

PA1 miniature single-point load cell

product description

The PA1 is a series of low capacity, aluminium single-point load cells intended for a wide range of industrial applications.

Due to their compact design, the PA1 can be integrated into low-capacity weighing machinery, medical devices and general machinery for process automation and control.

The PA1 has a broad range of capacities, extending from 0.3kg to 20kg. It features full-bridge, bonded-foil strain gauge technology, which offers excellent long-term stability.
