New Laminate/
LVP Purchase

Here are some helpful hints to ensure a smooth, hassle-free, quality installation*.

When your install is scheduled you will be given an approximate time frame the installer will arrive at your home.

The ambient temperature in the home must be at least 70°F for 48 hours prior to the scheduled installation date. The installer will need electricity in your home.

For Existing Homes

- ✓ Please move all furniture (unless it's included in your bid).
- ✓ If furniture moving is included in your bid please be advised that our installers do not remove books, glass, small items, or unplug electronics. Please strip bedding, remove drawers from nightstands and dressers, etc. Have professionals move your pianos, safes, pool tables and grandfather clocks as we do not provide this service.

For New Construction

- ✓ Please be sure the floor is free of debris, sand, and dirt prior to installation.

Routine Care and Cleaning

One way to protect your beautiful new floor is to place a natural or colorfast mat at outside entrances to collect tracked in dirt and absorb excess moisture. For added indentation resistance, use floor protectors on chairs and other furniture. Furniture with rolling wheels require rubber wheels and/or protective rigid floor mats.

It is best to vacuum laminate/LVP floors using the wand attachment. Use a dust mop for general cleaning. For spills, wipe up immediately with a cloth or sponge. In sandy (red dirt) areas, sweep or vacuum regularly. The use of a steam cleaner can damage your new floor unless otherwise specified by the manufacturer.

DO NOT use soap-based detergents or "mop and shine" products, abrasive cleaners (steel wool or scouring powder) or wax or polish your floor. These may leave a dull film or scratch your floor.

We recommend you visit the manufacturer's website for specific care instructions.

**In addition to the manufacturer warranty on the product, BlvdHome provides a one-year labor warranty.*
