

## CARING + CLEANING HARDWOOD

### SWEEP DAILY

*Essential daily step*

Keeping debris off the floor is key! Sweep daily to prevent damage, dirt, and grime build-up.

### VACUUM, CORRECTLY

*Weekly or biweekly cleaning*

When using a vacuum, be careful to use a hardwood floor attachment with no beater bar. Other tools can scratch and damage the wood.

### MOP WITH MICROFIBER

*Less is more*

When mopping hardwood, make sure to use a flat microfiber mop and a hardwood floor cleaning product. Be sure to wring out most of the water so it's damp and not sopping wet. Avoid leaving any excess standing water on the floor, especially on prefinished hardwood.

### DEEP CLEANING

*Extra time & effort*

For a deep clean, you can use a spray-and-wipe method using a spray bottle of hardwood floor cleaner and clean microfiber rags. To speed up drying and avoid standing water, use a fan.

Above All Flooring offers a complete wood floor cleaning kit complete with our own uniquely crafted wood floor cleaning concentrate, Wood Kleen.
