, additionally a colour print-out with time scale is required.

This system is subject to FIS homologation.

514.2.5

Photo-Finish

The use of technical measurements (Video camera, Line-CCD camera) shall be used in the following situations for the determination of the actual final ranking:

- if the finishing times are identical
- a difference in the finish ranking list made by the finish referees
- the difference between two or more athletes crossing the finish cannot be clearly witnessed.

514.3

Transponder Timekeeping

Transponders (active and passive systems) can be used as a supporting system to the official timing system to determine race times and ranking sequences at intermediate timing points, pre-timing points, and finish (unofficial result).

The official result must be confirmed by using electronic timing systems in accordance with ICR 514.3.1.

For Gundersen competitions the order at the finish is the ranking criteria for the official result. The finish order must be confirmed in any case with the photo finish system. In case of usage of transponders the determined finish times can be used for the official result when the finish order is confirmed by photo finish system.

514.3.1

Electronic Timing

The following electronic timing technologies can be used to identify the official finish times:

- Electronic timing system based on photo cells. The measuring point of the light or photo barrier must be at a height of 25 cm above the snow surface.
- Photo finish system. The measuring point will be the toe of the first boot meeting the finish line.

514.4

Current Information Facilities

A notice board is showing the air and snow temperature. These temperatures must be displayed at the following times: Two hours before the start, one hour before the start, half an hour before the start, at the start, half an hour after the start, and one hour after the start.

Temperature measurements must be taken in the stadium area and at places where extreme temperatures (low points, high points, windy, shady or sunny places) can be expected, see art. 502.1.2.2

Notice boards must be used for intermediate times and unofficial results.

Loudspeakers must be used for announcing the competition and other important information concerning the event.

In order to inform competitors, trainers, spectators, etc., at least one language (English or German) must be used in addition to the Organiser's language.

515 Preparation of the Competition areas

515.1 Ski Jumping Hill

515.1.1 General Snow Preparation

Before the start of official training and throughout the entire competition period, the hill – from the start point at the top of the inrun to the end of the outrun – must be prepared in exact accordance with the requirements.

515.1.2 Requirements for the Inrun and Takeoff

The preparation of the snow must be such that it is completely level and at the exact height of the profile boards. This profile should allow a snow depth of 20 cm minimally. The necessary snow density is achieved through packing.

The tracks must be prepared with the help of technical equipment (a track cutter, track plane or inserted profile boards or something similar) according to the following measurements:

- Distance between both centers of tracks for Jumping hills with w over 75 m: 30 - 33 cm
- Width of track: 13.0 - 13.5 cm
- Depth of track: at least 3 cm for normal, large and flying hills

The following regulations are valid for OWG, WSC, JWSC, WCNC events:

- In winter, the in-run tracks must be prepared with artificial snow, ice or in exceptional cases artificial material (i.e. china).
- The in-run tracks prepared with artificial snow or ice have to be supported by a cooling system.
- The track have to be made by track cutters
- It has to be assured that surface water caused by rain or warm weather can be drained from the track.

The preparation of the inrun and takeoff must provide all competitors with the same conditions throughout each competition round. If it is necessary to change or prepare the inrun during the competition because of snowfall, falls, or long holds, there must be a sufficient number of trial jumps before the competition can continue. In the case of poor and hazardous conditions, the Jury will base its decision on the performance of the trial jumpers and the effects of the weather on them.

If the length or inclination of the takeoff is changed during one official round of competition, the round must be cancelled and restarted.

It is the Jury's responsibility to decide at the conclusion of a day of jumping whether the inrun track shall be left in or taken out and the inrun prepared anew.

515.1.3 Requirements for the Landing Slope and Outrun

The snow must be prepared so that it possesses the necessary density and firmness. The snow depth must be a minimal of 30 cm (35 cm for the hills with plastic covering).

For sites hosting OWG, WSC, JWSC and WCNC competitions, it is mandatory that the preparation, grooming and packing of snow will be

accomplished through the use of an appropriate on-site snow grooming machine. Chemicals may be used to ensure that the necessary firmness can be achieved. The prepared snow surface shall be completely level and concur with the planned (designed) snow profile. This requirement is extremely important for the area from the first distance paddle to U (end of transition curve).

515.1.4 *The Marking of the Landing Hill*

The Hill Size (HS) has to be marked on the landing hill by a crossline of spruce twigs or equivalent. This crossline should be marked with red ink colour at each side of the landing slope for a distance of 5 meters. Furthermore, on both sides of the landing slope it is recommended that banners with different colours shall be laid down as follows:

- between the construction point (K) and the Hill Size (HS) a red banner on each side;
- from the K-point towards the P-point a blue banner on each side in an equivalent length of the distance between K and HS, as well as
- from the fall line towards the HS a green banner on each side in an equivalent length of the distance between K and HS.

For the orientation of the measurers, Jumping Judges and spectators regarding distances reached and for calibrating the video-distance measuring, crosslines also have to be placed on the landing slope from 10 m before P-point to the Hill Size (HS) for the jumping lengths at intervals of five m (e.g. 60 m, 65 m, 70 m, 75 m, 80 m...). If needed, the Jury is entitled to add additional markings.

[The guidelines for the Construction Requirements for the Jumping Hill that Serve the Elements of Competition and Safety are given with in the ICR book III Ski Jumping, art. 411.5.](#)

515.1.5 *Fall Line*

It is the responsibility of the Jury to define the placement of the fall line on the outrun. After this decision has been reached, a crossline shall be marked with either a painted line or spruce twigs. As a rule, the fall line shall be located at the lowest point on the r_2 .

515.2 **Cross-Country Course**

515.2.1 *Pre-Season Preparation*

Rocks, stones, roots, stumps, brush and similar obstacles should be removed. The courses must be prepared before the winter so that they can be raced even with very little snow. Sections of the course that have drainage problems must be corrected. The summer preparations should be of a standard which allows for carrying out of competitions with approximately 30 cm of snow. Special attention must be given to downhill sections and the need for banking the curves.

515.2.2 *General Snow Preparation*

The course should be completely prepared with mechanical equipment. If heavy machines are used, they should follow the original configuration of the

ground as much as possible in order to preserve the undulations of the terrain.

515.2.3 *Preparation for Free Technique*

The course must be prepared to the recommended width from 6 to 8 m. The course must be prepared so that competitors can ski and pass unobstructed. On slopes where the trails traverse, they must be wide enough to allow for good preparation.

515.2.4 *Preparation for Mass Start*

The first 30–50 m after the start will be prepared with parallel tracks where each competitor is forbidden to leave the track and is forbidden to use skating techniques. The next 50–100 m (without tracks) should be like a funnel until the normal width of 6–8 m is reached. Narrow sections along the course must be eliminated.

515.2.5 *Preparation for Training*

The courses must be completely prepared before the official training, correctly marked and with the kilometer signs in place. The testing tracks should have the same preparation as the competition course.

515.2.6 *Employment of Chemical*

All use of artificial means in order to improve the glide on the snow are forbidden. In special situations, the use of chemicals to preserve a solid surface is permitted.

515.2.7 *Start Area*

The start must be prepared according to the terrain, with the first 100–200 m prepared to a width at 6–9 m.

In order to guarantee an exact start, there must be a large start clock placed so that it is easily readable from the start line and a board with the starting numbers and starting times for each starting lane must be used. The clock is started by zero time when the first competitor starts. At the same time, the starters have to start an additional stop watch for control.

The start line must be clearly marked by a coloured line. The use of coloured planks with a width of max. 10 cm placed lower than the prepared snow is recommended. This start line must be placed at right angles to the skiing direction.

515.2.8 *Individual Gundersen Competition*

The start must be prepared so that in principle three (3) competitors may start side by side.

515.2.9 *Mass Start*

The start layout for a Mass start competition is prepared in a straight line. The distance between each track in the starting area should be 1.2 – 1,5 m. If there are more competitors in any one group than there are start lanes, then the higher start number will be positioned in the next row. The distance between the rows should be **4 2 m *minimally***. To ensure a fair starting procedure, additional modifications due to the terrain and snow conditions

can be made. Start number 1 starts on the middle track, no. 2 to his right, no. 3 to the left of the middle track etc.

515.2.10 *Team Gundersen Competition*

The start must be prepared so that in principle two (2) competitors may start side by side.

515.2.11 *Relay Team Gundersen Competition Exchange Zone*

The relay Team Gundersen Competition exchange zone should be a rectangle 30 meters long and sufficiently wide, clearly marked **marked** (the beginning and end of the zone must be marked with 1 m long red line on the right and left side and with signs “Exchange Zone Start” and “Exchange Zone End”) and roped off and located on flat or smoothly rising terrain near to the start and finish (special regulation art. 542.3).

515.2.12 *Team Sprint Exchange Zone*

The Team Sprint exchange zone should be a rectangle 30 to 40 meters long or of equal lengths the boxes and sufficiently wide, clearly marked (the beginning and end of the zone must be marked with 1 m long red line on the right and left side and with signs “Exchange Zone Start” and “Exchange Zone End”) and roped off and located on flat or smoothly rising terrain near to the start and finish (special regulation art. 543.3).

515.2.13 *Marking the Course*

The marking of the course must be clear so that the competitor is never in doubt where the course goes. At OWG and WSC the colours of the markings have to be determined and described in the course descriptions.

515.2.14 *Marking the Course - Kilometer signs*

Kilometer signs must mark the accumulated distance skied along the course. At OWG, WSC and JWSC **and WCNC** competitions, every kilometer must be marked. For all other FIS competitions, this marking should be done whenever possible.

515.2.15 *Marking the Course - Barriers*

Forks and intersections on the course must be marked clearly by visible signage and fences must be placed across unused parts of the course.

515.2.16 *Course Protection*

At OWG, WSC, JWSC and WCNC competitions the courses must be fenced along both sides at all places where spectators can potentially interfere with the competitors.

515.2.17 *Structure of Finish Area*

The layout of the finish area in Nordic Combined consists of the home stretch, as straight as possible to the finish line approx. 100–150 m and the finish zone which is the last **straight 50 to 100** m before the finish line. The beginning of this zone must be clearly marked. This zone is a minimum of 9 m wide and is separated in at least 3 corridors that must be clearly marked and highly visible but do not interfere with the skis.

515.2.18 *Marking Finish Line*

The finish line must be clearly marked by a coloured line with a width of max. 10 cm. The use of coloured planks (v-boards) placed lower than the prepared snow is recommended. The finish line must be placed at a right angle to the incoming finish lanes.

516 Information for Spectators and Press

516.1 Information for Spectators

In addition to receiving information via the public address system, competitors and spectators should be informed by electronic scoreboards. The scoreboard shall display the competitor's start number, the distance jumped, the style score given by each Judge, the total point score, and current place in the competition. The scores of the five Judges must be published at the same time. At the Cross-Country competition the scoreboards must show the intermediate times and the ranking with the time differences.

516.2 Stands for Media Representatives

Optimal working conditions and places shall be provided for representatives from television, radio, newspapers, periodicals, and photography agencies. These conditions shall include continuous information (start lists, current positions and changes of ranking), access to optimal viewing positions, and an assigned area equipped with trouble-free technical devices to facilitate the performance of their duties.

The use of flashbulbs or other lighting devices is prohibited during the jumping competition, for these devices can interrupt and disturb jumpers and their movements.

520 Competition and Competitors

521 Requirements of the Competitors

521.1 Age Categories

Two age categories have been established for FIS Nordic Combined competitions:

- Juniors: up to 20 years of age on January 1st of the current calendar year
- Seniors: all competitors over the age limit for Juniors

521.1.1 In OWG, WSC and World Cup competitions, all competitors shall start in one category.

At WC and WSC a competitor must have reached his 16th birthday before the end of the calendar year (1st January – 31st December) in question:

- WC 2018/19 and WSC 2019, competitors born 2003 and earlier

| <u>2020/21</u> | <u>16-20</u> | <u>2001, 2002, 2003, 2004, 2005</u> |

521.1.2 For all other international Nordic Combined competitions, separate age groups may be established. The entry form must advise participants what the various age groups will be.

521.1.3 Junior competitors may start in the Senior category provided their National Ski Association has entered their name in that category. However, Juniors wishing to start in this category must have the skills to compete in the Senior class.

521.1.4 *Qualification* WSC
 For participation at WSC an athlete must fulfil the following qualification criteria:

- regular participation in WCNC, COCNC or other Cup systems
- JWSC or Youth events and
- he must participate in a national competition system.

522 Entry

522.1 Each National Ski Association must enter their competitors for international competitions according to the final entry date or by the participation conditions within the official FIS entry form.

522.2 Competition Entry

At OWG, WSC and JWSC two hours prior to the designated team captains' meeting, each nation must present at the race office the starting order of their competitors by name. This entry form must contain:
 FIS Code / Family name / first name / Club / year of birth / starting group or ranking position.
 In exceptional cases the Jury may shorten this time period.

522.3 Entry by Team

Entry for the nations as per the rules art. 522.2. The entry by competitor's name and position for the first discipline must be made two hours prior to the team captain's meeting, for the second discipline immediately after the end of the first competition but no later than 15 min. after the announcement of unofficial result. In exceptional cases the Jury may shorten or extend these time periods.

522.4 Entering Substitution and Late Entries

522.4.1 Late Entries

A late entry in a Gundersen competition is possible only if it occurs prior to the start of the jumping competition and in a Mass Start competition prior to the start of the Cross-Country race.

522.4.2 Substitution

After the draw, a competitor can only be substituted if he can not start due to

force majeure (injury, illness, etc.) and if the Jury permits the substitution. This has to be certified by a medical doctor and communicated to the Jury until 2 hours before the start.

522.4.3 In case of an accident during warming up, the Jury can permit a substitute later than 2 hours before the start (injury confirmed by a medical doctor).

522.4.4 If the withdrawn competitor was selected for doping control then this test must still be carried out and must also be carried out on the substitute competitor. If the withdrawn competitor produces a positive test, no substitute will be allowed.

522.4.5 The Jury has to make also the decision, in which place in the starter field the substituted competitor may start (e.g. in the same place, in its ranking position or at the beginning of a group).
Exception: The substitute athlete must start in the same Team/Team Sprint position as the substituted athlete. The Team's starting order cannot be changed.

522.4.6 Competitors, who are on the starting list and cannot take part in the competition because of illness or other reasons, must be reported by the team captain to the competition secretary at latest 30 min. before the start. If any of these competitors were selected for doping control, they must still be tested.

523 Draw

523.1 Principles

523.1.1 For international competitions, the draw is carried out by using a random double selection.

523.1.2 It is possible to have the draw conducted prior to the team captains' meeting under the supervision of the Jury.

523.2 Individual Competitions

523.2.1 Gundersen method

The starting order at OWG, WSC, WCNC and COCNC in Ski Jumping for the official trainings, provisional competition round, trial and competition round will be based on the reverse order of the actual Cup standings. Competitors without any points in the Cup Standings will be drawn in groups before those competitors with points.

A draw is only carried out for Ski Jumping at JWSC. The starting order for the groups is: I, II, III, IV.

523.2.2 Mass Start

The start order by Mass Start competitions is based on the actual Cup standings. The leader of the ranking list will receive the first number. Competitors without any points will be drawn in groups at the end of the start field.

523.2.3

FIS Competitions

At competitions without ranking lists, the start order is realized by draw. The Jury must decide on the number of groups and the number of athletes per nation within a group based on the field size.

523.3

Team Competitions

523.3.1

For OWG, WSC and WCNC competitions the start order of Team Gundersen and Team Sprint competitions will be based on reverse order of the actual Nation's Cup standings. By equal point standings the start order will be made by draw in the team captain's meeting between the equal placed teams. Teams without Nation's Cup points or rankings start in the beginning of the competition. The start order must be made by draw.

For JWSC the start order is determined according to the reserve ranking from the previous JWSC.

523.3.2

FIS Competitions

The start position will be made by draw or as per a special rule.

524

Training before the Competitions

524.1

Ski Jumping

524.1.1

All training on the competition jumping hill before the competition (official training) must be within the schedule assigned by the OC and under the supervision of the Jury.

Any additional training made independently under self responsibility and/or direction of a trainer (free training) during the scheduled organisation days is not permissible.

524.1.2

At the official training for the competition only the registered competitors as well as the additional fore jumpers specified by the Competition Committee can participate.

At the OWG, WSC, JWSC and Cup competitions the right to participate during the official training is based on the actual rules and regulations.

524.1.3

For International Nordic Combined competitions (FIS), the jumping hill must be available for training a minimum of one day. For the OWG and the WSC, the jumping hill must be available for training three days before the competition. The Competition Committee shall consider both snow and weather conditions when scheduling training sessions. It is the responsibility of the Competition Committee to provide optimal training conditions for all competitors.

524.1.4

If possible, training sessions shall be scheduled at the same time of day as the competition. All information pertaining to the training schedule or possible changes must be presented in due time.

524.1.5

The jumping hill must be in good condition for all training sessions and must be prepared as it would be for the competition. An adequate number of officials and hill packers must be present during the training sessions.

524.1.6 During all training sessions, distances shall be supervised and the maximum length of inrun decided and fixed by the Jury.

524.1.7 On-site first-aid personnel must be present during all training sessions to provide any necessary medical assistance.

524.1.8 To guarantee an equal opportunity, both jumping hills are to be closed for training and competition 14 days prior the first training day of the OWG respectively WSC.

The competition dates have to be scheduled in such a way that all three training days, according to the above articles are realized on the first jumping hill to be used prior to the first competition, subsequent training on the same hill for the second competition is additional. The same condition must be present for training days prior to the second jumping competition on the new jumping hill.

524.2 Cross-Country

Competitors and team officials should be given the opportunity to train and inspect the course in competition conditions. When possible, the course should be open two days before the competition. The Jury may close the course or limit the use of the course to certain sections or hours.

525 Competition Realisation

525.1 Ski Jumping

525.1.1 Number of Jumps

For all competitions, with exception of the IG 15 km (two scored competition rounds Ski Jumping), one competition round in Ski Jumping will be held which will give the calculation basis for the converted time difference for the Gundersen method. One trial jump (round) must be included in the competition program. The decision to use the trial jump is up to the jumper.

PCR - Junior World Ski Championships (JWSC)

The provisional competition round (PCR) will be carried out according to the regulations for a competition round. The scores can be used as a result for the start of the Cross-Country race only if the actual competition round Ski Jumping cannot be carried out. This score can be used only one time.

525.1.2 In-Run Length

The Jury shall decide the length of in-run (starting place) to be used. Once a majority decision has been reached on the start to be used, its length must remain the same for the entire round of jumps unless the round is stopped and restarted. No jumper is permitted to use a greater length of inrun (higher start) than determined by the Jury.

If the so-called wind/gate compensation system is in place the Jury may change the length of the in-run even during a competition round in order to approach the principles of fairness and safety. Such a decision must be based on an unanimous decision of the Jury. The wind and gate compensation factor will be included in the total score.

A trainer/coach is entitled to reduce the length of in-run for his respective athlete. This has to be announced within the red phase of the starting procedure of the athlete concerned (does only apply for WC competitions). In such a case, the gate compensation factor is only calculated, if the athlete jumps at least 95 % of the HS distance.

- 525.1.3 The jumper is not allowed to use ski poles or any other kind of assistance. Nor is the jumper allowed to obtain outside assistance. Competitors who violate this rule will be disqualified.
- 525.1.4 When the hill is clear and the officials are ready, the chief of competition or authorized assistant shall give the start signal from the Judges tower for each competitor. No more than one signal should be used to initiate the exact time of the start control.
- 525.1.5 The start signal shall be determined by a green light displayed on the traffic light. If such a starting device is not available, the jumper can be signalled that the hill is clear by the waving of a flag by a control official located on the takeoff platform.
- 525.1.6 The jumper must have completely finished the jump before the next starting signal may be given.
- 525.1.7 It is the responsibility of the chief of competition to coordinate communication among all officials. This to include, the chief of hill, his various assistants at the takeoff, on the outrun, at the wind-measuring devices that the hill is clear, that all officials are ready, and that weather (wind) conditions are fair.
- 525.1.8 The starter shall report to the chief of competition the number of the upcoming jumper and the competitor's readiness to start.
- 525.1.9 It is the competitor's responsibility to be ready at the start when the starting number is called. The Jumper has according to the respective mode of the start time installation (10 seconds in case of three phase mode and 10 – 15 seconds in case of two phase mode) to leave the start after the start signal has been given. If the jumper has not left the start gate by the end of the start time, the hill will automatically be closed (see art. 514.1.7.1, 514.1.7.2).
- 525.1.10 During the starting procedure the jumper must have the opportunity to clearly observe the automatic countdown display (e.g. a programmable digital clock) (see art. above).
- 525.1.11 The jumper has to start within the start time. If the start signal is interrupted during the competitor's starting period for any reason, for example unstable weather conditions, the starting process will begin again.
- 525.1.12 The jumper must not start before the official starting signal or intentionally delay readiness to receive signals from a third person. Feigning problems with skis, bindings, equipment, or clothing is inexcusable. Both types of actions will as a rule cause disqualification.
- 525.1.13 A competitor hindered by „force majeure“ who arrives late at the start may appeal to the Jury. After considering all the facts reported, the Jury may allow the competitor to participate in the remaining part of the competition out of starting order.

- 525.1.14 *Repetition of a Jump*
 A competitor hindered or interfered with during the jump by an error on the part of an official, an animal, spectators or any other „force majeure“ may appeal to the Jury. After considering the facts reported, the Jury shall either allow or reject a repeat of the jump. In case of one of the above mentioned reasons, the Jury is entitled to allow repetition of the jump from their own point of view.
- 525.1.15 If combined ski jumping is carried out together with special ski jumping, the combined competitors should be drawn in a separate group. The combined competitors can be divided into subgroups.
- 525.1.16 If possible, style points shall be displayed after each competitor’s jump (open scoring). An acoustic announcement concerning style points awarded is not permitted.
- 525.1.17 *95 % Rule*
 A jumper, who has reached 95 % of the maximum length of the longest jump but has a fall, has the right to participate in the next round in addition to the qualified jumper (if the wind/gate compensation is used, the compensated distance is the basis).
- 525.2 Cross-Country**
- 525.2.1 *Gundersen Method*
 For the Gundersen method the winner of the jumping competition starts first, the second ranked starts next, etc. The start interval is the result of the converted point differences into time differences. The start times are rounded to full seconds.
- 525.2.2 *Mass Start*
 Start positions will be determined by draw and/or an actual FIS Cup ranking list (see art 523.2.2).
- 525.2.2.1 At WSC and WCNC or other FIS Cup competitions the start positions will be determined according the actual World Cup or other Cup standings.
- 525.2.3 ~~*Instruction for the „Wave Start“*~~
 The Jury is responsible to make the decision about the "Wave Start" and appropriate start time within the start list. The competitors start in groups in 10 sec. interval. The decision for these groups will be made according to the length of the course and the venue. Competitors who have been lapped or stay just before must be pulled from the race only for OWG, WSC, WCNC and GP. For the final result, the removed athlete(s) will be ranked (no time) and get their corresponding cup points at the place when they were removed. Special regulation Individual Gundersen see art. 540.3.
- 525.2.4 Responsibilities of Officials and Others
- 525.2.4.1 *If required, the Jury will issue special regulations for officials, media and service people and any other non-competitors, to ensure order on the course, in the stadium and in the team preparation area before, during and after the competition.*

For order and control on the courses the following principles apply:

- from 5 minutes before the start until the time the course closers have passed, all officials, coaches, non-competitors and other accredited persons, are no longer permitted to ski on the course. During the competition, these persons must take fixed locations beside the course and must stand without skis on.
- while giving intermediate times and information to competitors, officials, coaches and others are not allowed to run more than 30 m beside the competitors.
- while doing this work officials and others have to ensure not to obstruct competitors.
- while giving refreshments to the competitors the coaches must ensure not to obstruct competitors.

525.2.5 Wax testing and warming up on the ski competition course must always be done in the competition course direction. Anyone testing skis on the competition course must consider the safety of others on the course and the course preparation. Electronic timing devices used for testing skis will not be allowed on the course during the competition or official training.

525.2.5.1 In order to obtain clean TV coverage and for safety reasons parts of the competition course may be closed for all but the competitors taking part in the competition. The Jury can allow ski testing and warming up by competitors on parts of the competition course before and during the competition. Athletes and service personnel, wearing special bibs may be allowed to ski on these parts of the competition course.

525.2.5.2 A ski glide testing area with testing tracks for all participating teams must be located close to the stadium. It should be close to the team wax cabins and warm-up track. The testing tracks must be prepared to the same standard as the competition course.

525.2.5.3 Warm up courses should be prepared as close as possible to the stadium.

525.2.6 *Schedule Postponement*

With difficult weather conditions the Jury may postpone the competition. The decision by the Jury must be made not later than 30 minutes before regular starting time.

525.2.7 *Responsibilities of the competitors*

525.2.7.1 In all training and competition situations the athlete must act with due care taking into account the course conditions, visibility and competitor congestion.

525.2.7.2 In all training and competition situations the athletes must always ski in the competition course direction.

525.2.7.3 Competitors must follow the instructions (course opening times, wearing bibs, training, ski testing, etc.) issued by the Jury or OC in order to ensure order on the course, in the stadium and in the team preparation area before, during and after the competition.

- 525.2.7.4 The competitor is responsible for arriving at the start and starting at the correct time.
- 525.2.7.5 If transponders or GPS are used it is mandatory for the competitors to wear these equipment.
- 525.2.8 Competitors must follow the marked course from start to finish and must pass all controllers.
- 525.2.8.1 If a competitor skis on a wrong section or leaves the marked course, he should return to the point where they made the error. In order to do so, the competitor may have to ski against the correct ski direction and shall be totally responsible for ensuring that they do not obstruct or endanger other competitors.
- 525.2.9 They have to cover the whole distance on their skis using only their own means of propulsion. Help from pacemakers or pushing is not allowed.
- 525.2.10 In all competitions obstruction is not allowed. This behavior is defined as deliberately impeding, blocking, charging or pushing any competitor with any part of the body or ski equipment.
- 525.2.11 *Equipment exchange*
- 525.2.11.1 In all competitions pole exchange is only allowed in the case that a pole is broken or damaged.
- 525.2.11.2 Skis may be changed only if:
The skis or bindings are broken or damaged. The equipment failure must be proven to the Jury after the competition.
In the case of a ski exchange, the competitor must do it outside the track without help from any other people.
- 525.2.12 Waxing, scraping or cleaning of the competitor's skis during the competition is forbidden. It is not allowed to place branches, tools or materials on or adjacent to the groomed course.
- 525.2.13 *Position for a Competitor at the Start*
The competitor must have his feet in front of the start line and remain stationary. The poles remain stationary and should be placed behind the starting line.
- 525.2.14 *Early Start for a Competitor*
Each competitor is responsible himself to start at the right starting time. A competitor who starts too early must come back and pass through the starting line again. In this case, his starting time will be the time on the start list.
Competitors who do not re-cross the starting line after an early start must be disqualified. To cross the marked starting line with the tip of the first shoe marks the beginning of the race. In order to get a clear presentation of evidence, adequate technical equipment must be installed in the starting area to cover the start procedure (art. 514.2.1).

- 525.2.15 *Late Start for a Competitor*
A competitor who starts late must not interfere with the start of other competitors.
- 525.2.16 *Overtaking*
During an individual- or team competition a competitor who is being overtaken must give way on the first demand. This applies in free technique courses even when the skier being overtaken may have to restrict his skating action.
For all competitions, when overtaking occurs, competitors must not cause any obstruction (art. 525.2.10).
The responsibility for a correct passing without obstruction is on the overtaking skier. The overtaking skier must have his/her skis in front of the skis of the overtaken skier before skiing his/her best line.
- 525.2.16.1 *Marked Corridors*
In sections with marked corridors (e.g. finish zone) the competitors should choose a corridor. A competitor is allowed to leave the chosen corridor as long as ICR art. 525.2.10 is upheld.
- 525.2.17 *Team and Team Sprint Exchange*
In a team event, the exchange is achieved by the arriving competitor, with a tap of the hand on any part of the next competitor's body while both competitors are in the relay exchange zone.
If the relay hand-over occurs before or after (outside) the exchange zone, it will be considered as a false start and the procedure must be repeated within the exchange zone. Relay teams who have made a false start and do not return to the start again correctly must be disqualified. The next competitor may only enter the relay exchange zone when summoned. Any method of pushing the starting competitor is forbidden.
- 525.2.18 The competitor is ranked if all the parts of his body have crossed the finish line without any outside help.
- 525.2.19 *Did Not Finish*
If competitors abandon the competition before the finish, they must inform the first official they meet and they are responsible for returning the transponders and the start bib as soon as possible.
- 525.2.20 The competitors must comply with the instructions of competition officials.
- 525.2.21 The competitor must comply with all aspects of the medical code (see art. 221).
- 525.2.22 Communication devices that support wireless communication between coaches and athletes or between athletes are not allowed during competition.
- 526 Bibs**
- 526.1 It is mandatory for the competitor to wear his start number during the official training (Ski Jumping and Cross-Country) and competition at OWG, WSC and WCNC. Competitors who violate this ruling will be disqualified.

526.2 For JWSC, COCNC and international Nordic Combined competitions it is mandatory for the competitor to wear his start number during all official jumping rounds (training and competition). Competitors who violate this ruling will be disqualified.

526.3 The start numbers must be legible from the back and the front. They must not hinder the competitor in any way. The size and the shape are described in the rules for competition equipment. It is not permitted to change the size, the shape and the method of attachment of the start number.

526.4 Cross-Country

For OWG, WSC, JWSC and WCNC all start numbers used in all competition formats must also have numbers on both sides of the bib.

526.5 Leg Bibs

At OWG, WSC, JWSC, WCNC and COCNC for all Individual Gundersen-, the Mass Start competitions and the last competitor of the Team Competitions it is required to affix bibs to the competitor's leg that is closest to the finish line camera.

526.6 Team Competitions

For each group, the team start numbers will be a different colour (same for both Ski Jumping and Cross-Country). For OWG, WSC, JWSC, WCNC and COCNC competitions they will be:

- 1st group = red start numbers
- 2nd group = green start numbers
- 3rd group = yellow start numbers
- 4th group = blue start numbers.

527 Calculating and Announcement of Results

527.1 Start and Result Lists

The following elements provide the basic format information for all lists:

- Name of the competition
- Date and place of competition
- Name of the hill and reference to its K-point and Hill Size (HS) or
- Name of course and reference to technical parameters
- HD, MC, TC, length of rounds
- Names and country of each Jumping Judge
- Names and country of each Jury member
- Information on the current weather (snow conditions, temperature, wind, etc.)
- Number of entered, started, finished, not finished and disqualified competitors
- Additional for each competitor
- Rank
- Bib number
- Last and first name, nation and/or club

- For each jump, the following information shall be recorded separately:
- Distance jumped, inrun velocity, distance points
- Style points
- Collective points per round and
- on the end of the line the total points or
- Cross-Country time and rank
- Calculated points after Cross-Country race (Mass start)

527.2 Ski Jumping

527.2.1 Format for Trainings Lists

For the official training results, in addition to the general points listed above, the following elements must be listed:
inrun velocity/rank, distance jumped/rank, starting gate for each round

527.2.2 Instructions for the Start Lists

See art. 527

527.2.3 Final Result Lists

See art. 527

527.2.3.1 Style Points

Scoring starts with the scores of five Jumping Judges, and then the highest and lowest scores are eliminated. The three remaining scores are added. The sum of these scores is the total style points for a jump. The guidelines for the recording of the Jumping Judges note are given with in the ICR book III [Ski Jumping](#), art. 431.

527.2.3.2 Distance Points

The points scored for the distances jumped are calculated on basis of the jumping hill. The point for one m is based on a points table determined on the K point of the hill.

K-Point Distance Meter Value

| | |
|------------------|------------|
| 20 – 24 m | 4,8 pts./m |
| 25 – 29 m | 4,4 pts./m |
| 30 – 34 m | 4,0 pts./m |
| 35 – 39 m | 3,6 pts./m |
| 40 – 44 m | 3,2 pts./m |
| 45 – 59 m | 2,8 pts./m |
| 60 – 74 m | 2,4 pts./m |
| 75 – 99 m | 2,0 pts./m |
| 100 m and larger | 1,8 pts./m |

The K-point of the jumping hill acts as the table point; consequently, the K-point distance equals 60 distance points. After the m value of the hill has been determined, the distance difference of the measured lengths for jumps must be calculated. Distances shorter than the K-point are calculated by multiplying the m value by the length difference and subtracting this number from

60. By contrast, distances longer than the K-point are calculated by multiplying the m value by the length difference and adding this number to 60.

527.2.3.3 *Collective Point Score*

This score is calculated by adding the style points and the distance points together.

527.2.3.4 *Total Point Score*

This score is calculated by adding together the collective point scores from the competitive jumping rounds. The jumper with the highest total point score is the winner.

527.2.3.5 *Identical Scores*

When two or more jumpers have identical scores, a tie is declared, and the jumpers are awarded the same place. The following position(s) shall be displaced (eliminated) in accordance with the number of tied places. In the final result list, ties' shall be listed in reverse order of the jumper's start number (the higher start number first).

527.3 **Announcement of the Jumping Results (Intermediate result)**

An unofficial results list will be posted immediately after the competition. The chief of calculations and the competition secretary examine and compare the unofficial results list with the original recording lists. The competition secretary then presents the final list for approval to the Jury. If the Jury has not received any protests, the results list will be published as the intermediate results after the protest time. The protest time as a rule is 15 minutes after the end of the competition. Team captains' meeting can decide on a shorter protest time.

527.3.1 *Style Judges Deduction Point List*

At OWG, WSC, WCNC and COCNC for each round of jumps an additional list concerning the style point deductions must be made.

527.4 **Cross-Country**

527.4.1 *Cross-Country Calculation Table*

The points or time differences between the competitors and to the winner of the Jumping competition or Cross-Country competition will be calculated for establishing the result difference between the competitors. This calculation based on the Nordic Combined table. The value of either time or points must be mathematically rounded depending on the competition format.

According to the length of the race course the following tables will be used. For the calculation a six decimal point place is used:

| | | | |
|--------------------|--------|---|-----------|
| 5 km course: | 1 min. | = | 15 points |
| 10 km course: | 1 min. | = | 15 points |
| 15 km course: | 1 min. | = | 15 points |
| 2 x 7.5 km course: | 1 min. | = | 30 points |
| 4 x 5 km course: | 1 min. | = | 45 points |

Conversion tables by deviating distances are to be specified in sole responsibility of the national Ski Federations.

527.4.2 *Free Technique*

Free technique includes all Cross-Country skiing techniques.

527.5 **Final Result List**

After finishing of a Nordic Combined competition the TD and the Chief of Competition must sign the Official result list to confirm the correctness of the result.

All official results must also be electronically transmitted to FIS in XML format.

531.1.3.6 refuses to undertake a FIS required medical examination (art. 221.2)

531.1.3.7 If a competitor has actually started in a competition and is later determined by the Jury to have been in violation of these rules the Jury must sanction the competitor.

531.2 Penalties

A penalty will be assessed by the Jury where the competitor:

531.2.1 violates the rules governing advertising on equipment (art. 207.1)

531.3 Disqualifications

The jury must meet and decide if a competitor is to be disqualified (see art. 223.3.3) All relevant evidence must be carefully considered and the competitor must have the opportunity to defend himself (see art 224.7). A competitor will be considered to be disqualified if he

531.3.1 violates the rules of start procedure (art. 525.1.3, 525.1.4, 525.1.12, 525.1.13, 514.1.7.1, 514.1.7.2, 525.2.12, 525.2.14, 526.1, 526.2, 541.3)

531.3.6 According to the rule 223.3.3 competitor shall only be disqualified if his mistake would result in an advantage for him with regard to the end result, unless the Rules state otherwise in an individual case.

532 Protests

532.1 Protests against the entry of a competitor must be delivered in writing to the competition secretary before the start of the competition.

532.2 Protests against the actions made by another competitor or an official during the competition must be made in writing to the competition secretary within 15 minutes after the completion of the competition.

532.2.1 At the OWG, a verbal protest must be submitted to any Jury Member within five (5) minutes.

532.3 Protests concerning incorrect calculations or result misprints shall be considered if sent by registered mail from the competitor's National Ski Association to the event organising association within one month of the date of the competition. If a mistake is proven, the correct results shall be republished and the awards redistributed if necessary.

532.4 The Jury must consider protests if they are made within the allowable time limit and a sum of CHF 100.– or the equivalent in another valid currency has been deposited with the competition secretary. This deposit will be returned if the protest is upheld.

- 532.5 A protest may be withdrawn by the protesting party before the publication of a decision by the Jury. In this case, the money deposit must be returned.
- 532.6 Protests not submitted on time or submitted without the protest fee are not to be considered.
- 532.7 Distances measured manually by distance measurers and style scorings of jumping judges ~~or scoring at a Mass start competition by a Jury~~ are subjective decisions (so called „statements of facts“) on real facts which are not repeatable and therefore, cannot be corrected. Therefore, protests against such subjective decisions aiming at a correction of the result are not allowed. This to include, protests concerning the start control procedure for ski jumping in situations of variable wind conditions.

533 Authorization

The following are authorized to submit protests:

- the National Ski Associations
- Team Captains.

533.1 *Settlement of Protests by the Jury*

The Jury meets to deal with the protests at a predetermined place and time fixed and announced by it.

- 533.2 At the vote on the protest, only the Jury members are to be present. The TD chairs the proceedings. Minutes of the proceedings are to be kept and signed by all voting members of the Jury. The decision requires a majority of all voting members of the Jury, not just of those present. In case of a tie, the TD's vote is decisive.

534 Right of Appeal

534.1 The Appeal

534.1.1 It can be made

- against all decisions of the Jury (see also ICR 224.11)
- against the official result lists. This appeal has to be directed exclusively against an obvious and proven calculation mistake.

534.1.2 Appeals must be submitted to the FIS by the NSA.

534.1.3 Deadlines

534.1.3.1 Appeals against the decisions of the Jury are to be submitted within 48 hours of the publication of the official results list.

534.1.3.2 The appeals against the official results are to be submitted within 30 days, including the day of the competition.

534.1.4 The decision concerning the appeals are taken by

- the Appeals Commission

- the FIS Court

534.2 *Postponing Effect*

The evidence submitted (protest, appeal) may not cause a postponement of the appeal.

534.3 Submission

All evidence must be in writing to be substantiated. Proof and evidence are to be included. Evidence submitted too late must be declined by the FIS (see 225.3). In order to file an appeal it must be accompanied with a deposit of CHF 500,- which will be refunded if the appeal is upheld.

3rd Section

Special Regulations for the Competition Formats

540 Individual Gundersen Competition

540.1 Competition Realisation

For the Gundersen Individual competition, the Jumping competition is held first with the Cross-Country race being the second event. To have start right for the Cross-Country race it is necessary for the competitor to have taken part in the competition round for Ski Jumping.

540.2 Calculation

The calculation is based on the appropriate meter and point value according the art. 527.2.3.2 and 527.4.1. For the final result list the ranking must be fixed, if necessary with technical help. In case of two or more athletes arriving at the finish line with the identical times a decision is made by the use of the photo finish video or by finish referee (art. 514.2.5). In case when no visual differences between competitors can be determined with the assistance of the technical equipment, the same rank will be given in the final result. For cup competitions, the same points will be awarded.

540.3 Special Regulations

To prevent too large start time differences, the Jury can decide upon the use of the „wave start“ (art. 525.2.3). According to the adjusted final result list it is possible that a tie in the final ranking may occur. The ranking of the competitors in this situation is based upon art. 527.2.3.5 When this occurs in a cup point event, the following rule applies: the tie competitors get the same points, with the following points value being eliminated.

541 Individual Mass Start Competition

541.1 Competition Realisation

The Individual Mass Start competition shall begin with a Mass start Cross-Country race (see art. 515.2.9, 523.2.2, 525.2.2, 527.1) followed by a one round Ski Jumping competition (see art. ~~525.1.1~~, 527.1).

The jump competition will be judged as normal and includes Wind and Gate Compensation (when in use). The competition program must also include one trial round. The competition round is in reverse order of Cross-Country results, i.e. the winner of Cross-Country race gets the last start number for Ski Jumping.

At World Cup competitions the “to beat line” is also part of the hill marking.

541.2 Calculation

At Individual Mass Start competition, all athletes start at the same time and final results are determined by finish arrival order. ~~The time differences at the finish calculated into points back, and then deducted from the 120 points base awarded to the winner. The race winner will receive zero points, the rest of the field minus points,~~ see art. 527.4.1 for the valid point table to be used.

By manual calculation from the table following rules are valid: at existing 2 values the first value applies, at three to seven values applies the middle value, is the number of the values more largely for four and uneven applies the left value apart from the center.

541.3 Special Regulations

Recommended norms

Start

- Classical tracks before start line, odd number e.g. 5 or 7
- Length of tracks after start line 30 to 50 m
- Distance between tracks minimum 1.2 m

Finish

- Number of corridors at least 3 (each 3 m)
- Width 9 m (minimum)

The start procedure for the Mass Start is:

- The starter must position himself at the start so that he can easily be heard by all competitors.
- At the latest, one minute before the start the competitors are commanded to „go to the start“ line. Then they are informed „30 seconds to start“. At this time, the starting clock will be blocked and out of view of the competitors, only the starter can see the clock. At his discretion, the starter gives an acoustical start signal or a shot (these commands should be given in English at all competitions).
- Competitors are not allowed to change tracks within marked corridors the first 30-50 m after the start line.
- ~~– Any false start will result in a „restart“ of the competition. The starter is required to give a restart signal (second shot) and must have assistants placed an effective distance down the track where it is possible to turn the competitors back. The competitor who made the false start will be put to the last row~~
- ~~– Each competitor is responsible himself to start at the right starting rime. The starting procedure must be recorded by a HD video camera. As a backup system for WC an additional transponder line has to be places 1,5 m beyond the starting line. The reference time for the jury to check the start procedure ist 1 second, which means all earlier starts must be checked. A competitor with a false start must be disqualified.~~

542 Team Gundersen Competition

542.1 Competition Realisation

The Team Gundersen Team format consists of a ski jumping event by one round and a relay Cross-Country competition. At OWG, WSC, WCNC and JWSC a team consists of four competitors.

542.2 Calculation

The calculation is based on the appropriate meter and point value according the art. 527.2.3.2 and 527.4.1. For the final result list the ranking must be

fixed, if necessary with technical help. In case of two or more athletes arriving at the finish line with the identical times a decision is made by the use of the photo finish video or by finish referee (art. 514.2.5). In case when no visual differences between competitors can be determined with the assistance of the technical equipment, the same rank will be given in the final result. For cup competitions, the same points will be awarded. The start differences for the Cross-Country race will be calculated from the actual total points scored by each team from the Jump event.

542.3 Special Regulation

542.3.1 The selected 5 km course should use two times 2.5 km lap layout and meet the FIS homologation guidelines for this event.

542.2.2 A competitor who did not start in one round of the jump competition, or was disqualified within a round will get zero points.

542.3.3 If the conditions so demand, the length of the inrun can be adjusted for each group, or a round of jumps for one specific group can be cancelled and re-started

543 Team Sprint Competition

543.1 Competition Realisation

The Team Sprint competition consists of team Ski Jumping and a 2 x 7.5 km Cross-Country competition skied over short laps (each competitor must run 5 x 1.5 km alternately). A team consists of two competitors who must participate in and complete both disciplines (Ski Jumping and Cross-Country).

543.2 Calculation

The calculation is based on the appropriate meter and point value according to the art. 527.2.3.2 and 527.4.1.

For the final result list the ranking must be fixed, if necessary with technical help. In case of two or more athletes arriving at the finish line with the identical times a decision is made by the use of the photo finish video or by finish referee (art. 514.2.5). In case when no visual differences between competitors can be determined with the assistance of the technical equipment, the same rank will be given in the final result. For cup competitions, the same points will be awarded.

The calculation of the jumping result is the actual total points scored by both jumps for each team and will be used for the starting differences of the Cross-Country race.

543.3 Special Regulation

The start order for the jump event is based on the actual Nation's Cup ranking. For WSC or JWSC it's only possible to start with one team per Nation, the start numbers will be distributed in the reverse order of the nation's ranking.

For ~~World Cup~~ WCNC or COCNC the number of participating teams will be according to the specific event rules.

The 2 x 7.5 km Sprint is to be carried out using laps of 1500 m in length, where the competitors exchange off after each lap.

After both competitors have completed two laps, the elimination modus will start, whereby the team/s which is/are overlapped must abandon the competition and will be taken out by the jury. The Nation cup points will be awarded based on the actual standing of the team when it was taken out from the competition. Only one team per nation will get points.

The exchange area (see article 515.2.12) must be designed in such way, that all teams are assigned a preparation area box (approx. 1.5 m width and 2.5 - 3 m in length). Each box is fenced to the exchange zone with all assigned boxes situated within the prepared 30 to 40 m tag zone. The entrance to the exchange area is on the beginning of the boxes area. After each exchange the athlete must go back to the box through a corridor on the end of the boxes. The competitor who is not skiing must wait in his box or the area behind. He can be coached and make preparations to his skis. For each box, one service personal for ski preparation is allowed. Only waxing equipment and the competitors racing-ski are allowed in the box (no extra equipment or skis).

544

Summer Competitions

Summer competitions in Nordic Combined are possible. For the Jumping event the same regulations as winter competitions are valid. The Cross-Country event can be held using different equipment (Roller skis, Inline-Skates) or a running race. The invitation must state the competition format and race method.

4th Section

Tables for Nordic Combined Cross-Country

550 The Calculation of the Time Difference

550.1 In order to eliminate variations during the calculation of the time differences, the following principles are used:

550.2 The start differences for the Cross-Country event are based on the Ski Jumping result, this calculation is made according to either seconds per point or points per second.

550.3 The calculation made will be taken to the sixth decimal place. This will ensure that each point value calculation is factored with sufficient accuracy. The value of the seventh decimal point is ignored. Therefore, no rounding of the sixth decimal place value is to occur.

Example:

Default = 45 points per minute
1 Minute per 45 points = 60 seconds per 45 points
60 seconds: 45 points = 1,333333...sec/pts.
For calculation = 1,333333...sec/pts.
(6 decimal place)

550.4 Procedure for the Calculation of the Time Difference:

The calculated time differences will be rounded from 0,5 tenths to a full second:

0,499999 = 0

0,5 = 1

550.5 Calculation Example for Time Difference

| Points difference | Seconds per point | Result | Time difference (sec) |
|-------------------|-------------------|-------------|-----------------------|
| 50 | 1,333333 | 66,66665 | 67 (1:07) |
| 22,3 | 1,333333 | 29,73333259 | 30 (0:30) |
| 22,4 | 1,333333 | 29,333326 | 29 (0:29) |

550.6 Procedure for the Calculation for the Point Difference

The calculated point difference will be rounded from 0,05 to a full tenth of a point:

0,0499999 = 0,0

0,05 = 0,1

550.7

Calculation Example for Point Difference

| Time difference (sec) | Seconds to points | Result | Point difference |
|------------------------------|--------------------------|---------------|-------------------------|
| 41 (0:41) | 1,333333 | 30,7500077 | 30,8 |

| 188 (3:08) | 1,333333 | 141,000035 | 141,0 |
