Flogas Enterprise's Solution:

Flogas partnered with Virginia International Logistics to transition their fleet to Bio-CNG, supplied at a fixed price - providing complete protection from diesel and HVO market volatility.

- Scania and Iveco CNG 4x2 and 6x2
- Up to 500km range per fill
- Access to Flogas' growing nationwide refuelling network
- Centralised billing and reporting via Flogas fuel card
- ISCC certified emissions reporting through Renewable Fuel Assurance Scheme

What they said

"Fuel price volatility has been one of the biggest pressures on our business, especially with ongoing geopolitical uncertainty. Since partnering with Flogas for fixed price Bio-CNG, our fuel costs are stable and our margins protected. At the same time, we've significantly reduced our emissions, which is becoming increasingly important for our customers and contracts."

Ray Coyle, Director, Virginia International Logistics

Why Bio-CNG?

Bio-CNG (Biomethane Compressed Natural Gas), a renewable HGV fuel derived from organic waste, reduces carbon emissions, fuel cost and total cost of ownership vs diesel. For Virginia International Logistics, it delivered:

- Lower total fuel cost vs diesel and HVO
- Lower total cost of ownership vs diesel and HVO
- Significant, measurable emissions reductions
- Fixed pricing - protection from market volatility
